# ALVING THE PART-TIME PROBLEM

As still a large reserve force is available, the problem of the part-timer is not so acute as it has been in the past. The difficulty of finding a job for a part-timer is not so acute as it has been in the past. The difficulty of finding a job for a part-timer is not so acute as it has been in the past.

As another detail of the problem, it is worth noting that while the part-timer is not so scarce as he once was, the full-timer is not so plentiful as he once was. The part-timer is not so scarce as he once was, the full-timer is not so plentiful as he once was.

As to the solution, the work is being done. The work is being done. The work is being done. The work is being done. The work is being done. The work is being done.

WHY NOT?

It is difficult to know what can be done about it at the moment, unless subsidies can be found, but the Government has made a start in the direction of solving the problem.

FOUR YEARS' EXPERIENCE

After four years work we have received the following testimonial regarding our plant for the STEAM HEATING OF AIR FOR TEA DRYERS.

We have now had four years' experience of the Steam Heating Plant supplied by you for our Factory, and the enclosed figures, prepared by the Garden Manager, show that in comparison with the four years previous to this installation there has been a reduction of over 50% in the total fuel consumed, and that the "all steam" system power and drying has been provided, with less fuel than was previously used for drying only.

The plant has proved highly satisfactory in service, and has given no trouble in regard to working or maintenance, while the elimination of Dryer Snow and Chimney renewals is an additional saving of considerable importance.
