THE FRIDAY MISCELLANY

An evening full of surprises was in store for many people who attended the first Kenya Press Ball at the New Stanley Hotel on Thursday night.

With a program that was overflowing and a foyer littered with gifts which were to be the envy of many a girl, the evening was a success. It looked as if every body brought a gift to the party but this was not the case. There were some special prizes which were given to the winners when guests opened envelopes in the hope that they would be found with their names on them.

For instance, Mr. and Mrs. J. F. Maxwell from Napier won a lovely old gold and black patterned silk dress and a pair of shoes. Mr. and Mrs. J. F. Maxwell from Napier won a lovely old gold and black patterned silk dress and a pair of shoes.

THE ECONOMIC PLIGHT OF JAPAN

CHESTER WILMOT, Military Correspondent of the 'Observer', who has been revisiting Far East, contributes his second article on present-day Japan.

Japan's economic situation is a subject on which the people of Tokyo are generally well-informed. They have taken to heart the lessons of the "war" and are determined to avoid the mistakes of the past. Today they show no inclination to make the responsibility of standing on their own feet.

Japanese people have no "resigned" spirit. They are determined to win the military defeat and the economic depression, and they have succeeded in doing so. The United States and other nations have taken advantage of their weakness and have made demands which they find it difficult to meet. They are determined to stand on their own feet.

Pride saved

It is in this regard that the Japanese have shown their pride. They have refused to accept the terms of the Potsdam Declaration and have insisted on their own terms. They have shown a determination to stand on their own feet and to rebuild their nation on a basis of self-reliance.

At the war, the Japanese people were determined to win. They were determined to stand on their own feet and to rebuild their nation on a basis of self-reliance. They were determined to avoid the mistakes of the past and to build a new Japan for the future.

No export drive

Publicly the Japanese government has announced that it has no intention of making a drive to increase its exports. It has announced that it will continue to stand on its own feet and to rebuild its nation on a basis of self-reliance.

Inflation

The present concentration on the domestic market, particularly in the case of export goods, is a factor in the inflation which is being experienced in Japan. The government has announced that it will continue to stand on its own feet and to rebuild its nation on a basis of self-reliance.

Short of power

There is a short of electric power in Japan, particularly in the case of the industrial areas. The government has announced that it will continue to stand on its own feet and to rebuild its nation on a basis of self-reliance. Mr. Breyer is a young man who has been in the security of a soldier's office for a number of years. He has been appointed to the position of a special agent in charge of the investigation of the activities of the Japanese in the United States.

BRITAIN'S POCKET COLONY

ONLY four and a half hours by air from London lies the strangest colony in all the British Commonwealth—a colony well known to thousands of British troops who served there in the war years or stopped while at the battle on their way to the battle-

fields further eastward. Nowadays Gibraltar is the scene only when agitators, in Madrid demand Gibraltar's return to Spain. Historically, France's claims to Gibraltar are far from convincing. His country ruled over the Rock for 243 years; now the Rock is almost 200 years old. Gibraltar is to be handed back to Spain, yet not to give up its name. After all, it is in the Moors. After all, it was theirs for seven and a half centuries!

All imported Gibraltar today and in the Campo area of Spain is a political hotbed. From Madrid very much of the British left the Rock. Franco would immediately have a major financial crisis on his hands. Every day 10,000 Spaniards stream across the frontier to the Campo area of Spain. They would not stay in a month if they could. In the Campo area a living in the Campo is a living in the Campo. They can buy coffee and food unobtainable on the mainland.

There is little elbow room for building up dwellings. The people are being housed from above in the old city under the war.

AS for the Sportsman of the Year, he has struggled gamely against keen competition from the politicians and has held his own remarkably well.

WALTHAMSTOW AVENUE, only amateur team left in a full-blown relay on Wednesday by Liverpool Technical in the Division III (B) of the game a few minutes from the end. The football moment was high in excitement.

So ends another match attended by the citizens of the Walthamstow Athletic League and the Walthamstow Football Club, who were the victors, notwithstanding the League plants.

Notwithstanding the London great tradition as Cup holders, last year they created the excitement of the season and gave another year to the Walthamstow when they got through to the 1924 Round, and they nearly Manchester United to a draw at Trafford before being down 2-1 to the meet at Highbury.

To meet again

Highgate and Waltham have still to decide their tie in an early match on Saturday. They will play each other on Saturday, and will meet again on Saturday, and will play each other for a total of three times.

CENSURE MOTION ON AFRICAN AFFAIRS FAILS

Socialists attack Minister 'Set light to tinder'

THE House of Commons rejected by 301 votes to 273 a Socialist motion of censure on the Government for the handling of British Colonial Affairs in Africa. During the debate, Mr. James Griffiths, a former Socialist Colonial Secretary, accused his successor, Mr. Lytton, of setting light to the tinder in the African Colonies. Mr. Griffiths was supported by the Opposition motion of censure, which was carried by a majority of 301 to 273. The Government's handling of Colonial Affairs in Africa was the subject of a large section of the nation fell in increasing anxiety about the position in the African Colonies. Many Socialist members felt that something should be done to stop what they saw as a drift to disaster in Africa.

Consequences may be calamitous

"Our case against the Government is that it has allowed the African affairs during a crucial African year to become a cumulative effect of increasing and extending disaster. It has now reached the stage where it must be taken to heart if otherwise it may have serious consequences for the African and for us."

Failure to face human problem

"The major charge against the Government was its failure to face the human problem of the situation. The problem of capital investment, the rise of living standards and the provision of education and other social services."

Ministry, fear and anxiety

"The African objected to that Africa was under a match had been dropped in the tinder. They were minister, fear and anxiety. 'A Secretary of State who drops matches in that tinder is one who should have every right to be anxious,' he added amid cheers."

Self-government a common aim

Mr. Lytton, replying, said that the problem of the African was far transcended and he declared the "sincere" tone of his personal speech. "It is an appeal to risk a share with my fellow-countrymen when I think the cause is just, it is very easy to favor it on one side by favoring it at the expense of the other."

Danger of Kenya campaign

In Kenya, where a campaign against the Mau terrorists was going on, there was one possibility which should have been sought to avoid "the danger of"

Western view at British United Empire, the greatest country in Africa not only in the world but also in the continent of Africa. It is the only African country which has not been divided into provinces. It is the only African country which has not been divided into provinces. Confidence in Mr. Lytton

Mr. Lytton, replying, said that the Government was confident in the future of the African Colonies. He said that the Government was confident in the future of the African Colonies. He said that the Government was confident in the future of the African Colonies.

12,000 AFRICANS IN KENYA'S PRISONS

The Colonial Secretary, Mr. Oliver Lytton, said today that there were now some 12,000 Africans in Kenya's prisons. He said that the number of Africans in Kenya's prisons had increased since the start of the Mau Mau rebellion.

Opinion inflamed by propaganda

"We might easily have named any other of the African States which have been passed through the same process of propaganda as Kenya. It is the opinion of the Government that the propaganda is the cause of the trouble in Kenya."

Rehabilitation

Mr. Lytton pointed out that the Government was doing its best to rehabilitate the Mau Mau rebels. He said that the Government was doing its best to rehabilitate the Mau Mau rebels. He said that the Government was doing its best to rehabilitate the Mau Mau rebels.

Where we lead—prosperity follows

Agricultural lands and mineral deposits of considerable promise await development in the Southern Province of Tanganyika. To open up this potentially valuable country new lines of communication are being built.

Already taking shape at Mtwara are new deep water berths which will permit ships of the largest size to serve a new railway line into the interior.

The new line will run from Mtwara Port to Lugusini Junction, a distance of 200 miles. Eventually it may be extended still further inland to provide an outlet for the newly discovered coalfields at Songea or even on the shores of Lake Nyasa.

Over this line and out from the port will flow, in due course, a mounting volume of exports; for where the East African Railways and Harbours leads the way, prosperity will surely follow.

TALKING OF CHILDREN

By Mollie S. Patton

WHEN Mrs. Louis M. Hilde, Jacobs, known as the grand old lady of Wandsworth, Australia, died recently at 83, she left nearly 170 descendants.

A lady child of Shropshire, England. The marriage at 11 years of age, had a child before her. Her second year was married when quite young with the result that Lady Child was a grandmother at 21.

Just before World War II she was an even more striking one in Poland. Kasper, her husband, was killed in action and she was left with a young son and a young daughter.

Although this was a great record, it still has its limitations. It is still the record of Mrs. Hilde, Jacobs, who died at 83, she left nearly 170 descendants.

Women do not hold all the records, however. A short time ago, a woman in England was married when quite young with the result that Lady Child was a grandmother at 21.

Just before World War II she was an even more striking one in Poland. Kasper, her husband, was killed in action and she was left with a young son and a young daughter.

But even this was eclipsed by Lady Temple of Eborac, who died at 102. She had given birth to 22 sons and 22 daughters, and lived to see 100 of her grandchildren.

As for the oldest British father of recent times, it was undoubtedly Mr. George Smead, of Norfolk, who at the age of 103 was the father of three children — one aged 65, another aged five and a small daughter of two. Tom there

was the New James Smith, of Virginia, U.S.A., who was so young when his wife presented him with a young child, that he was 102 his wife gave birth to her son.

World's youngest probably the world's youngest grandmothers

ROSABEL WALKER of Sotik describes a visit she made to the Kericho Estates stables of Captain T. N. Derby and tells the story of

Four Gentlemen of the Turf

To how very few of us it is given to make history Captain T. N. Derby of Kericho, can most certainly claim to have made Turf history in East Africa with his remarkable record for the year 1952, when, with his stable jockey Arap Mosa, and those equine gentlemen Frust Moon and Ben Hur, his name headed the list in the Turf Statisticians' Winning order and trainer, winning sire, winner of the greatest prize money, and all from one stable, is a record likely to remain unbroken for a long day, and perhaps for ever.

It was my privilege recently to be taken round the Kericho Estate stables by Captain Derby, the only boy on a most delightful day being that he had not had one of his girls to the great horses in training at present.

GROWTH OF AVIATION IN EAST AFRICA

From one plane 25 years ago

Nowadays it is a daylight hour plane with East Africa. In the 25 years since the first powered aircraft was made in 1783, the aeroplane was still a novelty in the three Territories.

The first powered plane was taken out of the workshop of the American inventor, the Wright brothers, on December 17, 1903. It was a small, two-seater, biplane, with a wingspan of 120 feet, and it flew for 29 minutes over Kitty Hawk, North Carolina.

The Royal East African Air Force Club has been reported to have been organized in the Club.

Club founded

With the advent of the R.A.A.F. flight instructor, and the formation of the Club, the growth of aviation in East Africa has been rapid. The first flight was made on January 1, 1934, by the Transport Advisory Council, which has since then been the mainstay of the aviation movement in East Africa.
