How to get the most from your Precious Pond's Creams

1. IN THE MORNING: After your face has been washed with cold water, apply a thin layer of Pond's Cream to the face and neck. This will help to remove any impurities and leave the skin feeling fresh and clean.

2. AT NIGHT: Before going to bed, apply a thicker layer of Pond's Cream to the face and neck. This will help to moisturize the skin and prevent it from becoming dry and flaky.

## The Way to Beauty with YARDLEY

God created man a little lower than the angels, and with certain characteristics which distinguish him from the beasts. The purpose of God in creating man was to give him a share in the dominion of the earth. He has given him a mind which is capable of understanding the will of his Creator, and a body which is capable of feeling the pleasure and pain of his existence. It is the duty of man to use his mind and body in a way that will bring him glory and honor to his Creator.

**FARMING COSTS**  
 To the Editor, "E.A. Standard"  
 Sir—Before a permit was required to purchase cotton seed, a large quantity was obtained at 40/- per ton, now the seedling commodity must be obtained at 40/- per ton, K.C.A. at 30/- per ton. It is already to be understood that the Government of Kenya is to be required to return seed to Uganda at a rate of 10/- per ton, which is a very high price for a seedling commodity.

## NEW RUSSIAN REINFORCEMENTS SOVIET TROOPS GERMANS ATTACKS

October 16.—The Russian front (see Veritas in its commentary). The more one ponders over Hitler's persistent pressure against Stalingrad, Moscow and Leningrad, the more probable it appears that he has not lost his nerve in the winter months. Some time ago the Communist propaganda machine issued a report that the German oil reserves acquired throughout 1942, less the present stock of supplies, had been maintained in 1943 unless a fresh source of supply was secured. In his recent speech Goebbels remarked when in due course the thrust into the Caucasus has been carried out, we shall have in our hands Europe's richest oil region. We possess, said he, oil from Azerbaijan and in addition, the strongest German forces in Azerbaijan. It is a strategic threat, Hitler is declaring, that three things are vital to Germany: the oil fields in Azerbaijan, the Caucasus and the Black Sea. The first is a strategic proposition, that it is not impossible, given the necessary concentration of troops and the aid of the Luftwaffe, to capture the oil fields in Azerbaijan and in hand-to-hand fighting to capture the Caucasus and the Black Sea. The second is a strategic proposition, that it is not impossible, given the necessary concentration of troops and the aid of the Luftwaffe, to capture the oil fields in Azerbaijan and in hand-to-hand fighting to capture the Caucasus and the Black Sea. The third is a strategic proposition, that it is not impossible, given the necessary concentration of troops and the aid of the Luftwaffe, to capture the oil fields in Azerbaijan and in hand-to-hand fighting to capture the Caucasus and the Black Sea.

### GRIM AND STUBBORN STRUGGLE AHEAD Further Advance

October 16.—The British 8th Army in Egypt has gained further momentum in its attack upon German positions in the West Nile Delta. The advance is being maintained by a steady flow of reinforcements from the Mediterranean. The 8th Army has been fully supplied with munitions and has been able to maintain its offensive. The German positions are being steadily eroded and the British are making further gains. The advance is being maintained by a steady flow of reinforcements from the Mediterranean. **1-Top Light for Premier**  
The Commission of the International Labour Office has issued a report on the conditions of work in the iron and steel industry. The report states that the industry is characterized by long hours of work, high temperatures, and noisy conditions. It recommends that employers should take steps to improve the working conditions, such as providing better ventilation, reducing noise, and limiting working hours.

**NINE OUT OF TEN**  
Men who have been employed by the same firm for more than nine months have a much higher percentage of accidents than those who have been employed for a shorter period. This is because they are more familiar with the machinery and the work environment. Therefore, it is essential for employers to provide proper training and supervision for all new employees, regardless of their length of service.

**Comments on the Labour Troubles**  
Premiers and Ministers are discussing the current labour troubles. The situation is complex, with many workers demanding better pay and conditions. The government is trying to mediate between the workers and the employers, but it is facing significant challenges. It is clear that a long-term solution is needed to resolve the labour issues.

**FARMERS IN GOVERNMENT**

The Editor, "The Standard," Nairobi.

Dear Sir,

I am writing to you regarding the matter of the Government's policy towards the farmers in the Narobhi District. I am sure that you will be interested in the views of the farmers on this subject.

The farmers in the Narobhi District are suffering from the effects of the Government's policy. They are being forced to sell their produce at low prices and to pay high taxes. This is making it impossible for them to make a living.

I am sure that you will be interested in the views of the farmers on this subject. I am sure that you will be interested in the views of the farmers on this subject.

### THE AIR WAR:

## Fighter 'Planes' New Role

### DEFENCE TURNS TO SWIFT ATTACK

(By Wing Commander L. F. Fraser.)  
The modern fighters which represent the most advanced form of light aircraft, the new fighters, are now being used in the Middle East. The few experienced there are in this capacity, they are being used in a way which they have never before. They are now being used as interceptors in the Axis concentrations and aerodromes. The effect of such attacks on convoys and collections of Axis vehicles, when including a bomber, was considerable; they are also being used to intercept Axis supplies and seriously interfering with Axis communications. The effect of such pressure will not doubt become more apparent as the new Middle East conflict develops.

**On Convoy Now**  
This all marks an interesting change from the rôle of the war, when fighter aircraft were primarily used in defensive warfare against the Luftwaffe. The new rôle of the fighter's function, some of them have been used to cover over from the defensive to the offensive rôle. As an example, they were used to intercept Axis supplies which were being sent to the front. They were used to intercept Axis supplies which were being sent to the front. They were used to intercept Axis supplies which were being sent to the front.

**On Speed and Shock**  
The latest R.A.F. fighters are of the fire power. They possess one of the most powerful engines of their type. This, with low-level flying, makes them a most effective weapon. They are now being used to intercept Axis supplies which were being sent to the front.

## THRILL FOR TWO FRENCH CHILDREN

### They Received R.A.F. Message - Unofficially

(From Our Special Correspondent.)  
Antsirabe, (By Mail). You don't hear much about the Royal Air Force in Madagascar, but they are here with a vengeance. The few experienced there are in this capacity, they are being used in a way which they have never before. They are now being used as interceptors in the Axis concentrations and aerodromes.

**On Convoy Now**  
This all marks an interesting change from the rôle of the war, when fighter aircraft were primarily used in defensive warfare against the Luftwaffe. The new rôle of the fighter's function, some of them have been used to cover over from the defensive to the offensive rôle.

**On Accuracy**  
The latest R.A.F. fighters are of the fire power. They possess one of the most powerful engines of their type. This, with low-level flying, makes them a most effective weapon. They are now being used to intercept Axis supplies which were being sent to the front.

## TRAGIC END OF BEN FOORD

### Champion Boxer's Brief, Meteoric Career

(FROM A CORRESPONDENT.)  
According to the Pretoria Press there is no suggestion of foul play in the tragic death of Ben Foord, the famous heavyweight boxer. He was killed by a bullet which he received while on duty in the South African Air Force. He was a champion boxer and a meteoric career.

## The World-Famed Cuticura

### SKIN TREATMENT POSITIVELY HEALS

The wonderful curative power of Cuticura Soap and Cuticura Ointment are so well known that they need no further commendation. These medicaments penetrate to the depths of the pores and itching intensely. They kill the itching germ and eradicate the germs which keep the eruption in. They soothe the skin and soothe the itching. They soothe the skin and soothe the itching. They soothe the skin and soothe the itching.

**How to take samples of Dip Wash for Analysis**

The results of a dip analysis are necessary those of the sample deposit tank, the results of an analysis are of very little value as a means of regulating the strength of the dip wash. Accurate samples can only be taken from a well-designed tank. The sample can best be taken after a number of cells have been through the stirred with a plunger (to be made up in such a way that the sample will be worked up and down the whole length of the tank, and then run from end to end several times before sampling.

The sample must be taken in a clean bottle, which must be filled below the surface of the dip. Before filling the bottle it is important that it be blown out at least twice with dip wash to ensure that the sample is not contaminated. The bottle must then be corked with a stopper. At least a piece of cloth should be sent for analysis.

The bottle must be labelled with the name and address of the owner; the type of dip being used; and the dilution (i.e., whether 2, 4, 8, 16, or 32 times).

# Personally Speaking...

NEXT week, on Saturday, November 14, to be precise, there is going to be a most interesting and extremely unusual occasion. Between the hours of 6 and 6 p.m. the W.T.S. Men at Large, invited guests, anyone who is interested in learning more about this kind of thing is welcome to come to tea and see all about the building.

Especially, this is an excellent opportunity for those who consider working in the building industry. It is the first of its kind in the history of the W.T.S. Men at Large. This is a very special occasion, and it is one that should not be missed. The building is one of the most modern and most comfortable in the East African area. It is a very good example of modern building technique. The building is one of the most modern and most comfortable in the East African area. It is a very good example of modern building technique. # How to Overcome Fever Exhaustion

Doctors now know that the greatest danger in fever comes from the poisons in the blood. Fighting these poisons may leave every nerve and organ in the body exhausted.

Just when the body requires nourishment most urgently, the digestion is very often too weak for solid diet. What you need is a highly nourishing food that puts no strain on the delicate stomach. For that reason doctors prescribe Horlicks in fever cases.

From the first day on Horlicks you begin to recover. Horlicks is a complete, balanced food containing all the elements necessary to rebuild wasted tissues and flesh and muscle. It creates new vitality and health, restores robust health quickly. Get Horlicks today from your store, or chemist.

## HORLICKS hastens convalescence

## CIRCLE AND STALLS

The uniform has certainly changed recently, but it is still the same old uniform. It is a very good example of modern building technique. The building is one of the most modern and most comfortable in the East African area. It is a very good example of modern building technique.

Two late news weeks are allowed, and it is not yet clear whether the Government has decided to issue a new set of uniforms for the W.T.S. Men at Large. It is a very good example of modern building technique. The building is one of the most modern and most comfortable in the East African area. It is a very good example of modern building technique.

## How to take samples of Dip Wash for Analysis

The results of a dip analysis are necessary those of the sample deposit tank, the results of an analysis are of very little value as a means of regulating the strength of the dip wash. Accurate samples can only be taken from a well-designed tank. The sample can best be taken after a number of cells have been through the stirred with a plunger (to be made up in such a way that the sample will be worked up and down the whole length of the tank, and then run from end to end several times before sampling.

## Event And Opinion In The Union

**SOUTH AFRICAN SCENE:**

WITH most people's minds fixed intently on the battle to keep the Union together, the news that the country has voted against the Government has been almost entirely overlooked.

On the other hand, there is no sign that the country has voted against the Government's proposals for the extension of the franchise to the coloured people. It is a fact that the Government's proposals for the extension of the franchise to the coloured people have been almost entirely overlooked.

There is every reason to believe that the Government's proposals for the extension of the franchise to the coloured people have been almost entirely overlooked.

## District Farming Notes

**SOYABEANS**

The chief event of interest during the month of October was the visit of Captain McClelland, the Government Agricultural Officer, to the district to inspect the soyabean crop.

McClelland was accompanied by Mr. J. H. M. Nkomo, the District Agricultural Officer, and with him attended a meeting of the District Agricultural Council on Sunday, October 13th.

McClelland gave a comprehensive review of the progress of the soyabean crop in the district, and pointed out the many difficulties which are likely to be encountered during the next few months.

WHAT CAN I DO TO IMPROVE MY SKIN?

Excuse me—Inner Cleanliness comes first!

External skin treatment is good in its way but the real secret of improving your skin is daily inner cleanliness. Once you have attended to this with regular glass of Andrew's Liver Salt you will look and feel younger. Andrew's gently cleans away those filthy impurities which produce poor complexion, blotches, blemishes and indigestion by giving you complete Inner Cleanliness.
