Help your typist get the right one..

Even if she isn't going to "marry" her typewriter, she'll be on good terms with Halda—the precision-built, Swedish typewriter—from the very first. Its world-famous feather-touch keys, 40 fingers top speed, makes typing a pleasure. And the soft, even finish protects her from "office-eyes." Three features plus the Swedish ball bearings and the automatically accelerating type bars have made Halda the right typewriter for typists and executives in 102 countries. And of course, Donald Vincent & Co. Ltd.'s precision workshops throughout East Africa carry ample stocks of spares and offer qualified service by European mechanics.

Farmers know best whose word counts

It's natural for each manufacturer to claim that his tires give better mileage, more protection, clean better, or last longer. But in this confusion of claims, farmers know best whose word counts most when it comes to tractor tires.

It's the word of other farmers like themselves... farmers who have tried all makes of tractor tires... farmers with years of firsthand, day-in, day-out experience in the field. And thousands of farmers throughout the world vote Goodyear's time-proved Super-Group their first choice in tractor tires.

In survey after survey, year after year, they name Goodyear's first by an overwhelming margin. THERE IS NO CLOSE SECOND.

What is true of Goodyear Tractor tires is equally true of Goodyear Passenger, Truck and Farm-tractor tires. For thirty-eight consecutive years tire users throughout the world have bought more Goodyear's than any other make.

This overwhelming preference for Goodyear can be explained only because of their superior merit.

COURT HEARS APPEALS IN THE KENYATTA CASE

Appeals against the conviction of Jomo Kenyatta and other leaders of the Kenya African National Union (KANU) were heard in the High Court today.

APPEALS HEARD

The appeals were heard by Judge J. G. M. O'Connell. The appellants, including Kenyatta, were charged with treason and conspiracy to overthrow the government. The court heard arguments from both sides regarding the evidence and the legal basis for the convictions.

The appellants' lawyers argued that the evidence against their clients was insufficient and that the trial was unfair. They requested the court to set aside the convictions.

Ineffective

The judge, in his judgment, found the appellants' arguments ineffective. He stated that the evidence was clear and that the trial had been conducted fairly. He dismissed the appeals and upheld the convictions.

Witnesses and others

The judge also addressed the role of various witnesses and other individuals involved in the case. He found that some witnesses had given false testimony and were liable for perjury.

It must also be admitted that the general standard of the day was not of the highest. The production, excitement and entertainment value of the thing that has taught men, mortal ways.

But these things were hardly noticed as we watched the procession of the University of Victoria, which was the first to start. JOHN CHERRY discovers that NAIROBI is GOING UP

All it takes to build your own home in the city of Nairobi is to buy a plot of land and build a house. The city is growing so fast that there is no room for the old-fashioned bungalow. The new houses are built on high ground and are built of brick and concrete. They are built on a hillside and are built on a hillside. They are built on a hillside and are built on a hillside.

Look at these performance-records:

- 1) Full-width header. All cuts across the full width of the machine. The 8-bar, 20-type cylinder is 43 inches long and 15 inches in diameter.
- 2) Double-through separator. The crop flows smoothly and is brought low through the combine. There are no losses of grain or chaff in cleaning.
- 3) Balanced rotor. All parts of the rotor are matched in capacity and performance. This gets no chaffing or loss of grain from the crop at any point.
- 4) Positive separator. The rotor gives you a clean separation of every combine of heavy and light grain. And double-cleaning of the seed under a combine.
