East African Railways.

The Imperial British East
African Corporation has just
received from the Government of
Kenya the following information
concerning the proposed railway
line from Nairobi to Mombasa.

in order to determine the most
suitable route for the line and the
best methods of working it.

Shipping Policy Scheme.

In view of the fact that the
Government of Kenya has
decided to take the work of the
Shipping Corporation of Kenya
into consideration, it is
advisable that the shipping
policy of the Government should
be considered in connection with
the proposed railway line.

The Malory Line.

Address from the Government of
Kenya to the Malory Line
Company, Ltd., Nairobi, Kenya,
dated 10th October 1922.

Stubs and Dies.

Considerable interest is reported
to have been taken in the
proposed railway line in the
provinces of Kenya.

Rubber and the Protectorate.

For various reasons it is
advisable that the Government
of Kenya should consider the
possibility of establishing a
rubber plantation in the
protectorate.

This resolution urges that if an
export duty were put on
the maximum duty on the lowest
percentage of alcohol production
should be fixed in the lowest
possible rate, so as not to add to
the heavy taxation upon producers.

THE EAST AFRICAN STANDARD

WEDNESDAY, NOV 14 1922

The Facts are established by the evidence presented, and our administration must be held responsible for the results. It is not our duty to be satisfied with the present state of affairs, but to strive for improvement. We must not be content with the status quo, but must seek for progress and development. The Government is committed to the welfare of the people, and will not be deterred by any obstacles. We must have faith in our future, and work for the betterment of our country.

UNDER THE STANDARD

It is a duty under the Standard to report the truth, and to hold the Government accountable for its actions. We must not be afraid to speak out, and to expose the wrongs of the world. The Standard is a platform for the oppressed, and a voice for the voiceless. We must use it to our advantage, and to the benefit of our fellow citizens. Let us stand together, and fight for a better future.

THE NATIVE

LESSONS THAT SHOULD BE TAUGHT HIM.

DETERRALISATION.

Whether one may think or not that there is one serious problem facing the Colony today. This problem is the question of the racial situation of natives that is taking place daily in the reserves.

Chief's Trouble.

Industrious Kiliga as we might call him is the chief of a tribe of a few hundred people.

On the Town.

For years now the E. A. Standard has presented accounts of the conditions of native life in the reserves.

After the Flood.

This statement undoubtedly would do much to help the natives to see their own position.

The whole performance would be a very good one.

It is a pity that the Government has not done more to help the natives.

Dignity of Labour.

BACK TO VICTORIANISM? WHAT MEN SAY AND THINK ABOUT IT.

FLAPPER STILL AN ENEMY. From Our Correspondent, London, September 20. Quite an interesting controversy has been started by the Daily Mirror in London. The paper says by and we have no much to do with the modern attitude that the papers can hardly feel so sure.

A GOOD example with the heading "The Post Office stamps the W.A." appeared in the Daily Mail of September 16, and as an appendix to keeps that we print it in full without comment. The increase of £4,000,000 in postal revenue shown by a portion of the figures for the six months ended on September 2 with the corresponding period of last year's statistics justifies the charge postal charges will be placed on the communication department of the year and which Mr. Haldane announced on May 27 in a further gratifying result of the Daily Mail campaign that has increased income resulting from the lower rates has been used the expenditure by the Post Office of 400 acres undertaken. Mr. Haldane's estimate and comment was to charge with a warning of the Post Office, a warning of which application (in large measure) the Post Office is making. This reduces its charges and a hundred thousand revenue results immediately. This seems clearly that the Post Office is not content with that which it has secured but that there is an economic limit to its charges. Whether for postage stamps, etc. do not, or, however

the, which cannot be overpassed without injury to the country and its trade. Although general trade and the business departments of the country are not precisely on all fours, the head of the Post Office gives the right direction. Railway companies would have failed since if instead of merely cutting at a reduction, in the good of travel they made a bid to raise their prices to the level that the public can pay. It refers on its high individuality, but that they "do" without. That is the bluish under which trade is sleeping.
