SAVE SHIPPING One of the weaknesses of British propaganda is that women are in a difficulty, or are called upon to face a new danger, somebody always begins to lay off the increased burden by telling us that the enemy cannot stand the pace. There are innumerable examples. They were particularly prominent in our propaganda during the months of "phoney" war which preceded the German invasion of the small neutral countries of Europe.

By—going without things which are transported across the sea. Every day every overseas Government should be scrutinizing the list of imports to see whether we are wasting this infinitely precious space in our ships. For, after all, this is a matter of State policy, and if the State leads, the people will gladly follow. But even if the State does not lead, the individual can practice self-denial. People overseas, away from the war zones, ask what they can do. There is one very important way in which everybody, without exception, every race and community, can help saving shipping space should be with us all a matter of personal pride.

# WEAPONS Methods in Britain's War Factories

[FROM A SPECIAL CORRESPONDENT]

London. The time has come to tell the world the wartime operations of Britain's factories. It will be revealing because it will show how workers and owners alike are working together to win the war.

It is not only the fact that they are working together, but the fact that they are working together in a way that is new. It is not only the fact that they are working together, but the fact that they are working together in a way that is new. It is not only the fact that they are working together, but the fact that they are working together in a way that is new.

Workers work on target. By means of a suggestion scheme, workers in this factory have been encouraged to suggest methods of increasing production. Any suggestion which would improve the factory's output is given an adjustment to the work of the factory.

Particularly interested in the fact that the workers in this factory are working together in a way that is new. It is not only the fact that they are working together, but the fact that they are working together in a way that is new.

It may be a long time before the workers in this factory are working together in a way that is new. It is not only the fact that they are working together, but the fact that they are working together in a way that is new.

It is not only the fact that they are working together, but the fact that they are working together in a way that is new. It is not only the fact that they are working together, but the fact that they are working together in a way that is new.

BUY AN EMERGENCY FLASK OF E. K. GREEN'S

IT'S OLD AND GOOD, A Plank of Brandy is always hard, but see that you get "APOSTLE", It is so much better and costs no more because we are the actual producers.

TOO TIRED TO ENJOY A REST?

How do you feel towards the end of the day—wage to get the waking-up done and tuck the kids into bed? Looking forward to a cheerful evening with the radio? Or do you flop into a chair too worn out to enjoy your rest, and find yourself dozing to the music? This isn't right! Do you know what is wrong? It is probably constipation. You may be "regular," still, it's probably constipation. Elimination must be complete as well as regular. If it isn't, poisons get into the blood, cause vague lack of well-being. For this there is a simple, honest prescription—Kruschen's. It isn't a drug, or a patent medicine, or a pill, or a fad; it's a British institution. Doctors have prescribed it these fifty years past, for the analysis on the bottle tells them that could prescribe nothing better. It comes with their medical knowledge. And Kruschen's Sales will agree with you.

DR. KRUSCHEN'S ALL THE BETTER FOR A PUNCH, KRUSCHEN'S ALUM POWDER.

DR. SEQUEIRA RETURNING TO ENGLAND

DR. SEQUEIRA was the sixth generation of doctors in a direct line in the family, entered the London Hospital as a student in 1914. Here he met his future wife, Mrs. Sequeira, who distinguished herself as a nurse. He married her in 1917. He was advised to return to Kenya and set up a dispensary in 1919. He was appointed to the Prince of Wales Dispensary in 1922. He is a highly specialized methods of diagnosis and treatment which are now regarded as common. He appreciates that for years he has had light on a common disease, those talented men who worked upon the original cases, which give us these advantages.

In 1922 the Government was appointed Physician to the 2nd Department of the London Hospital, where he remained in charge until 1927. He was advised to return for reasons of health and came to Kenya in 1928. There he was available to the public. He has since used many highly specialized methods of diagnosis and treatment which are now regarded as common. He appreciates that for years he has had light on a common disease, those talented men who worked upon the original cases, which give us these advantages.

Dr. Sequeira is an acknowledged expert on the diagnosis and treatment of syphilis and the venereal diseases. He has written a book on his classical text-book on diseases of the skin. At the time of his retirement Dr. Sequeira was a member of the Council of the Royal College of Physicians and President of the Dermatological Section of the Royal Society of Medicine. From 1917 until about the time of the outbreak of the present war, Dr. and Mrs. Sequeira lived at Makuru, where their twelve farmed coffee. They made a place for themselves in the community with skill and easily he filled. Recently they have been acting as Consulting Dermatologists and have been required to be near the center of things.

Throughout his stay in Kenya Dr. Sequeira has taken an active part in matters connected with his profession. He has organized wheelbarrow with the Medical Department and has been ever his wide experience could be of use in any emergency. He has been Editor of the East African Medical Journal and has been a member of the Council of the British Medical Association (Kenya Branch) of which body he was President from 1929 to 1932. He has been largely for medical reasons. Dr. Sequeira is a man of high character and has been privileged to call him "bosch" his going a long way to those who were worked with him as a colleague. His departure will mean a serious professional deprivation and all who have known him will wish him well. His condition is clouded by an old-world country (now, alas! seldom met with) and by a degree of modesty which has prevented the understanding from recognizing in him the master that he is. Let one who was privileged to be student doctor to all of the feet of Gamaliel, vice the good wishes of friends and acquaintances and to give a safe voyage and peaceful, happy evening to a long life spent in the service of humanity.

APPEAL TO AMERICA'S FACTORY WORKERS

"Idle Tools Work For Hitler" - In a broadcast from March 11, Donald Nelson, America's War Production Chief, told factory workers: "We must be sustained by the spirit of attack. We have been on the defensive long enough. Attack begins at home on the production line." Calling for a 10-hour production drive, Mr. Nelson said: "I am thinking of the 100 per cent of the war plants operating only five days a week and of the many plants which are shut down. The tools work for Hitler." Mr. Nelson declared that American Labor & Management were on trial and added: "It has to be a get tough with ourselves before we get tough with Hitler." He stated that there were many labor problems to be solved but he knew the American public was alert and not asleep to this danger.

Members of Parliament know there was a shocking story to be told but they were not prepared for all these horrors. (Continued)

**NOTICE**

Sir Stafford Cripps is no stranger in India or to the members of the Indian people. His political creed of practical Socialism, his courage in the public arena, his wide and inclusive outlook, his impatience with much that cumbers the ground over which the Empire is treading painfully today, his victory are personal characteristics which have already established a common basis of friendship between him and the leading figures in India's political life.

The problem of India cannot be solved by a mere compromise between him and the leading figures in India's political life.

# SPINNING AND GONGING A YOUNG KENYA INDUSTRY

from a broadcast talk by MRS. CLAUDE REYNARD

IN a recent broadcast talk, Mrs. Claude Reynard of the Kinangop told interested about the newest Kenya industry—spinning—and explained why it is so widely being taken up and how it is being done. She said: First, why? Normally we import all our worsted, jennet, and other wools from overseas. Now, however, we have a source of supply—England, Holland, Belgium, France, Australia—very close to our borders. Our country offers many advantages for spinning. For instance, our climate is ideal for spinning. Our wool is of a high quality and our shepherds are experienced. Here in Kenya we have the raw materials—wool as we do about 1000.

We can do two things we can spin derivatives and get the native spinning. I can give you a good example. I can give you a good example. I can give you a good example. I can give you a good example.
