Meat Supplies

On Friday the Government of On Friday the Government of Kenya announced that there was a serious shortage of sup-plies of cattle, sheep and pigs and that requisitioning would be introduced if necessary. Meanwhile a return is being asked from all stockowners sked from all stockowners howing all slaughter cattle and heep they have on their farms t the end of November.

Available information suggests that the shortage is only tem-

sincep in the Colony control will have to continue, and its likely that the demand will grow rather than decrease.

The whole question is bound up with such complications: a disease and inspection. For instance East Coast Fewer and which had been delivered and which had been delivered and the consequence was a temporary shortage for a few days. The situation is also seriously influenced by the lack of rain. The condition of both cattle and sheep has been adversely affect of the control that the consequence was a temporary shortage for a developed read of the consequence was a temporary shortage for a developed read of the consequence was a temporary shortage for a few days. The solution of both cattle and sheep has been adversely affect of the control that the consequence was a temporary and the consequence greating and stock to the centrol under the control that the control th

many native flocks. Their quality is so poor that none except indian butchers can find a market for them. Native cattle too, are at present in poor condition. Pigs., which are not in short supply, have been making up the leeway

for a time but the demand has placed a strain on the numbers readily available for fresh pork. In a normal month under preent conditions the number of sent conditions the number of cattle required for beet purposes is between 6,000 and 7,000. In October the Control supplied for slopher in Nairobi, which in-cludes the Mombasa market, 4,500, Nanyuki 600, Eldoret, 500. Nakuru 400 and Isiolo 300. Of this total 6,300, the number of this total 6,300, the number of cattle condemned on inspection for measies and other reasons was 1,484. The percentage of condemned cattle at these slafightering points was as follows: Nariobi 24.65, Nanyuki 8.92, Eldoret 3.33, Nakuru 15.64, Isiole wii 1. 8.92, Eldoret 3.33, Nakuru 15.64. Isiolo nil. In some cases the percentage of condemned cattle is as high as half the number is as high as half the number state of the property of the pro

shortage. During the past week forty five per cent of the native cattle that came in were condemned, mainly for measles. That situation cannot continue. The whole question of the inspection of .cattle should be studied. If the present short studied, If the present short with the condemned of the present short of the condemned when the shortage. During the past week 893/41 fro toll of poor quality stock to meet normal needs. The elimination

normal needs. The elimination of measles is a long-range policy but the problem must be resolutely, approached at once. There are reasons other than measles why cattle 'delivered to the Control do not reach the market. If a mob after a railway journey develops a feverish condition, that is a reason apparently for condemnation also. The the Control do not reach the control which javes market. If a mob after a railway journey develops a feverish condition, that is a reason apparently for condemnation also. The great arises with their Control, unfortunately, cannot see had supplies thousands of the control.

Available into the control, unfortunately, cannot as supplies are arriving this week stook. There are very few fundamental and the called on to make a lengthy searche. But there are some problems arising which will require close attention before the meet supply situation is stabilised. Control of beef and mutton was introduced in July, 1990 to freely to the Control's buyers a consure distribution to the evil and military population, and the demand has since been greated in the control of the cont

#### How to take care of your tyres

IN THIS MECHANISED WAS tyres are a valuable part of our national assets and must be saved. Take care of your tyres and help to cut down the import of, raw materials used in new tyres. Here are a few hints on how to preserve your tyres, thereby obtaining greater mile-age and longer life.

Test tyre pressures

No. 1. The most vital factor is the maintenance of the correct air pressure in the inner tube. Check this at least once a week Haulage contractors doing regular long distance work should do it once each day. Examine the valve cap and core, and see they are atright.

Remove flints

No. 2. Minor injuries will develop into major ones if fieglected. Remove fiints, smilal mals or pleces of alsas before they have time to injure the cord body of the tyre Smill cuts should be filled with tread-filler which is gelf-

Overloading or under - in flation

No. 3. Overloading does not pay in the end. It can quite easily cut down the life of your tyres by as much as 50 per cent.
Under-Initation is also very detrimental to a tyre.

Mechanical condition of

your vehicle

your venticie

No. 4. Worn king pins,
faulty brake drawns,
binding brakes, wheels out of
alignment and baddy-fitting or
bent rins will rob you of
housands of tyre miles. Notice
how your tyres wear. If there
is unevenness, feethering and
lumpiness, check the above
mechanical points.

o the Editor, "E.A. Standard"
Sir.—Now that the fighting is over
East Africa, con't you think it
ould be a good gesture if His Exdillency preclaimed a public holiday
and Saturday, December 27 would
a multiple des-

beigt those men of military age not out it is aver their consciences, the same as the Town Guard did in the last war—and also, as thus, to the last war—and also, as thus, to soldier settles and proceed and soldier settles of the last of the coing? The Town Guard and similar onits last war perticipated in the Soldier Settler draw for land and Soldier Settler draw for land and other from the last receiving guards.

Why are we so lenient with it Austrians? They, like the Italian are stabiling us in the back. The are even being sent to Libya to it and kill our boys there. Surely a Austrians should be freated as enem subjects.

Yours etc.

of war. Suit much can be doted.

There is the story told to the Eart street war to the control of the control o men a native reserve or administrative centre. But this is when the has to say: "I have found the experiment of members and the experiment of members and the experiment of members and I me going to try to get a men in the thrites. One is aliebility so far as money payment is concerned is limited to are men in the thrites. One is the fixed sum of either five a wheelvright and bale-kountit, the other is a mechanic and the members of the three some three ways and the triple and the triple and the triple and the triple and the very difficult to talk to them—that is I think the greatest difficulty—but they have been members and the contract. #### How to take care of your tyres

IN THIS MECHANISED WAB tyres are a valuable part of our national sasets and must be saved. The cuter of your tyres and help to caure of your tyres, and help to deep the tyres of the tyres. Here see whith on how to preserve your tyres, thereby obtaining greater mile-age and longer life.

Test tyre pressures

No. 1. The most vital factor is the maintenance of the correct air pressure in the inner tube. Check this at least once a week. Haulage contractors doing regular long distance work should do it once each day. Examine the valve cap and core, and see they are sirtight.

Remove flints

No. 2. Minor injuries will develop into major ones if neglected. Remove flints, small nalls or pieces of glass before they have time to injure the cord body of the tyre. Small cuts should be filled with read-filler which is self-vulcanising

Overloading or under - inflation

No. 3. Overloading does not pay in the end. It can quite easily cut down the life of your tyres by as much as 30 per cent. Unider-inflation is also very detrimental to a tyre.

Mechanical condition of your vehicle

No. 4. Worn king pins. binding brakes, wheels out of alignment bally-fitting or best of the control of the cont

Longer tyre life

No. 5 Furious and care off your tyre treads quickly and ruin, your caings. Bumpin against kerbs, and running over pot-holes and other obstruction medium.

#### How to take care of your tyres

IN THIS MECHANISED WAS
tyres are a valuable part of our
national sasets and must be
saved. Take the of your tyres
and help to cut of the more
of raw materials used in new
tyres. Here are the the thing to
how to preserve your tyres,
thereby obtaining rather milesage and longer life.

Test tyre pressures

No. 1. The most vital fa-is the maintenance the correct air pressure in inner tube. Check this at le once a week. Haulage contra-
