INGRAM & CO'S GARDEN TOOLS THE TOOL HOUSE

Why has the Windmill fallen into disuse? Because, with the help of the "Gradual Reduction" roller system, about 1880, flour of a purity hitherto unknown came on the market, and the produce of the windmills could not be sold. Progress has been maintained, and "Kenya's Paramount" flour, milled in Nairobi in a roller plant embodying the very latest practice, is everything a really good flour should be.

Indicaps Upon the Mining Industry.

ASSOCIATED CHAMBERS CRITICISE THE ROYALTY PRINCIPLE.

Tax on Profits Urged.

RETENTION OF THE MINES DEPARTMENT AS A SEPARATE UNIT.

Association of Chambers of Commerce has expressed the hope that in view of the economic importance of the mining industry, Government will give due consideration to any proposal put forward by the industry to alter the present method of obtaining revenue.

It was suggested by the delegate of the Nakuru Chamber that the system of royalties on the value of minerals was onerous and that the tax levied should be on company profits.

It was also urged that amendment of the Ordinance by elimination of the principle of discovery points should receive immediate consideration.

The Association also presses for the retention of the Mines Department as a separate entity.

Discovery Peg Difficulties.

Mombasa. The Wednesday morning the members of the Chamber of Commerce discussed the question of Mining Ordinances in Kenya, the subject being brought forward as that of the Nakuru Chamber. The subject was discussed in a preliminary reference to the Kenya Chamber of Commerce where the Government levied a five per cent tax on all gold which would be sold to the Crown except the gold of the British South Africa Company which would remain with the Government for a period of 25,000,000. Colonel Griffiths announced that the Government had paid a bonus on all gold mined in South Africa and that the Government was a tax on profits of discovery.

Discovery Points.

Colonel Griffiths then proceeded to outline the reason for his second resolution which read as follows:— "The development of the Kakamega field is being retarded by the discovery of discovery points. The question of amending the Mining Ordinance should receive immediate consideration. He said that originally the question of pegging claims the Government compelled people to go from East to West and then back to East. This had changed the whole principle and in every case where a peg is put in only a spot where gold is known to exist. The one peg in the prospecter was allowed to claim ground for a radius of 400 yards—400 feet all round the discovery peg. All claims of 400 yards—400 feet all round the discovery peg. All claims of 400 yards—400 feet all round the discovery peg. All claims of 400 yards—400 feet all round the discovery peg.

Imprecisely.

Other countries had tried this principle, and they were not doing so well. The principle of discovery points was both imprecise and unfair. It was pointed out that the Government should start at the beginning and that the discovery of a company should be to the west, all the ground covered by the company should be theirs. It was pointed out that the Government should start at the beginning and that the discovery of a company should be to the west, all the ground covered by the company should be theirs.

The Best Way.

Colonel Griffiths indicated a tax on gold which is to be placed on the gold as it is mined. It was pointed out that the Government should start at the beginning and that the discovery of a company should be to the west, all the ground covered by the company should be theirs.

Imprecisely.

It was pointed out that the Government should start at the beginning and that the discovery of a company should be to the west, all the ground covered by the company should be theirs.

The Miss Department.

In his third resolution Colonel Griffiths appealed for the retention of the Mines Department as a separate entity. He said that originally the question of pegging claims the Government compelled people to go from East to West and then back to East. This had changed the whole principle and in every case where a peg is put in only a spot where gold is known to exist.

Dr. Schacht (Germany) speaking in English, said that after more than six weeks' arduous work he regretted to see the meeting adjourned.

Improvements to the Course.
TEAMS TO MEET KIAMBU
Propose to Organise an International Match

(Club.)
The regular drop of rain has improved the course tremendously, but it will take a lot more, however, to get it back to anything like its former glory. What little there has been, has never once welcomed, particularly by the "Droms" Committee. The "Droms" have, in the opinion of the course, become rather an excuse, but now the rains should be making both the sand, and the barrow, and also gradually fading away, to Kiambu will be a little welcome.

The "Droms" are steadily re-arranging the share of attention, and will, in the opinion of the "Droms", be well satisfied. Most of the men who have played over the course recently, are all agreed that the "Droms" are playing better than ever they did.

Some of the reasons, which is to be played over our course next month, are coming rapidly, and there is every prospect of a record number competing. From club there are seven to date, and there are still one or two who have not yet played, but they are all agreed that they will be doing so before the year's championship will be over.

With regard to the "Droms", they are showing a great advance, and are playing better than ever they did. Most of the men who have played over the course recently, are all agreed that the "Droms" are playing better than ever they did.

TACTICS IN GOLF.

Legislation Against Element of Luck.
A Fundamental Rule of the Game.
"SPLITTING HAIRS"
The Ball Must Be Played From Where It Lies

It is a rule of golf that a player's ball must be played from where it lies. This is a fundamental rule of the game, and it is one that has been the subject of much discussion in recent years. The reason for this is that many players have tried to "split hairs" by arguing that a ball is not in its proper position if it is lying on a patch of grass, or on a fairway, or on a green. They have argued that the ball should be moved to a more favorable position, and this has led to a great deal of controversy.

Legislation has been introduced to clarify this rule, and it is now clear that a ball must be played from where it lies, unless it is in a hazard or on a green. This is a fundamental rule of the game, and it is one that has been the subject of much discussion in recent years.

At the present time, and under the existing state of affairs, a player's ball must be played from where it lies. This is a fundamental rule of the game, and it is one that has been the subject of much discussion in recent years.

Secretary of State and Kavirondo Petition. SIGNED BY NATIVES LIVING OUTSIDE KAKAMEGA.

Archdeacon Owen's Activities. TIME TO DEAL WITH MATTERS REMOTELY CONNECTED WITH SPIRITUAL CHARGE.

The Secretary of State for the Colonies in his speech on the Colonial Office Estimates, vigorously criticized the contents of the Kavirondo Petition recently submitted to the House on the subject of the goldfields. He dealt with the "strange coincidence" that if Archdeacon Owen did not stimulate the petition, the names of the natives who signed it appeared to be in the Kakamega area while they nearly all appeared in Archdeacon Owen's area.

AVOID CHEAP PAINT

It looks so pretty but the woodwork of a very bad state and the walls are so shabby. How often do you hear that remark made when your friends are thinking of buying a property—result sale lost. Closer Union Again.

The very brief discussion which apparently took place at the meeting of the Association of Chambers of Commerce of Eastern Africa at Mombasa this week when the Association (the Indian representative of the Dar es Salaam Chamber presiding from voting) reaffirmed the belief in the necessity for a closer Union of the Territories and instructed the Executive to press the matter with renewed vigour does not give a sufficiently complete picture of the reasons which animated these representatives of the commercial community in requesting this step. The movement found strong support among the Mombasa delegates. Mombasa has always regarded the diversion of the three Territories from the Union as not only unjust but also a serious matter. It is from a commercial point of view, clearly so-called of an essential service and the establishment of a strong Central Authority is essential to the welfare of East Africa. The new terms of the German settlement of agitators in former German colonies, particularly Tanganyika. That agitation is not confined to Germany. It exists among the German settlers in the Mandated Territory and there is every reason to believe that a very good link-up exists among them linking up all the scattered groups throughout the country. Recent political events in Germany indicate.

whether it can do so. The Government have early mentioned here and there, and in Germany and a will necessary for the people in the Territories, and particularly in Kenya, to consider whether the time is ripe for reconsideration of the proposal. It was reported by the Joint Select Committee and that repetition in the present state of the Imperial Government. But it is a strong desire by the East African States to make their present relations more definite by a constitutional change. An examination would tend in that direction. It involves political changes and before the proposed energy can be effectively applied it will be necessary to make contact with other systems of public opinion in order to discover whether they are of the same mind and to see how far and by what means the energy is to be applied. If any request for closer Union is to be presented it must come one day if there is no external interference with the control of the Territory it can only do so if it is based on a sound well-advanced and very unanimous opinion prepared to consider the sacrifices to be made. If Kenya believed the control over finances recently sought, that in itself would be a long and arduous task. The country that the domestic position was such enough to permit consideration of questions which directly affect the influence of a Central Authority and an inter-territorial Council in which there were three parties. Closer Union is a big issue and it must be most carefully and cautiously handled. Without question, of course, a courageous step would be taken which would benefit the whole East African structure give a much-needed stimulus to the development of Tanganyika and Kenya, and equip these Territories with the means to face their joint development on lines which would very soon make them as a unit, one of the most important and prosperous parts of the Empire. With the amalgamation of the Rhodesias on the horizon it is time that East Africans begin to think in larger ranges.

KAMPALA-JUJA ROAD.

Improving Views at End Career.

By FRANKLIN B. CONNORWAY. Kampala, July 24. It is very pleasing to note that the road from Kampala to Juba is being improved from the point of view of the drivers. Drivers are being cleared of the high old-fashioned grass which used to come up to the level of the road track, and now in many places, it is possible to see across these corners, instead of cramping round and wondering whether a motor bus would be able to negotiate in going to meet you. Our roads are still too narrow but the clearance of bush on these bends and corners is a distinct improvement and an addition to the safety of the motorist. One often wonders why these clearances are not made permanently by planting short grass on these dangerous points. The initial cost might be heavy but the upkeep in a year or two should be practically nil.

A New Road.

Then we have the new road which is being built from Kampala through Molo to the Congo border where it will join the Belgian road from Butera. This is likely to be ready in September and His Excellency is opening the road on his way to Lake Kivu. Road maintenance on the Congo has vastly improved in the last few years and another road through Kivu is being constructed which will add a further route to the existing one.

The Right Hon. Winston Churchill, First Lord of the Admiralty, arrived in London on the 25th of July. He was met at the Victoria Station by a large number of his admirers. There were many of his admirers but one of the most notable was a young man who was dressed in a military uniform. COORDINATION OF SERVICES UNDER STRONG CENTRAL AUTHORITY.

The question of Closer Union has been re-opened by the Association of Chambers of Commerce of Eastern Africa in a resolution re-affirming the views placed before Sir Samuel Wilson in 1929 in which a demand for the earliest possible re-creation of the central services in the three territories was expressed.

The Executive was instructed at the meeting in Mombasa this week to press forward the aims with "renewed energy."

Some speakers considered that there was a great need to provide a counter-blast to the agitation in Germany for the return of colonial possessions.

KENYA COFFEE PRICES.

To the Editor "E. A. Standard." Sir,—There has recently been some correspondence in the "East African Standard" on the subject of coffee prices in the course of which Mr. Quentin Morgan, account for Kenya Coffee, has been mentioned in connection with the price for Kenya Coffee. It is interesting to note that in the advertisement in question, which appeared in the Standard, Mr. Morgan is quoted as saying that he is in error in thinking that the retail price of the coffee is as high as £100. I believe, however, as much by the quality of the coffee as by the quantity of the coffee.

The list of coffee for sale in the Standard is as follows: "Empire Green Coffee: No. 4194 Good Kenya Coffee, 2/3 per lb. No. 4195 First Kenya Coffee, 2/11 per lb. The wholesale price of the very fine parcels of Kenya A grade coffee is about 1/2 per lb. while the 'good' Kenya could be bought for 1/4 per lb. wholesale. Of course, to these prices, the coffee dealer has to add the cost of the duty, now insignificant in the case of Empire Green—and the loss of about 10 per cent in weight in the process of roasting must also be taken into consideration.

Unless members of the committee of the firm in question take a hand in popularizing our coffee by so doing the price to the public will continue to rise. It is interesting to note that in the advertisement in question, which appeared in the Standard, Mr. Morgan is quoted as saying that he is in error in thinking that the retail price of the coffee is as high as £100. I believe, however, as much by the quality of the coffee as by the quantity of the coffee.

HORSE BREEDING IN KENYA.

To the Editor "E. A. Standard." Sir,—I see the opinion expressed in your issue of July 26, 1926, that horse breeding in Kenya is being discussed in the "East African Standard." It is a very important subject for breeders. The fact is that the Kenya breeders' association is not yet formed, and it is not yet possible to say whether the Kenya breeders' association will be formed. It is a very important subject for breeders.

SUICIDE VERDICTS.

The Editor "E. A. Standard." Sir,—I have recently read in your issue of July 26, 1926, an account of a man who had committed suicide. It is interesting to note that in the advertisement in question, which appeared in the Standard, Mr. Morgan is quoted as saying that he is in error in thinking that the retail price of the coffee is as high as £100. I believe, however, as much by the quality of the coffee as by the quantity of the coffee.

"As I want the washing done well, and without damage, I insist on Sunlight Soap being used. The clothes are safe with Sunlight, for its soft, free lather simply carries out the dirt without hard rubbing and makes them beautifully soft and clean. And how nice the clothes smell after being washed with Sunlight! Never ruin your clothes by using harsh, impure soaps."

After dinner one evening I had of our paired two jugs into two liquor glasses and submitted them to the judgment of an independent wine merchant. "What do you think of them?" he enquired. The wine merchant took the glasses, tilted the whisky round them, sniffed them carefully and selected one and, pointing to it, said, "That's so good you'd enjoy it as a liquor." The whisky was our ten year old SPEY ROYAL.

TO DISCUSS RELATIONSHIPS WHEN CHAIRMAN VISITS EAST AFRICA.

The Joint East African Board and its status as representative of the commercial community in East Africa came under frank discussion at Mombasa this week when a resolution was proposed on behalf of the Nairobi Chamber of Commerce...

Interesting sidelights on the controversy were provided by Mr. W. A. M. Kim, the Association's representative on the Board.

Several delegates felt that while the Board was wrong in rushing to conclusions, its past help should not be forgotten and that in the Board East Africa had a powerful instrument.

On the other hand emphasis was laid on the need to be held by up-country Chambers that the Board should be a co-ordinating body only and that the relationship between it and opinion in the dependent areas should be clarified...

Crown Prince's Call to Belgium.

BIGGER STATE INTEREST NEEDED IN FUTURE OF CONGO.

Backward Natives. The Crown Prince Leopold of Belgium created a sensation in the Senate on Tuesday when he called upon Belgium to take a greater interest in the development of the Congo. He blamed those who believed solely in private enterprise for the increasing Budget deficit and criticised the present moral and material condition of the native people.

Private Enterprise Not Enough.

By wireless. The moral and material condition of the Congo is not as efficiently developed as it should be. The Budget deficit was increasing and the responsibility for this was placed on the private enterprise. He concluded by advising the adoption of a 'Belgian' policy of development of the Congo.

Commerce and the Alternatives.

PROPOSED REDUCTION IN THE TAX ON DECK PASSENGERS.

Trade Licences Bill.

ASSOCIATED CHAMBERS DESIRE REVIEW OF POSITION AT END OF 1934.

Commercial opinion on some of the alternative taxes was expressed in detail during discussion by the delegates to the session of the Associated Chambers at Mombasa on Tuesday.

In regard to the Package Tax the opinion was expressed that there should be definitely included in the Bill provision for the exemption of local products of Uganda, Tanganyika and Zanzibar.

On the motion of the Indian delegates a resolution was adopted proposing reduction of the tax on deck passengers from 5/- to 2/6.

The Association desire Government to agree to introduce provisions for the termination of the proposed Trade Licences Ordinance at the end of 1934—as is the case with the other principal Bills—in order that the question of direct taxation on commerce can be reviewed in the light of experience.

Package Tax Restriction.

Mombasa, Tuesday. The session of the Association of Chambers of Commerce of Eastern Africa closed this morning with the proposed alternative forms of taxation in Kenya.

Mr. T. A. Wood (Nairobi) opened the discussion with a reference to the package tax. Under the proposed Bill, he said, the tax on imported packages was 25 cents per package. There were, however, numerous small articles which were imported individually and not in bulk, where a tax of 20 cents on each article would be a heavy charge on such goods as fertilisers.

He referred to the fact that the package tax was a heavy charge on such goods as fertilisers and suggested that the tax should be reduced to 10 per cent of the total value.

He suggested that the definition of bulk goods should be interpreted to include packages of whole and half bushels of such goods as wheat and maize.

Mr. W. K. Foster (Nairobi) agreed with Mr. Phillips and suggested that the definition of bulk goods should be interpreted to include packages of whole and half bushels of such goods as wheat and maize.

A Weed's Threat to Cultivation.

The question of Mexican Mariigold was brought up at a recent meeting of the committee of the Kenya Native Association, and during the subsequent discussion in the week it was stressed that it was an alarming pest which in this and other districts (the weed is a very prolific source of insects from the weed, because of the fact that it grows under cover, and the root and railway reserves seem to be dangerous weeds where the weed is so prevalent. After rain the weeds are washed along for considerable distances, thereby inflicting other places.

Petrol Produced from British Coal. GOVERNMENT TO GIVE TEN YEARS' PREFERENCE. A Big Scheme. SEQUEL TO RESEARCH BY IMPERIAL CHEMICAL INDUSTRIES.

Important developments have taken place in the manufacture of home-produced motor spirit in Britain. Under the plan in view, 3,000,000 gallons of petrol will be manufactured annually...

Legislation is being introduced in the Autumn to provide a guaranteed preference of fourpence a gallon for ten years on this British petrol.

The scheme is likely to provide employment for some 25,000 people.

Employment for 12,000 People. [BY WIRELESS].

The Prime Minister announced in the House of Commons that legislation would be introduced to provide employment for 12,000 people in the coal and iron industries.

Immediate Response. There was employment in the coal and iron industries in 1925-26 to the value of £40,000,000.

Plant for the production of an extra 1,000,000 tons of coal will give direct employment to 2,000 men.

The Government has announced that it will give a preference of 10s. per ton on coal produced in this country from indigenous coal.

The guarantee would be for ten years from April 1st, 1927, and would be subject to the period of guarantee being at least five years.

Big Advantages. If the preference remained at its present level of 10s. per ton, the coal and iron industry would be able to add to the output of the country.

As part of the plan for recovery which the President of the United States has evolved, a determined onslaught is to be made upon unemployment. The Government proposes to adopt a system of issuing badges to all employers who adopt a helpful policy in order to shame slackers. The ordinary current expenses of the United States have now been brought within the revenue and much of the emergency expenditure in the form of loans to strengthen the basis of the national credit.

Restoration of Purchasing Power.

Eldoret Hospital.

REIDENT'S REPLY TO FARMER CRITIC. To the Editor "E.A. Standard," Sir, I should like to reply to the letter from the Hon'y B. Farmer, N. Kenya, which you published in your paper a few days ago.

The Association appears to be under misapprehension as to its really "bank" that the Eldoret Municipal Board is anxious to raise to keep up the daily rates to be levied on the property. The present minimum daily rate of Shs. 18/- must surely be the lowest rate charged in any European Hospital or Nursing Home in the country.

The report made to the Municipal Council if I remember rightly, was to the effect that the population of the area was being increased to the extent of 1000 persons in the Eldoret hospital owing to the fact that the Government officials charged the local population lower fees than the Eldoret practitioners who charged 10/- per day for their living. The matter was however referred to the General Board for consideration.

The intention of Eldoret is that the Government or the Municipal Board should not be responsible for the hospital, but that the Government should be responsible for the hospital, but that the Government should be responsible for the hospital, but that the Government should be responsible for the hospital.

It is a pity that the Government should be responsible for the hospital, but that the Government should be responsible for the hospital, but that the Government should be responsible for the hospital, but that the Government should be responsible for the hospital.

question "task of what?" Your reasonable would be "granting self-government by stages." I should ask in India, but I am not sure if it is the same in India and here.

As I know better the proposal of a constitution which is a grant of self-government, finance, and other services are under the control of the Government and the reserved subjects even in the present. My only task is to see that the Government is not in a position to do anything to the detriment of the people.

It is a pity that the Government should be responsible for the hospital, but that the Government should be responsible for the hospital, but that the Government should be responsible for the hospital, but that the Government should be responsible for the hospital.

OPENING OF HALF-YEARLY SESSION AT MOMBASA.

Future of Tanganyika.

NO WEAKENING OF THE EXISTING COMMERCIAL TIES CAN BE TOLERATED.

In opening the half-yearly session of the Association of Chambers of Commerce of Eastern Africa at Mombasa yesterday the President in a reference to the proposals for new taxation stressed the fact that the Association was of the opinion that any new national taxation should be only of a temporary nature and that it was the duty of the East African Governments to restrict expenditure to absolute essentials.

The President speaking of the clamour for a change in the Mandate in Tanganyika said that certain quarters had thought it was time the commercial community in East Africa made it quite clear that Kenya, Uganda and Tanganyika would not tolerate any weakening of the arrangements by which there was a free interchange of goods and peoples between the territories.

Whilst it was likely that the drought would affect the amount of exportable tonnage next year and the partial failure of the coffee crop might have an adverse effect on Kenya trade the latter would be to some extent compensated for he thought by the increased production of goods and peoples between the territories.
