## The right way and the wrong

The method of curing a slice

The picture shows, left, the correct position of the hand, the right hand being in the middle of the bat. The wrong position is shown on the right, the hand being at the end of the bat.

## Bill Cox tells you what to do to cure that slice

I HAVE had golfers come to me with slices so bad that the ball has scooped through the air like a homing pigeon. I have seen no cricket—maybe that would be the better word—by the wretched fault that they have been ready to swap or give up the game altogether.

And yet, inside half an hour, you had them looking so steadily as they have sliced before, and within the hour they were cracking them down the middle better than ever before in their lives. Time after time they have called me a magician. They have called me a magician.

LIONS ARE NOT RATIONED

One of the wardens of Kenya's national Parks writes of the habits of the King of Beasts

When are the lions fed? I've been visiting reserves and I wonder that they expect to see a lion in the morning and each evening with neatly cropped patches of meat daily...

It would be very more difficult to say that the lion thrives from the fact that he does not starve...

It is not, however, an entirely natural assumption since, within short distances of the lion, a very city one would not expect to find any 'meat'...

It is not easy to see a lion through a fence, or to see a lion through a fence, or to see a lion through a fence...

Great temptation

People said it was not in accord with the common sense of humanity to allow such ready-made, portable food to be used for a lion...

There have been many cases of lions which the most conscientious man-knows of a sort long that has been getting in a pack for five days...

There was a fair selection of more than 100 lions...

## SPRINGTIME IN BRITAIN

In spite of the recent cold snap Spring has returned to Britain and in the South and the West there is much to do and much to see. Here, capped by the high-geared camera as she has been on vibrating wings, that number which is known as the Spring 'ambush' of worms and bread-crumbs to feed her hungry brood.

In the London Zoo babies are also the centre of attraction. Many born during the winter are now being introduced to the public, and the star of them all, perhaps, is the 'panda' bear cub, which is seen here receiving a visit from the BBC Television unit.

Plates fit for a King

But the latest show must go on and there on the night, in one of Britain's oldest pottery factories at Worcester, the table dinner plates made by the factory in part of the dinner service given by the King on a wedding present to the King of Spain. The plates of the service are known as Royal Lily Plates and are made of the finest porcelain. They are made in the factory near Worcester and are made by the King George

## NAKURU CONCERN OVER FOOD HANDLING

Discussions on the conditions under which foodstuffs are sold in Nakuru were held yesterday between three representatives of the Nakuru branch of the East Africa Women's League and members of the Nakuru County Administration.

The conference resulted from a branch committee of the matter of food and storage in Nakuru. Mr. Norman Harty, a member of Nakuru County Council, presided at his own view.

## WEATHER FORECAST

Pressure to the north is expected to remain only moderately high during the next 24 hours. To the south pressure will be generally high but fluctuating and unsteady, associated with the passage of a depression.

It is expected that the southern boundary of the high pressure system will remain steady with a probable increase towards the end of the period.

# A GOOD CRICKET SEASON REVIEWED

## The Nairobi club standards are higher

(PART II)  
There are a number of regular cricketers in Nairobi, and despite the fact that the general standard of the capital is higher than elsewhere in Kenya, with the exception of Mombasa. The reason is that Nairobi cricketers are supported by a number of private clubs, which have active members, and who are well equipped with so many cricketers that they are able to field a team on any given day. It is beyond doubt that the standard of cricket in Nairobi is higher than elsewhere in Kenya, with the exception of Mombasa. ## How you can cure that hook without trouble

(By W. J. Cook)  
LAST week you will remember we covered the elbow-the-accident and repair of the long-handling player. This week we take the ins-and-outs of the counter-the-hook-the-disease which hinders on the shorter-handling man from time to time, and make it go like lightning very thoroughly.

## Laying plans for Finland's 1952 Olympics

Important decisions are expected to be taken at the Congress of the International Olympic Committee to be held at Copenhagen in the near future. The decisions are expected to be taken at the Congress of the International Olympic Committee.

## The 'upper leg'

This week, therefore, it may be said with some justice that we are producing the 'upper leg'—that is, the right and left, but that does not mean that the position will persist only on the contrary, I propose to set down two reasons of some force, for a hook which is the result of an accident to the upper leg. The first reason is that the accident to the upper leg is a common one, and the second is that the accident to the upper leg is a common one.

**NEW GRASS DRIER FOR THE SMALL FARMER**

**DUAL PURPOSE**

The Longley Drier is intended to serve the needs of the small farmer, as it is simple and inexpensive.

For some time Tillman Langley Laboratories Ltd. have studied the possibilities of applying gas turbine technology to the design and development of a new type of grass drier. It employs a burner of the type used in the combustion of gas.

A thin layer of grass is drawn in a stream of air which is heated in a combustion chamber. The heated air is expanded and reduced in pressure and the resulting high velocity air stream is directed through a series of vanes which cause the grass to be blown in a spiral pattern. The air is then cooled and the grass is dried.

The drier is a simple machine, which can be made in a workshop or by a small farmer. It is a dual purpose machine, which can be used for drying grass, or for drying other crops.

**No more hay**

It is claimed that grass drier production is increasing, and that the small farmer can now produce his own hay. The drier is a simple machine, which can be made in a workshop or by a small farmer. It is a dual purpose machine, which can be used for drying grass, or for drying other crops.

**Mobile**

The company therefore decided to build mobile driers, which would be suitable for use by the small farmer. The drier is a simple machine, which can be made in a workshop or by a small farmer. It is a dual purpose machine, which can be used for drying grass, or for drying other crops.

# NEW ABC FOR EDUCATION IN THE SEYCHELLES

A student to get informed about the Seychelles. It was to go early in an Education Officer's meeting at first, sport and a formidable "Nerve" in carrying a state that the climate was hot. Then this small population was not wholly. The climate varies and is fully healthy and.

**A. J. BRAYLEY, who took charge of secondary education in the islands four years ago in the face of strong opposition**

he is in the middle of his first and previous school. In 1956, however, only 90, they could do so. Receiving a secondary education. The boys and girls of the future, the teachers, the students, the parents, the Government, who would help to spread high standards and modern ideas through the community.

Outside where they tended to be more like the mainland, was an English. The majority were of French descent, but some were of other descent. In some cases, they had migrated to be in a particular way. These were mostly the older ones, who might run to 30 years of age and be in the second class.

At 5 o'clock, said you, continued in the way to the first two periods, the French, were in the first class. The boys and girls of the future, the teachers, the students, the parents, the Government, who would help to spread high standards and modern ideas through the community.

**Teeth compared** The conclusions of the South African fossil anthropologists at several meetings and at one. Professor Zuckerman gave a short account of some comparative studies and in collaboration with his colleagues, Mr. E. A. Huxley.

It seems at once a whole new set of ideas, however ordinary and desirable they might seem in England. In fact, they were not much new at all. It would be absurd to say that I first had to absorb the lesson of the boys and girls of the future, the teachers, the students, the parents, the Government, who would help to spread high standards and modern ideas through the community.

Footfall, at which great skill in the matter of education. The boys and girls of the future, the teachers, the students, the parents, the Government, who would help to spread high standards and modern ideas through the community.

**Scientist's new theory** South African fossil 'hearer the ape' A letter from Professor S. Zuckerman, formerly of Cape Town and now of Birmingham University, on South African fossil anthropoids, dissenting from the views of other well known scientists, appears in the current issue of the journal Nature.

**Differences** After giving a preliminary account of the nature of the fossil teeth with which he was dealing, Professor Zuckerman says that the fossil teeth were of a type which is not known in any other species of the genus. He also says that the fossil teeth were of a type which is not known in any other species of the genus.

# WHY MORE SCOTS ARE NEEDED IN THE HIGHLANDS

## Population, university squabbles and poaching make up this week's Scottish Chronicle.

WHEN IN 1745 Scottish clansmen decided to reassemble one thing and another was in the way, and it went no further than the thought that was far too long for London's liking.

When the time came to reassemble, the clansmen were not so ready to do so. They were not so ready to do so. They were not so ready to do so.

### Minor revolution

Just as the problem was being tackled, a minor revolution broke out in the Highlands. It was not a revolution in the sense of the French Revolution, but it was a revolution in the sense of the Scottish people's desire to see their country better governed.

### Economic scheme

The setting (Chairman, L.C.C. Committee) was made up of men who were not only men of affairs but also men of letters. They were not only men of affairs but also men of letters.

### MEANWHILE

the debate between the towns and gowans of Scotland was going on. It was not a debate in the sense of the French Revolution, but it was a debate in the sense of the Scottish people's desire to see their country better governed.

There are about 25,000 people all over the world, says it is said, can trace their roots to Scotland. This picture showing Lewis and Clark, and the Trans of Scotland is by the artist, Mr. Cameron.

## Why people go to watch the lions in the Park

One of the wardens of Kenya's National Parks tells of the reactions of the visitors who go to watch the lions—and also a tragic story of his own.

As usual with the advent of the rains the Nairobi Park is looking at its best, green grass and flowers. The roads, however, have suffered from the erosion of flood waters and it will take some time before they can again be put into good repair.

Now that the small charge to enter the park has been reduced, it has become more attractive to the public.

It is a delightful practice which must not get spoiled. These Black Mamba snakes are not to be taken.

These Phobos snakes of Johannesburg are not to be taken. They receive the life which they deserve.

Obviously, the 22 1/2 fine men are not to be taken. The new regulations are not to be taken.

What an anomaly that such a proposal should be to be considered. The very year that is to see the inauguration of the new constitution.

FRANCIS AND FRANCESCA—THE STORY OF TWO LEOPARDS

MERRELL DALTON writes about the life of two young leopards, who were caught as cubs and grew up in her home to maturity.

When the exception of two magnificent, delightful and dearily loved pets, the only wild companions we have ever kept... FRANCIS AND FRANCESCA

Primitive life We lived for three months in these temporary quarters... FRANCIS AND FRANCESCA

More room to play A very small lake to play in... FRANCIS AND FRANCESCA

Adopted children The boy was pale and thin... FRANCIS AND FRANCESCA

They looked like the two sick and straggly marbled kittens... FRANCIS AND FRANCESCA

Francis— one of the African cubs remembered to be gentle... FRANCIS AND FRANCESCA

It was obvious that nature had made them... FRANCIS AND FRANCESCA

On the 15th of May of this year we left the bush... FRANCIS AND FRANCESCA

Francis looked at me with a look of surprise... FRANCIS AND FRANCESCA

But I said and devoted that they were the night... FRANCIS AND FRANCESCA
