from a well. It is a constant reminder

commodity, and that it is
worthwhile to pay for it.

Two Dutch Ports No Longer Used

A message received by the Netherlands Legation in Pretoria says that a Hollandian who recently returned to his country has reported that the ports of Rotterdam and Amsterdam are no longer used.

The conditions under which the German Air Ministry statement that the bombing of Rotterdam was so effective that the city is no longer used.

It was also stated that the Germans have now set the whole of the Netherlands on fire, and that the only way to escape is to go to the sea.

Similar statements are going on elsewhere, and it is feared that there is a serious danger to the quality for beyond those of any other part of the world.

PLANS FOR AFRICAN ADVANCEMENT

(Continued from page 3.) the desire to fill more Civil Service posts is widespread among African workers and should be encouraged by the Government.

In connection with Africans in other parts of the world, the number of skilled and semi-skilled artisans is very low, a situation which is regarded as a reflection on the educational system. There is wide scope for the employment of skilled African labour.

Too Many Domesticates. As in the case of the African labour in other parts of the world, the number of domesticates is too large. It is suggested that the Government should encourage the employment of African domesticates in the home.

Why put up with Backache. Many people suffer from backache due to the use of heavy lifting equipment. It is suggested that the Government should encourage the use of lighter lifting equipment.

TRADE IN REVOLUTION. The second step is to organize a system whereby African traders can buy goods at reasonable prices, but purchase must be supervised and controlled.

**FIRST STEPS IN BRITISH DEMOCRACY:
Material And Economic Progress
Of The African**

IN KENYA the African Agriculturalist has as yet neither the ability to plan his policy successfully nor the means of putting the effect of external factors. The foundations of world credit and money are so plain simple incalculable facts like thunderstorms and locusts; they are not the complicated nearly calculable mysticisms that they are to voracious contentists.

It is therefore necessary that the African general farming policy should be largely dictated by him. The foundations of his life in the Native lands, and with the progressive agriculturist, he cannot ignore the means to improve his standard of health, education, and general welfare.

During the last fifteen years, the Government's agricultural activities have been so varied that it is impossible to attempt to catalogue them. However, through the years the African grows up as a progressive farmer, and the quality of his crops has improved. It is not until a much more serious attention to crops than he has given to them that he can be said to be a progressive farmer.

Major progress has been made in the past few years. The Government has developed a system of extension work, and has set up a number of extension centres, and has also set up a number of extension centres, and has also set up a number of extension centres.

The landscape of the Native lands is changing. There are now many more of them, and they are being cut down for the planting of wheat, maize, and other crops. The Government is doing a great deal to help the African farmer, and is doing a great deal to help the African farmer.

As in the case of agriculture, the African farmer is not yet able to plan successfully, and the Government is doing a great deal to help the African farmer.

IT is in the midst of the Government's agricultural activities that the African farmer is doing a great deal to help the African farmer.

As in the case of agriculture, the African farmer is not yet able to plan successfully, and the Government is doing a great deal to help the African farmer.

DISTRICT FARMING NOTES

Sothi: Light rains have been received in the district, and the crops are doing well. The Government is doing a great deal to help the African farmer.

Lumbwa: The crops are doing well in the district, and the Government is doing a great deal to help the African farmer.

Trans Nzoia: The crops are doing well in the district, and the Government is doing a great deal to help the African farmer.
