Workers' Union Accus Hospital Committee's Report

The Workers' Union has received a report from the Hospital Committee which accuses the Union of being responsible for the strike at the Victoria Hospital. The report states that the Union's actions have caused a serious shortage of medical staff and have resulted in the hospital being unable to provide adequate care for its patients.

The Workers' Union has responded to the report by stating that the strike was a result of the hospital's failure to provide adequate working conditions for its staff. The Union claims that the hospital's management has been negligent and has failed to take any steps to improve the situation.

The Hospital Committee has rejected the Union's claims and has stated that the strike was a result of the Union's own actions. The Committee claims that the hospital's management has been diligent and has taken all necessary steps to ensure the hospital's continued operation.

The Workers' Union has announced that it will continue to support its members in their struggle for better working conditions. The Union claims that it will not be deterred by the Hospital Committee's report and will continue to fight for the rights of its members.

The Hospital Committee has announced that it will continue to provide the highest quality of medical care to its patients. The Committee claims that it will not be deterred by the Workers' Union's actions and will continue to work for the benefit of the community.
