A problem which will have a profound influence upon East Africa's post-war future will arise from the adjustments of what may prove to be the controlling trade and internal economic interests of Great Britain. The conflict will not of course arise as a consequence of any bilateral contract. And comparison of our trade position in relation to the continent of Britain does not start until a little more into our history than some of the best of us have been representative of in the past. The general economic position in our country will undoubtedly still be so thorough. Britain's internal economy, post-war trade problems will be of great concern to us.

PARLIAMENTARY VISITORS

# British M.P.s To Visit Kenya

# Wingate Ward For Abyssinian Hospital

# London Under The "FORCED TO COMMIT AN OFFENCE"

# More About Iap Atrocities

In an official communication published today we announce in the course of a proposed visit to East Africa and Southern Rhodesia, seven members of the House of Commons will interrupt their journey to spend some days in Kenya. The party is headed by the Hon. Mr. Robert Donat, Secretary of the Imperial Agricultural Association, their journey is in the form of a tour of inspection of the agricultural and industrial resources of South Africa and Southern Rhodesia, but they will also visit the official significance. This will not, however, make any difference to the welcome they will find in Kenya.

However desirable it is for the Members of Parliament to do for themselves few of them are in a position to do so if their presence in the "House" is to be a prolonged one. Like every other member of the House, they will be invited to visit the various parts of a domestic and financial character, in addition to their political and administrative duties. The time they can give to other public affairs, and especially to the various visits which are being given these occasional opportunities, will be limited to those in whose hands, in a collective sense, our destiny can be shaped.

**Eclipse Of Sun: Visible Over Kenya**

**FRICKS NORWAY**

The stirring events now taking place on the eastern, western, and southern European fronts are faithfully reported and held in our attention these days; and the successful news we receive from the battle front for all eyes of complete victory over the evil which now stands at the very heart of Europe. But while recognizing this, we ought not to forget that there is a real sense a northern front as well on which the Nazis have made little or no progress for the last four years, and this northern front is the Norwegian people. The German invasion and occupation of Norway was ruthless and unpardonable as was any other of their evil deeds, with military with her tiny population of 3,000,000 souls, Norway never had a chance. She was taken and spiritually, the Germans have by her democratic idealism, her sense of endurance, her courage in refusing to cooperate with her oppressor, and her military defiance and bullying has become a by-word among all lovers of liberty, both the east and the west. And as manifested particularly through the clergy, her school and school masters, Norway's faithfulness to her democratic idealism, her sense of endurance, her courage in refusing to cooperate with her oppressor, and her military defiance and bullying has become a by-word among all lovers of liberty, both the east and the west.

**How would you choose an INVESTMENT?**

Well, my guiding principle has been to seek safety by spreading my capital widely over many sound concerns. That is why I choose Unit Certificates.

There are many advantages in this form of investment. First, you obtain the benefit of expert and leading investment advice. The great advantage is that you are able to invest in a wide variety of sound concerns. Considering the all-round convenience of Unit Certificates I think you would have to go very far to find a better investment.
