Diet in Digestive Disorders

You can't lay up a sick stomach. Your body must be nourished even though solid food and many liquid foods cause pain and discomfort.

The problem has always been to find a food that soothes the inflamed stomach wall and provides all the nourishment needed for recovery. Doctors and nurses agree that Horlicks is such a food. It places no strain upon the digestion, but provides all the body-building elements that the weakened system needs...

Recipe for saving BOVRIL

A LITTLE GOES A LONG WAY

Just a touch of Bovril makes a wonderful improvement to the flavor of your coffee and enriches that goodness. We have analyzed the standard Bovril recipe and found that it is rather extravagant and you it was a wasteful economy. This will help you save any amount of money you may not be able to get it.

THREE SISTERS... Visiting Andy Gardner on the set at M.G.M. in New York. The girls are in the picture in the wardrobe before Andy was discovered.

REFLECTIONS FROM LONDON

Reflections in waiting come, on the bridge, in such a gradual manner that it is only gradually we wake up one morning and realize the real difference between now and then. It is especially true in the case of clothes and overseas readers may wish to know how things are at the present time and whether there is any attempt at fashion. Perhaps the "right" word at the moment is "conservative" rather than "fashion". All hair is dressed now or less in the same way as last autumn. The style being a half roll round the back of the head and a high collar in front. It is simple and easy for the "conservative" minded housewife and is generally favoured amongst the women in the Service.

Alert from individual houses, women and their hair in a high, leather hat with a wide brim and the most favoured—worn in a great deal of homes. In the summer months, they all wear light dresses with a short coat of contrasting colour. The latter is a very popular fashion, and the use of contrasting colors and patterns being constantly met.

WITH the few hours extra number of hours in the morning for the winter, the day is longer and the weather is somewhat erratic. Most of the women wear light-colored dresses, and the weather will turn warm. It is in the month of October that all these things are seen, and they are all seen very well. You can see a little short coat on all occasions. The majority of coats are of light colors, and the women are wearing them in a very smart way. They are all seen very well, and they are all seen very well.

IF you are in doubt as to what to wear, the best thing to do is to look at the clothes line. The clothes line is a very good thing to look at, and it is a very good thing to look at. The clothes line is a very good thing to look at, and it is a very good thing to look at. The clothes line is a very good thing to look at, and it is a very good thing to look at.

circle and stalls

It is in the circle of the stalls, which is a very good thing to look at, and it is a very good thing to look at. The circle of the stalls is a very good thing to look at, and it is a very good thing to look at. The circle of the stalls is a very good thing to look at, and it is a very good thing to look at.

GENERAL MONTGOMERY

Tells the proud story of his Unconquerable Eighth Army

This is the text of a talk by General Montgomery to the boys of Ardenborough School...

I am going to talk to you about the war... the most important thing...

There are three broad principles which I want to see you understand... the first is that the British Army...

The second point is that when we are fighting a battle we must always be on the offensive...

The third point is of great importance... we must have the initiative...

The problem at Alamein was to break through the German line... the British Army was to drive the enemy back...

The tactics of the battle of Alamein were to make a deep wedge in the enemy's line...

The Pursuit Stage... the main thrust was made in the north...

Then the great pursuit began... the British Army was to drive the enemy back...

The main tactics of the pursuit were to drive back the enemy's front line...

Finally, we must come to Tripoli... the British Army was to drive the enemy back...

The main feature must be an offensive movement... the British Army was to drive the enemy back...

very good eye for country and for the fact that it is a military general...

The third point is his complete and absolute confidence in the British soldier...

Now they differ... the British soldier is a very good eye for country...

The German soldier cannot stand up to really heavy concentrated artillery fire...

I would say that the chief difference between the German and the British soldier is that the German soldier...

He offered a great deal from the point of view of the soldier's morale...

Of all the soldiers of any nation, the British soldier is the best...

The British soldier is a very good eye for country and for the fact that it is a military general...

ROTARY ANNS ANTI-WASTE DEPT.

To the Editor:—S.A. Standard.

It is a pity that the general public is not fully advised of the importance of the anti-waste campaign. The Rotary Anns Anti-Waste Dept. which for one year has been working with each of the 1000 clubs in the country, has now issued a leaflet for the household habits of British, under the direction of Mrs. Ann Dorman, is shortly to be published.

This decision should be viewed with much more consideration, and it is the serious danger of cutting out materials that have been used in the past that is the cause of the waste. It is not only the materials that are used in the past, but also the materials that are used in the future. It is not only the materials that are used in the past, but also the materials that are used in the future.

HAND - DRESSING

There are often found in situations which are not easily noticed by the dipping solution when animals pass through the tank. These ticks are very small, but their tails and heads are large, and they are very difficult to see. It is attention is paid to these ticks immediately after dipping, they may continue to feed and possibly infect the animals with some deadly organisms. The purpose of dipping will thus not be fully achieved.

COOPERS CATTLE TICK GREASE is an excellent hand-dressing material. It is particularly useful for dipping cattle as it is non-poisonous and can be applied to the most tender parts such as the eyelids, without causing irritation.

TREES AND TIMBER

by C. J. LOYD

I WRITE this article in the firm conviction that much of our country's forestland is seriously conserved. The trees are not only being cut down, but they are being cut down in a way that is not only wasteful, but also dangerous. The trees are being cut down in a way that is not only wasteful, but also dangerous. The trees are being cut down in a way that is not only wasteful, but also dangerous.

KENNEL NOTES

By MARGARET COLLYER P.O. Dog

I HAVE just had a reminder of a dog I once owned. It was a very good dog, and I was very fond of it. It was a very good dog, and I was very fond of it. It was a very good dog, and I was very fond of it.

A GOOD many dogs have been seen in the streets of Nairobi. These dogs are of various breeds, and some are very well kept, while others are very poorly kept. It is a pity that so many dogs are not properly cared for.

The Police V.O. recently announced that the one-eyed pointer dog, which was found in the streets of Nairobi, was a very good dog, and I was very fond of it.

Primary needs first! Embrace healthy teeth and sound gums. SR TOOTH PASTE. ERASMIC SHAVING STICK.

LUWISA
The first rains last week, which were very much needed, have done much to relieve the drought conditions. The crops are beginning to grow, and the animals are starting to fatten.

BAD DAY FOR THE CARPET

Some time ago a pile of chaises undulated through the Cathedral of the civilized capital at the story of the Tuscan Professor who approached the Führer with a revolutionary scientific proposal. This Professor had perfected a process for obtaining a palatable butter from the cream derived from the milk of cows.

Happy we are in this favored corner of the globe are not depicted to live under the unappetizing tyranny of the cream and the chemical substitute. Take Rose's Lime Juice, for example. Rose's is not made from the juice of limes. It is the juice of limes. Ripe fresh squeezed which grow on real trees. Ripe fresh squeezed which grow on real trees. Ripe fresh squeezed which grow on real trees.

Now you know why Rose's has such a successful record. It is not only good for the stomach, but it is also good for the teeth. It is not only good for the stomach, but it is also good for the teeth.
