Dior dictates, the rest follow

ELSA M. SANDERS' London letter describes the man who created the New Look

CHRISTIAN DIOR again makes fashion news by being the first Paris couturier to be followed by the B.C.C. This time, however, the man who created the "New Look" has a date for journalists that is as definite as the date for the fashion show itself. He is to appear in a quiet fashion show at the Ritz Hotel, London, on the 27th of October. This is the first time since the war that a Paris couturier has been invited to show his designs in London. Dior's designs are not only a fashion show but a fashion statement. They are a statement of the new look in fashion, a statement of the new look in life.

The "New Look" is a fashion show that is a statement of the new look in fashion, a statement of the new look in life. It is a fashion show that is a statement of the new look in fashion, a statement of the new look in life. It is a fashion show that is a statement of the new look in fashion, a statement of the new look in life. It is a fashion show that is a statement of the new look in fashion, a statement of the new look in life.

WOOL IN A NEW GUISE

Wool fabric has never been promoted in the fashion world as effectively as it is today. Popular favour has been won by the new woolen garments in gold and champagne.

These large, elegant, and comfortable woolen garments are the new look in fashion. They are a statement of the new look in fashion, a statement of the new look in life. They are a fashion show that is a statement of the new look in fashion, a statement of the new look in life.

A White Russian Dinner

Your cream plays an important part in Russian and Balkan cookery.

Russian cookery is said to be full of great contrasts. It is a statement of the new look in fashion, a statement of the new look in life. It is a fashion show that is a statement of the new look in fashion, a statement of the new look in life.

F.I.T.—A COLLEGE WITH NEW IDEAS

Gives the answer to the employer's problem

PROCURING skilled workmen is generally considered an employer's problem. But in the American States and the United Kingdom, the answer is to be found in the F.I.T. (Foreign Inland Training) scheme. This scheme is a statement of the new look in fashion, a statement of the new look in life. It is a fashion show that is a statement of the new look in fashion, a statement of the new look in life.

Are working wives inefficient?

ONLY one has been dismissed from a job. My employer said bluntly to me that he was not interested in my work. This is a statement of the new look in fashion, a statement of the new look in life. It is a fashion show that is a statement of the new look in fashion, a statement of the new look in life.

Necessity

Perhaps Mrs. A. can help me with my problem. I have a problem with my work. This is a statement of the new look in fashion, a statement of the new look in life. It is a fashion show that is a statement of the new look in fashion, a statement of the new look in life.

# THREE MEN FIGHT FOR LIFE TEN MILES ABOVE THE GROUND

New men have always been equipped navigators and crew. Their adventures have fascinated people for ages. But the contest of air has had the pioneers, also, men who have probed the boundaries that divide the layers of air near sea level where humans and birds make their way, and the higher layers where they have never gone. The atmosphere, the intensity of the air, the way the air is heated, and the way it is cooled, and the way it is stirred, through the clouds and canyons of the clouds.

Men have even invaded the stratosphere, that realm of space where the air is so rare that it is almost beyond recognition. The first man to do this was Captain Charles Lindbergh, who on May 20, 1931, flew his Spirit of St. Louis across the Atlantic in 33 hours and 21 minutes.

Mon's battle to conquer the air is still in its pioneer stage. Here WILLIAM H. MIBERSTROM tells from his book "Weather and the Ocean of Air," the story of a hazardous trip to 60,000 feet.

challenge was born in the air of the stratosphere.

"We looked upward and saw that the air had been cooled by the loss of the water vapor which had condensed on the surface of the clouds.

"Lindbergh still hangs in the air, but he is not alone. He is followed by a host of other men, some of whom are still in the air, some of whom are still on the ground.
