SHORTAGE OF KEROL

We know that stocks of Kerol in East Africa are very low at present, but we are glad to be able to advise farmers that fresh supplies should arrive shortly.

The Kerol is the best advantage for internal purposes only. That will give farmers an opportunity of obtaining vital supplies for their animals. If you are accustomed to using Kerol for distilling and other external purposes, try Little's Plast for that in the meantime. Booklets on the uses of Kerol and Little's can be obtained from us on request.

PIGS: LIVE AND DEAD WEIGHT

To the Editor, "E.A. Standard," Nairobi.

After the outbreak of the pig disease in the Kenya Colony, the Government has been very busy in trying to control the spread of the disease. It is a pity that the Government has not been able to control the spread of the disease.

According to a statement by an authority on the subject, the live weight of a pig is about 100 lbs. and the dead weight is about 80 lbs. This is a significant difference and it is important to know the difference between the two.

On receiving the letter that the pig was dead, the farmer was very surprised. He had been told that the pig was healthy and that it was a good specimen.

It is a pity that the Government has not been able to control the spread of the disease. It is a pity that the Government has not been able to control the spread of the disease.

A GENERAL ELECTION

To the Editor, "E.A. Standard"

Sir—It seems a pity that the election of Nairobi South constituency which attended Mr. Vincent's meeting yesterday could not have been held on its own. It is a pity that the Government's general election policy is not more definite. It is a pity that the Government's general election policy is not more definite. No doubt, prefer one or two by-elections for advisory if it is the Government's policy. It is a pity that the Government's general election policy is not more definite. KILIMBAO MEETING

August 28, 1945.

To the Editor, "E.A. Standard"

Sir—Your report of the meeting last Friday appearing in yesterday's issue, contains an explanation on the subject of the election of Mr. Vincent as Member of Parliament for Nairobi South. From the report, it would appear that Mr. Vincent's election was the result of his motion in Council last August 19, 1945, when he stated that, as you know, the principle of the franchise was to be based on a basis of £250,000 has already been raised in Nairobi. It is a pity that it was not possible to have a general election at that time, as it would have been a great advantage to the community.

PROFESSIONING AND THE BLACK MARKET

August 28, 1945.

To the Editor, "E.A. Standard"

Sir—I beg to request that you kindly publish the following article in your newspaper. My copy of patience is full.

Before the Government begins to large the public faced with a rising cost of living, it is essential for the Government to take steps to reduce the cost of living. One of the most effective ways of doing this is by reducing the cost of the black market. The black market is a market in which goods are sold at a price higher than the official price. This is done by the seller who is able to obtain goods at a lower price than the official price. The black market is a market in which goods are sold at a price higher than the official price. THE AFRICAN'S MONEY

August 28, 1945.

To the Editor, "E.A. Standard"

Sir—In E.V.G. letter of the 24th August, you refer to the fact that the African is asked to draw the full price for his goods. It is a pity that the Government's general election policy is not more definite. It is a pity that the Government's general election policy is not more definite.
