**SAVE OUR SOIL**  
SOL EROSION BEGINS  
When water flows down a hill, it carries away the topsoil. This is a serious problem because topsoil is the most fertile soil. Without topsoil, crops will not grow and the land will become barren. We must take steps to prevent soil erosion. One way to do this is to plant trees and shrubs. Another way is to use terracing. We must all do our part to save our soil.

**JAPAN'S DILEMMA**

Every day now seems to bring news from some quarter or another, which emphasizes in a different way the fact that war is entered upon its last stage and that the Japanese are in a desperate straits. It is not only the military situation, but the economic and political situation, which is fast becoming a desperate one. Japan has now been sealed as firm and unshakably as has that of her European accomplices. The world is now divided into the defensive, the centre of which is the United States, and the offensive, which is the Japanese. The Japanese are now faced with the presence of Allied forces on their respective frontiers, and they must know that with this stage at last reached, the end is placed finally beyond further doubt.

## WAR MEMORIALS

THE Editor, "E.A. Standard"  
— Following his Excellency's visit to the subject of war memorials to be erected by Government on the occasion of the Jubilee of the outbreak of the war, I have had a number of enquiries in connection with the subject. I would like to state that while there is no official Government programme for erecting monuments to our war heroes, it is the duty of every citizen to do so in his own way.

## CRIME

THE Editor, "E.A. Standard"  
— I was reading the African Standard, and I was struck by the fact that in our country we have a high percentage of crime. This is a very serious matter and we must do something to reduce it. I would like to suggest that we should have more courts and judges to try the cases more quickly.
