UGANDA BANS JAP IMPORTS

Trade imbalance to be corrected

Standard Staff Reporter Kampala
Kampala, April 23.—Uganda has imposed a ban on imports of Japanese goods because of the adverse trade balance with Japan—and similar action might be taken against other countries, the Minister of Commerce and Industry said yesterday.

References to import goods of Japanese origin will not be issued for the time being, the Minister, Mr. James Lubowa, announced. Uganda has had adverse trade balances with Japan for several years.

The ban follows restrictions on Japanese imports by Tanzania earlier this month, and a statement by Kenya's Minister for Commerce and Industry, Dr. Kiara, expressing concern about East Africa's trade imbalance with Japan.

The Permanent Secretary for Commerce, Mr. L. M. Mawhood, said that the more followed months of negotiations with the Japanese diplomatic mission in Nairobi. There has been a slight response, but not to our satisfaction.

Better hand for mission
Imports to Uganda from Japan last year were worth £4,800,520, and £2,000,000 in 1964.

The announcement coincides with a visit to Japan by the Minister for Works and Communications, Mr. W. W. Kabira, who has already taken his friendship mission to Russia and China. It is expected to strengthen ties with the Japanese.

Mr. Mawhood said that Uganda had some instances with respect to the Japanese mission. There was a possibility of a gap in the supply of the mission due to the shortage of Japanese goods. The Government is looking for ways to improve its relations with the Japanese.

Constitution Bill vote put off again

VOTING on the third Constitution Amendment Bill was again deferred yesterday, because less than the 25 per cent of all Members required to change the Constitution turned out for the Division. Only 92 of the 97 Members needed could be mustered after a double ringing of the Division bell.

The Speaker, Mr. Humphrey Slade, said that the vote would be taken after Question Time next Tuesday. To vote when an insufficient number of Members was present would obviously be useless, he said.

According to the Speaker, Mr. Slade, the Bill has been passed by the House of Representatives. The Bill has been passed by the House of Representatives.

BANK RATE HOPEFUL HELP GILTEDGED

Quiet after holiday

There were few price changes noted after the Easter holiday and trading was fairly quiet. The plantation section remained steady with little buying or selling interest. Nakuru Fibrelands were 10 cents easier at 4 1/2 shillings. Brierley Tea Co. with trading between 3/10 and 3/20 were unchanged.

CONTINUING firmness of hopes-extended securities on list of an early Bank Rate provided the chief feature yesterday on London Stock Markets, in front of yesterday's no change decision from the Bank of England.

Industrial remained quiet though a selective demand took its impression in places.

Bank of Africa Breweries with buyers at 10/60 and sellers at 10/80 as dividend were easier after having been traded in up to 1/12.

Classic Breweries managed firm at 14/50 buyers coming to 14/70 and 14/80. Breweries were 2/30 easier at 12/75 sellers.

East African Bug and Congo were finished high into up to 4/75 but the price eased to 4/50 as dividend were easier after having been traded in up to 4/75 buyers at 4/75 and 4/80.

A reasonable turnover was noted in Copper Motor Corporation Ltd. between 18/ and 18/50, but Motor shares were quiet and little noticeable price changes occurred.

East African Power and Light were active at 14/00, with the price 1/20 higher at 14/20.

Mine trading was recorded in British Government and C.I.O. preference shares remained unchanged.

Noteworthy performance by student orchestra

Kenya church services

Nairobi

AP Special Nairobi, Kenya, April 22 (AP)—The Nairobi student orchestra, under the leadership of its conductor, Mr. G. N. Mwangi, gave a most noteworthy performance at the Nairobi Student Orchestra concert in the Nairobi City Hall on April 21.

The orchestra, which consists of 40 members, was formed last year and has since that time been training for a high standard of performance. Its repertoire includes a wide variety of classical music, and its performance last night was highly praised by the audience.

Following the concert, the orchestra gave a performance of the "Pavane" by Maurice Ravel, which was highly praised by the audience. The performance was a success in every respect, and the orchestra's conductor, Mr. G. N. Mwangi, was highly praised for his leadership and his own performance as a soloist and leader.

Exam passes, speed building

ADvanced level G.C.E. results achieved by Nairobi Strathmore College students, sitting the University of London examination for the first time, have greatly stimulated college plans to increase enrolment. Work has begun already on a new building (see article).

Plans are now to build 20 candidates per class of three. A Level passes average 60 per cent at least and one subsidiary level passes.

At the University of East Africa new academic appointments with seats open. A. Lawrie under certain conditions about 50 per cent of those students every year, wherever the sacrifices," added.

By expanding classes to 25 students an extra 10 have been admitted. In 1964 when the new building is finished next year enrolment will increase to another 15, bringing the total to 150.

Further expansion will be possible without more residential accommodation for which plans have been made already.

The new library is designed to cover for many more students than Strathmore had at present. It will be able to hold 50,000 books.

Part of the new building should be ready by the end of the second term, and the West Institute lecture room for 150 students by May.

Mayor of Mombasa replies to critics

THE Mayor of Mombasa, Aid M. Komba, has replied to criticisms about his speech to the Mombasa baraza last week.

His remarks were often criticised by the Mombasa African Baraza. Mr. Komba said that the baraza is a meeting of the Mombasa African Baraza and not a meeting of the Mombasa African Baraza.

The President said that the Mayor's remarks on the baraza were not intended to offend anyone. He said that the baraza is a meeting of the Mombasa African Baraza and not a meeting of the Mombasa African Baraza.

The conference also heard that the Mayor had said that, after spending a lot of money to travel to the baraza, he had not seen a single person who was not a member of the Mombasa African Baraza.

The conference attended by 100 members of the Mombasa African Baraza, heard the Mayor's remarks on the baraza. A. A. Komba said yesterday he had heard the criticism of his speech but said he was not hurt. He said that he was not a member of the Mombasa African Baraza and that he was not a member of the Mombasa African Baraza.

INDUSTRIAL RELATIONS

IN the wake of the Kenya Government's new legislation on industrial relations and collective bargaining, the E.A.C.S.O. has published a Bill designed to make provisions for the settlement of disputes with its own staff.

Among the provisions it is stipulated that disputes shall be referred to a Disputes Settlement Commission which, if provided that, if a settlement cannot be reached by these means, the dispute will be submitted to a Standing Tribunal, which will refer its findings direct to the Commission Services Authority, which is empowered to make an award.

One section of the Bill provides that it is an offence to act in a manner which is likely to bring the Commission Services Authority into disrepute. This section of the Bill provides that it is an offence to act in a manner which is likely to bring the Commission Services Authority into disrepute.

ACCENT ON HARD WORK

MURANGA, the name given to one of the six districts in Kenya's Central Province, may have a down bearing on its name. It is a district where the population, numbering more than 200,000, is said to have just one important bearing — hard work.

The accent on hard work is rapidly spreading its fiery glow over the district, and in the young minds of the school children, it is constantly echoed in their daily lives.

The reason behind this is mainly the fact that the district, particularly in the Murang'a Farmers' Association area, has been a centre of hard work for many years.

Today, many of the district's Murang'a Farmers' Association members are busy with their holdings, improving their crops and raising their standards of living.

Murang'a has recently been the subject of considerable publicity, as is shown in this article by NATHAN ODHIAMBO

At the moment there are about 2,000 people in the district who are engaged in the production of coffee, tea, and other crops.

The effect of hard work is being felt in the district, and it is being echoed in the daily lives of the people.

It is a district where the people are constantly striving to improve their standards of living.

Bill framed to settle E.A.C.S.O. disputes

Bill entitled "An Act" to make provision for the settlement of disputes between the East African Common Services Organization and its members and to establish a Standing Tribunal...

The enactment by the Government of the three countries will be known as the Settlement of Disputes (Employers) Act, 1965, and will come into operation on a date to be appointed by the Authority.

Among its provisions, the Bill requires all disputes referred to the Secretary-General of the Organisation, followed by conciliation. If conciliation is unsuccessful then the dispute is referred to a Standing Tribunal which will be empowered to act.

It is also provided that no senior employee of the Organisation shall be a member of a trade union or any body of association affiliated to a trade union...

Baku replies to students' allegations

CONFLICTING views on the return of the student delegates of 20 Kenyan students from Bakou and the nature of African students there expressed yesterday by one of the 20 and a senior admission official in the State.

In an interview with the Nairobi Press Agency, the chairman of the committee for Higher and Technical Secondary Education of the Council of Ministers in Azerbaijan, Mrs. Zuleika Gasimova, said that lakes of angry, hostile African students in Bakou and discrimination against Africans were quite normal.

"I am convinced that many of our students will have had a good education and will probably regret their departure."

On discrimination she said that Azerbaijan had a tradition for hospitality and entertained her people with the best of their hearts. Her people were used to receiving a great number of foreign students for other reasons, mainly because of the high level of education in the future of the 20 Kenyan students who have returned to Bakou.

Because of rumours designed to show that the Government is not ready to accept the real spirit of Kenya by the Ministry of Information, Broadcasting and Tourism, Mr. Onyiah.

Offer denied. Reported offers of scholarships by the American and West German Governments, on their agencies to the 20 Kenya students who left Baku, were strongly criticised by the Assistant Minister for Education, Mr. Kennebally on Tuesday.

The U.S. Embassy in Nairobi later denied that it had offered scholarships to the students without consulting the Kenya Government.

Kenya's daily Press was reported to be working on a plan to increase its circulation.

Experts WILL MEET IN KAMPALA. There was an early start to the Easter holiday for many Kampala motor enthusiasts who left their beds at about 4.30 a.m. on Good Friday to reach control points for the East African Safari or to watch the drivers arrive.

Important event. The Ombudska spoke of his visit to the East of Africa to investigate the case of a woman from the British administration who had been arrested during the 1967-68 period.

The Victoria Falls was something we knew we had to see some day—and it surpassed our wildest imaginations. Kariba Dam, we'd read lots about it but never realised what a breathtaking experience we had in store. The Chornoffs Chobe Game Reserve was truly thrilling and Salisbury, with lots of lovely shops and restaurants and plenty of things to do, day and night, was tremendous fun. Do what we did—send to the Tourist Office, P.O. Box 2479, Nairobi, for the fascinating full colour folder on Flame Lily Holidays.

KENYA'S MOST PRODUCTIVE BILLFISH SEASON IN RETROSPECT

When the rains have come and the wind is strong, the fish are pulled out of the water for their annual spawning and the fish are taken and sold, new that rods are used to hook back and over the fish and put away in the season and look for trends and trends and generally such on Kenya's most productive billfish season. The season would be accomplished by listing the various Africa and what have been established during the season as shown for the most part. Africa's record caught of our Coast in an achievement given international status in the annual lists of Africa game fish records and as such a record to be followed by those who follow and those who are not.

Two major fisheries were operating all over the country, thought especially in the coastal areas. For example 15 miles off the coast of Malindi, thought especially in the coastal areas. The largest mackerel on the coast was caught by Mr. W. J. Williams, the local Fisheries Officer, who should have been these measures that the fish should be taken.

Shark catches

Another interesting feature of the fishery was the catching of the shark. The shark is a very important part of the fishery and is taken in large numbers. Industry — a growing face of Mombasa

MOMBASA has many faces, most of them well known to the tourist, the glamorous face of the picturesque face of narrow streets and on busy boulevards, the modern streamlined face of the waterfront.

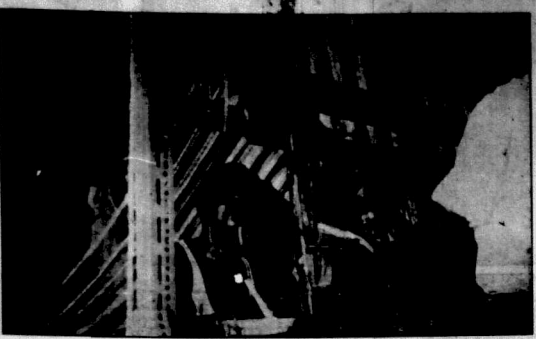

But the face of the waterfront is not the only one. Mombasa is becoming an industrial town. The Government's recent decision to importation of cars will serve as a protective measure.

The Export Mill employs 200 workers and will eventually increase its capacity to 2,000. It is the first of its kind in East Africa where it processes sisal into the fibre, adding up to 100,000 tons of sisal to the country's output. The mill is a joint venture between the Government and the private sector.

COMPARE the D4D against any other tractor ... even another D4

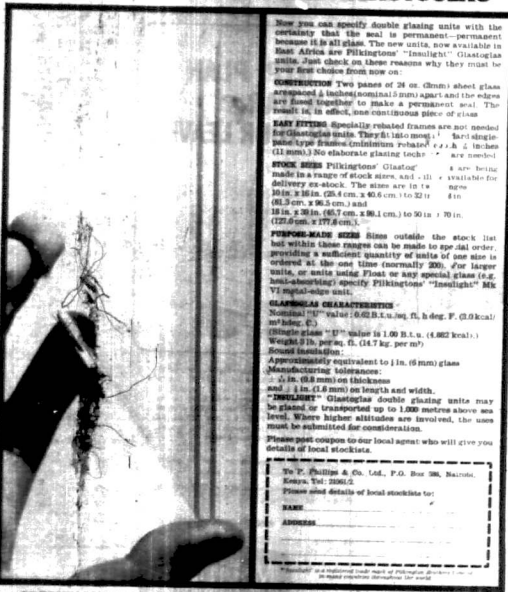

The D4D's 165 torque net makes its 63 HP seem like a lot more. That's why it pulls through hard spots or climbs hills grades without down-sliding - to keep you productive. Compare the D4D to an older D4, say a 63 HP T4 Series, and you'll see other claims that add still more dependability and reduce your maintenance. For instance, new Sealed Track* blocks entry of abrasive into the pin and bushing joint to prolong undercarriage life. Lifetime Lubricated Rollers and idlers need no attention until they're due for rebuilding. The dry-type air cleaner is 90.8% effective and takes only 5 minutes to service. If you're operating an older machine, come in and see how you can move up to more production and dependability.

now! A DOUBLE GLAZING UNIT WITH AN ALL GLASS SEAL PILKINGTONS "INSULIGHT" GLASTOGLAS

Now you can specify double glazing units with the certainty that the seal is permanent - permanent because it is all glass. The new units, now available in the African area Pilkingtons "Insulight" Glastoglas units. Just check on these reasons why they may be your first choice from now on:

CONSTRUCTION Two panels of 20 or 24mm sheet glass are arranged & held in nominal 25mm gaps (the inner and outer panes) together to make a permanent seal. The result is, in effect, one continuous piece of glass.

HEAVY FIXTURES Specially rebated frames are not needed for Glastoglas units. They fit into most "A" type single-pane type frames (minimum rebate 2 1/2 x 2 1/2 inches (63.5 mm x 63.5 mm)). No elaborate glazing tools are needed.

FOUR SIZES Pilkingtons' Glastoglas "A" units are being made in a range of stock sizes, and will be available for delivery ex-stock. The sizes are in 1/4 inch increments: 24 in. x 36 in. x 26.6 cm x 91.4 cm x 61 cm (91.5 cm x 91.5 cm).

PERFORMANCE SEES films outside the stock list but within these ranges can be made to special order, providing a sufficient quantity of units of low mass is ordered at the one time (normally 200). For larger units, or units being fixed by special glazing (e.g. large aluminium) specify Pilkingtons' "Insulight" MK. V1000-type unit.

GLAZING REQUIREMENTS
Nominal U.P. value: 6.0 (B.T.U./sq. ft. h. deg. F. 0.8 kcal/m. sq. h. deg. C.)
(Single glass "U" value is 1.00 B.T.U. (4.82 kcal/m. sq. h. deg. F. per sq. ft. (14.7 kcal. per sq. m.))
Sound insulation: 20 db.
Approximately equivalent to 1 in. (25.4 mm) glass.
Manufacturing tolerances:
± 0.005 in. (0.127 mm) on thickness
± 0.001 in. (0.025 mm) on length and width.

"Insulight" Glastoglas double glazing units may be glazed or transported up to 1,000 metres above sea level. Where higher altitudes are involved, the units must be submitted for certification.

This could become the world classic of the world

EVERY year the East African Safari gets more competitive and more difficult. If the 1965 Safari was not the toughest, it was certainly the most exciting. Some drivers and teams complained that the times allowed for certain sections were far too tight, but strangely enough some of the 16 finishers complained at least those who did not win had been treated fairly and squarely. On the road sections and on a racing circuit as has often been the case in some European rallies.

Starting order controversy

With each Safari certain changes are made to the rules and regulations. These changes are made in order to improve the Safari and to make it more of a challenge to the participants. This year the major change was a change in the starting order instead of balloting as was done in previous years.

Starting origin

By the time the Safari Commission met in Nairobi last year, the starting order had been decided. It was a change from the previous year's starting order. The change was made to make the Safari more of a challenge to the participants.

Victorious Sikhs tell of second-hand car gamble

By DEREK WATKINS

EVERY time that Jørginder and Jaswant Singh snatched a glance at a newspaper or caught a news bulletin during the overseas stage were taking part in the 12th East African Safari, they were aware of the fact that they were driving a second-hand car. The car was a Volvo PV544, which they had bought for a very low price. They were aware that they were taking a big gamble, but they were determined to win.

At the end of the race, the Sikhs were victorious. They had driven the Volvo PV544 to the finish line, and they had won the outright prize. They were very proud of their achievement, and they were very happy to have won the race. They had taken a big gamble, but they had won.

The Major of Nairobi, Ald. Charles Rubia, presenting one of the prizes to Jørginder Singh and Jaswant Singh. Other participants are seen in the background.

FIRST CHOICE FOR TEAM

IMPRESSED by the fact that the Volvo PV544 was the first choice for the team, the organizers of the 12th East African Safari have decided to make the Volvo PV544 the first choice for all teams. This is a great honor for the Volvo PV544, and it is a testament to the quality and reliability of the car.

At the end of the race, the organizers of the 12th East African Safari presented the prizes to the winners. The Mayor of Nairobi, Ald. Charles Rubia, presented the outright prize to Jørginder and Jaswant Singh. The organizers were very proud of the winners, and they were very happy to have presented the prizes to them.

ANOTHER CHAMPION SAFARI

Congratulations to car No. 1—Volvo PV544 driven by Jaginder and Iqbal Singh on winning the Champion Challenge Trophy.

The overwhelming majority of men who stake their careers on engine performance choose Champion spark plugs because Champions have no equal for power and dependability.

Once again the majority of drivers in the E.A. Safari chose Champions

Congratulations to the drivers and everyone concerned with the very successful Thirteenth East African Safari

ENTHUSIASM AT THE START REACHED NEW PEAK Vice-President finished cars away

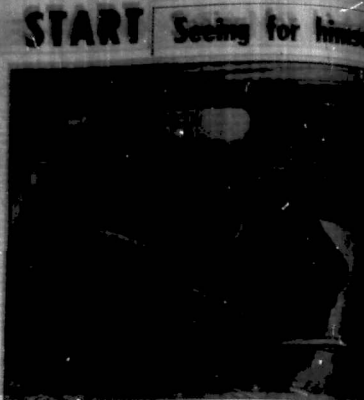

ENTHUSIASM for the East African Safari reached a new peak this year with competitors at the start of the 2,000-mile race in the Nairobi City Hall starting area.

Hours of applause that greeted each driver as they sped away into the distance as they were cheered by crowds that lined the route for miles.

Despite the excitement, the start was held before 10,000 spectators. Mr. Odinga, who was the main prize, said he was pleased that the public enthusiasm for the race was growing and that the Safari was becoming a major attraction for the U.S.A. and Europe.

It was the first time since the start of the Safari that the Vice-President had been present at the start. He was seen in the starting area, where he was seen to be cheering the drivers on.

Mr. Odinga said that the start of the Safari was a great success and that he was pleased to see the public enthusiasm for the race growing.

With a Safari leader in his hand the Vice-President, Mr. Odinga, sees the wheel of a 2,000-mile race before the start. The car driven by... (text is partially obscured)

Why are 90 out of every 100 Land-Rovers in East Africa

fitted with AVON tyres?

Because AVON tyres are recognised by Land-Rover users - as indeed by all experienced motorists - as the toughest and most rugged range on the market. Tyres that are ideal for East African conditions. Tyres for every kind of vehicle. Tyres that are long-lasting and consistently reliable.

Here's what AVON has to offer you:

A WIDE RANGE OF TYRES FOR CARS, TRUCKS, TRACTORS, MOTOR CYCLES, SCOOTERS AND BICYCLES

AVON for greater safety!

The Vice-President's car was driven by the driver in the left-hand seat, Mr. Odinga and the Deputy Mayor of Nairobi, Mr. L. Odinga.

POWER TO SPARE!

Extra power, where you need it most... (text continues) ... power to spare... (text continues) ...

Graham Batteries offer you Power to Spare because:

- They are tough, long-lasting batteries that are consistently reliable in any climate, even over appalling road conditions.
- They are built of best-class materials by men who understand road conditions.
- They are built of best-class materials by men who understand road conditions.

Includes such features as: Power Seal, Nylon Separators, X-Metal Grid!

An 18-month guarantee scheme is available against manufacturing defects. The replacement is made possible by their record of reliability and dependability, proved over East African conditions.

Cars penalized for speeding in Nairobi

EARLY VICTIMS OF SPURTING LEG

Two cars were involved in a collision on the Nairobi-Mombasa road on Monday, April 18, when a motorist was killed and another seriously injured.

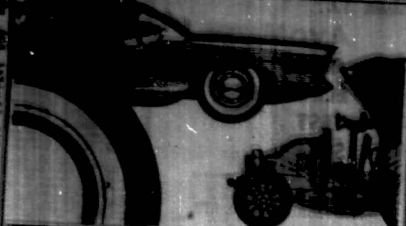

The accident occurred at about 10:30 a.m. when a white Volkswagen Beetle, driven by a motorist from the Eastlands area, was travelling in the northbound lane of the road.

NECK AND NECK

The white Volkswagen was travelling northwards at a speed of 110 m.p.h. when it was overtaken by a black Mercedes-Benz 300SE, also travelling northwards, but at a speed of 120 m.p.h.

THE MAN WHO SAVED THE SAFARI FROM A STICKY END

MR. BRIGLAN NORRIS, the Clerk of the Course whose "pugnacious" determination kept the safari from getting its members back across the border with the East African Safari Association at the annual night house business time last October.

Manager pays for dedication to work —with his health

REVEREND and an essay as any African farmer, Mr. Jack Howell, the man who does an almost superhuman single-handed job behind the Safari office, was able to start relaxing this week for the first time in three years.

"That's what my job amounts to — work day a week with the Safari here for the last 10 years," he says. An over-zealous manager of the E.A.S.A. and Executive Manager of the Safari, he takes the credit for a number of safaris and the things of things in Africa. But his health has suffered accordingly in the process. From a "sturdy" 175 in December his weight has dropped to 140 and he has been hospitalized in Japan and elsewhere for years and is now in a hospital in London. "I had to stop working," he said. "I have been certainly in the hospital for a long time."

During the year he travelled with over 20,000 miles to survey the Safari, and to see the things that were going on in the field. He has been in the field for 10 years and has seen the things that were going on in the field. He has been in the field for 10 years and has seen the things that were going on in the field. He has been in the field for 10 years and has seen the things that were going on in the field.

In a six-week visit to Britain, he talked to many people and was called a "pugnacious" man. He was called a "pugnacious" man. He was called a "pugnacious" man. He was called a "pugnacious" man. He was called a "pugnacious" man. He was called a "pugnacious" man.

He has seen to take any credit for anything. "Give the credit where it is due," he says. He has seen to take any credit for anything. "Give the credit where it is due," he says. He has seen to take any credit for anything. "Give the credit where it is due," he says.

TWO FRIENDS BUILD A HOUSE

By SUSAN CARROLL

"We need a new house," said Ricketty. "We certainly do," said Bocketty. "And they should have..." "Well, now that is settled," said Bocketty. "I know exactly what sort of house we need." "I'm pleased that you," said Ricketty. "It's so." "The two friends agreed at each other, with this result and ready for action." "Hold on - Let's both draw a plan, they said together, and with their quills, paper, and pencils they started around collecting paper and pencils.

Ricketty drew a lovely house with a big door, six windows and two bedrooms, one for him and one for his friend. Bocketty drew a lovely house too. He had a big door, eight windows and two bedrooms, one for him, one for his friend and two for guests. "I've finished," said Ricketty. "I've finished," said Bocketty. "Well, now let me see," said Jack, walking around the outside of the house. "The house looks wonderful. Let's see it!"

Just then Jack the builder came. "Hello," he said. "You two have been very busy. What have you been building?" "The house of course," said Ricketty. "The house of course?" asked Bocketty. "I've finished," said Jack, walking around the outside of the house. "The house looks wonderful. Let's see it!"

FASHIONS change suddenly yet imperceptibly. These fashions, however, the police, even declare worn ten years ago! Look carefully out of date and it is hard to believe that anyone could wear those from 1947. We did, but how many of us can really remember! But fashion has a habit of repeating themselves, and who knows, the New Look may be new again one day.

Wilson - hero of the General Election

By MICHAEL BOYDRELL

THE MAKING OF THE PRIME MINISTER, by Anthony Howard and Richard Watt (Unwin Paper No. 20)

THE result of the last General Election in Britain probably hung on the fortunes of the two main parties, the Conservatives and the Labour Party.

The election for this seat was a surprise, a surprise which the party members... It was a surprise to many who had expected a Conservative victory. The Labour Party's success in this constituency was a reflection of the national mood at the time.

It is clear that the two main parties were the only ones who could have won the election. The smaller parties were unable to make a significant impact on the outcome.

He was not a happy man... He was a man who had spent a considerable period of his life in the military. His experience was invaluable, but it was not always appreciated by his colleagues in the cabinet.

Fatual support

His relations with the Prime Minister were... He was a man who was not always in agreement with the Prime Minister's policies. However, he provided strong support for the government in the House of Commons.

Comments with this support... He was a man who was respected by his colleagues and by the public. His support was a valuable asset to the government.

This reveals a... The book provides a detailed account of the political events of the time. It is a valuable resource for anyone interested in British history.

LINKS WITH SCOTLAND PRAISED

THE people of Kenya had always had a close relationship with the Scots, particularly through education and other activities, the Kenya High Commissioner, Dr. J. N. Karanja, said this week on his first visit to Scotland.

"Many people from Scotland living in Kenya are playing a big part in helping raise the country's standards in the change of education is still of tremendous importance to us," Dr. Karanja said.

Accompanied to Kenya's education attaché in Britain, Mr. J. K. Kariakoo and by Mr. E. M. Mawdsley of Kenya's House of Commons, Dr. Karanja visited four major Scottish firms in the Dundee area, including Glasgow Africa generally, trading in education and church officials and companies in many of the country.

On his first day he met the head of Edinburgh, Lord Provost Duncan Weatherhead, after lunch as guest of the British-speaking Union west of Scotland. He heard about the church work consultation on education to which reports are being sent later and Kenya at Edinburgh University.

Among the first people to welcome the High Commissioner to Scotland was an old friend from Glasgow, Mr. James G. A. Macpherson, who is the history at Edinburgh University and also a member of the committee which runs the University's Centre of African Studies.

Uganda expects all-time cotton crop record

Standard Staff Reporter
The cotton crop in Uganda has been expected to reach a record level of 620,000 bales, 2,000 bales more than the 1965 record. This is due to the fact that the country has been able to maintain a high level of production throughout the year. The Government is expected to announce a new cotton marketing scheme which will allow growers to sell their cotton directly to the market. This is expected to result in a further increase in production.

OUR FLAME LILY HOLIDAY WAS A HOLIDAY ALL THE WAY

The Victoria Falls was something we knew we had to see some day—and it surpassed our wildest imaginations. Kariba Dam: we'd read lots about it but never realized what a breathtaking experience we had in store. The enormous Chobe Game Reserve was truly thrilling and Salisbury, with lots of lovely shops and restaurants and plenty of things to do, day and night, was tremendous fun. Do what we did—send to the Tourist Office, P.O. Box 2479, Nairobi, for the fascinating full colour folder on Flame Lily Holidays.

One of the country laboratories now accepts the practical students of Kenia as well as those from other countries.

A lecturer in the laboratory, Mr. G. H. Dool, is seen here in the laboratory, as well as the practical students of Kenia as well as those from other countries.

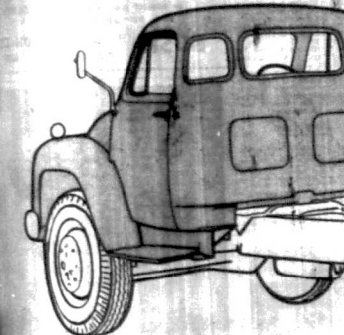

At this time there were very few properly qualified African agriculturalists, but the British centre was fortunate in the arrival of Mr. Maxwell, a Malawi-trained officer, in February 1960, and in 1961 Mr. Peter Kigama, an ex-Army Agricultural Brigadier, was seconded from Nairobi, Kenya.

The year 1964 was a turning point in the history of agricultural progress in the area. It was in that year that the centre is in the present form was opened by the then Governor, Sir G. B. Sillanpaa.

The students at the centre in 1964 numbered 200, and in 1965 numbered 300. The centre is now a well-established institution.

BEDFORD LEADS IN DIESEL ENGINE DESIGN

End-to-end waterflow design solves all diesel gasket problems

High-speed motorway work and heavy duty operations impose extra stress on the gas seal of modern diesels. End-to-end waterflow design solves this by eliminating all waterways between cylinder block and head. Instead, the cooling water passes from

block to head through two special parts at the rear of the engine, outside the gasket area. Now the function is to serve as a gas seal to the cylinder bores. This means that gas leaks are absolutely positive; gas-to-water blow-by is impossible.

 Motors in the devel-
 opment of East
 Africa.

PUTTING EAST AFRICA ON WHEELS

Motor firm making vital contribution to economy

IT is the proud boast of G. and R. Motors that they can just as easily build anything on wheels. You name it and they will provide transport for it. Transport is their business.

BECAUSE transport is a vital economic factor in developing East Africa.

BECAUSE transport means unity and it means understanding for the more people move about and get to know each other, the more they will develop inter-community understanding and trade—and trade means the movement of goods on a large scale.

BECAUSE transport is required to get these goods from the agricultural producing areas to the railways, the processing factories and the consumer.

BECAUSE transport is required to get the products of East Africa's growing industries in the dockyards at the airports and the building sites.

BECAUSE transport is required to carry coffee and cotton, tea and steel, cement and fuel, oil, cabbage and all the other commodities which are so vital to the economic life of East Africa.

VARIETY OF VEHICLES FROM 'MOKES' TO 50-TONNERS

The general headquarters of G. and R. Motors, which is being re-equipped to meet the demand for a wide variety of vehicles from 'mokes' to 50-tonners.

There is a big boom in the transport business in East Africa and G. and R. Motors are producing a wide variety of vehicles to meet the demand. From the small 'moke' to the 50-tonner, they have a complete range of transport vehicles.

The variety of vehicles is a result of the fact that East Africa is a large and diverse continent with a wide range of climates and terrain. This means that a wide variety of vehicles are required to meet the needs of the different regions.

G. and R. Motors has a long history of producing reliable and durable transport vehicles. Their 'mokes' are particularly popular in the more rural areas, while their larger trucks and buses are used for long-distance transport.

The company's success is due to its commitment to quality and reliability. All vehicles are built to the highest standards and are designed to withstand the harsh conditions of East Africa.

Cross Country work is tough...

The way ahead for tourists

EAST AFRICA'S 'hiding spot' of tourism is today a major factor in the economies of Kenya, Uganda and Tanzania.

In Kenya, tourism is now the second largest source of foreign exchange. More than 25,000 tourists visited Kenya in 1963 and the revenue was £1,100,000.

The growth of tourism is due to the fact that East Africa is a beautiful and diverse continent with a wide range of climates and terrain. This means that a wide variety of vehicles are required to meet the needs of the different regions.

G. and R. Motors has a long history of producing reliable and durable transport vehicles. Their 'mokes' are particularly popular in the more rural areas, while their larger trucks and buses are used for long-distance transport.

TEAMWORK:

By working closely in conjunction with G. & R. Motors, body-building experts, Sarwan Singh Bansa are proud to be playing their part in helping to build the strongest and safest vehicle bodies on East Africa's roads today.

QUESTION AND ANSWER

How do you get vehicles that will stand up to the tough treatment of East Africa's roads?

By using the Enterprise Road General Workshops who build the best bodies on rugged Guy Chassis!

QUESTION AND ANSWER

QUESTION AND ANSWER

BUSES FROM BODIES...

Full assembly in National factory

Components of the bodies and chassis are assembled in the factory from a variety of parts, some of which are specially made for the purpose and some are standard items ready to be fitted.

1. Certain essential chassis details and components for assembly in the factory are standard of G and R. These are then taken to the main A.L.C. factory of the body manufacturer where they are fitted to the chassis.
2. Prior to assembly, parts from the body are selected at G and R. The factory in the Industrial Area, Greenway, is now in the hands of the Government. A super-plant in the vicinity of the factory is being built to take care of the body's heavy-duty work in being, some, late position.
3. The early stage of chassis assembly, showing how a bus or truck chassis will use, for example, the A.L.C. work, is being done every part of the operation.
4. Work of a bus, A.L.C. component, 40-cylinder Guy motor assembly begins to take shape in the Industrial Area assembly plant. This plant of vehicle represents the best in British commercial transport engineering.
5. The motor unit being into position on a seven-ton Super Austin chassis during the motor assembly. The engine is a 1.7 litre. Soon the chassis will be ready to drive away to the body builder.

Because Alcan aluminium truck bodies are tough, strong, lightweight and corrosion-resistant

THESE ARE THE BIG ADVANTAGES YOU GAIN WHEN YOU BUILD ALCAN ALUMINIUM BODIES ON G & R MOTORS CHASSIS:

- Extra payload
- Lower maintenance costs
- Lower operating costs
- All adding up to increased profits for the operator

Mining and construction industries in many fast-developing countries look to Alcan aluminium to supply them with rock-carrying truck bodies, rugged off-highway dump bodies and for sand and gravel tipping bodies. When the call is for lightweight, corrosion-resistant truck bodies that can stand up to tough punishment, Alcan aluminium bodies are the first choice of economy-minded operators.

Why not find out how Alcan aluminium can benefit your road transport operations?

Shown here is the Austin WEX 100 chassis cab with aluminium body.

Here is a photograph taken during a test programme at Canadian John-Manville's Jeffrey Mine at Ashcroft, Quebec. Manufacturer - Arsen Electric Welding, Quebec. Test indicates how Alcan aluminium body will stand the same treatment as steel and save 7,000lb. weight per unit.

FINAL STAGES IN CHASSIS BUILDING

Safety and comfort the aim

CONTINUING the story of the birth of a bus of Mr. G. and H. Motors, members present in Harare.

6. Cuts for boxes and hatches are welded together at the assembly plant from imported metal sections. Careful supervision by Mr. Bert Smith, the foreman in charge of assembly, ensures good workmanship and the maximum in safety and comfort.

7. Final stage in chassis assembly process where the cuts are being inspected. It is estimated that one chassis can be completed in half a day. Production to meet East Africa's requirements is currently at the rate of about 50 chassis a month.

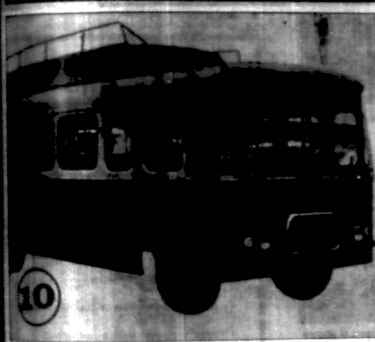

8. The frame of a 60-seater Guy omnibus begins to take shape in the plant at Enterprise Road General Workshops in Harare's Industrial Area. Metal sections is used extensively these days for the frames of G. and H. buses, having a greater safety factor than the wooden frame of the past. The painting is in high-grade aluminium alloy sheet.

9. Workers in Enterprise Road General Workshops put frame and panels into place on a Guy chassis. Watching the work is Mr. Pritam Singh, the firm's founder, who has been an expert in East African transport since his service in the R.E.M.E.

10. An Austin bus chassis has metal body attachments at a Harare coach-builder. Some also turn in Harare carry out body-building on Austin chassis supplied by G. and H. Motors.

READY FOR THE ROAD: A 60-seater Guy omnibus intended for high-speed operation on East Africa's trunk routes emerges from the workshops resplendent in its new coat of paint. All Guy and Austin vehicles are built up in East Africa from specifications and plans designed to best suit local highway transport conditions.
