## Change in welfare policy CRITICISM BY UGANDA

The Uganda Government's new welfare policy has met with criticism from members of the House of Lords, who have criticized the Minister of Social Development, Mr. K. It was said that the Government had passed the buck to the local authorities. Mr. Laban said that the Government had no money to spend on urban areas, and that the local authorities had to take care of their own responsibilities. # WEEK-END STANDARD LEAGUE OF MERCY—A GOOD SAMARITAN FOR HALF-CENTURY

By Lesley Clay

In this day and age of high-flavored publicity, when charities so well as citizens are constrained to advertise and good causes must catch the public eye and so if they are to continue to benefit by voluntary means, the League of Mercy has been a little backward. At least that is my opinion.

Not that anyone would wish the spotlight of publicity to play on its laudable and unprofitable work for distressed people since its year 1891, when the League was founded, possibly — and surely — to be better known than it is.

Let me say at once that all investigative consideration by the League into cases of distress had hardly set out in its early days. That is, it is not until the Second Civil War that it began to receive attention from the charitable public. It was in 1862 that it began to receive attention from the charitable public. It was in 1862 that it began to receive attention from the charitable public.

## Happy youth and carefree old age

Some of the residents, such as the girls at the Ladies' Pension Home.

When the Ladies' Pension Home was founded in 1891, it was for the benefit of old people who were unable to support themselves. The home has since grown to include a school for the girls, a day school for the old, and a nursing center for the infirm.

The girls at the school are happy and carefree, and the old people at the pension home are also happy and carefree. The home has a beautiful garden and a large dining room where the residents can enjoy their meals.

Through the kindness of the donors, the home has been able to provide the best of care for its residents.

### ADOPTED GIRLS

At that time the League was the only organization in the city that provided a home for the girls. The girls were adopted by the League and were given a home and a family.

### OTHER CASES

Other cases of distress were also handled by the League. The League provided a home for the girls and a family for the old people.

## Kenya economy 'on even keel' - need for co-operation SCHOOL FEE RISE OPPOSED Member says farmers' share unfair

**FARMERS** with children at boarding school would bear an unfair proportion of the proposals to increase secondary school tuition during the resumed education Council Mrs. A. N. Shaw (Nyuzia) said that farmers were forced to send their children to boarding schools because day schools were out of reach.

The proposed increases amounted to a total of 23 per cent for each class at boarding schools. The proposal was not recommended to be used if a reduction could be made. Mrs. Shaw urged the Government that it would thus might offset the revenue expected from the increase.

### Expenditure cut 'overdue'

After congratulating Mr. Vasey on his considerable achievement in keeping Kenya financially on a 'steady and even keel', Mrs. Shaw said she did not know why the Government's £1,000,000 economy cut could not have been introduced a year or two ago.

"Our Minister has not lacked courage or faith in the future of Kenya and we must finally thank the spirit of co-operation, a promise of which was made to us either day by the formation of our own State," Mrs. Shaw said.

**what makes  
a specialised  
service cheaper**

Auto electrical service stands an expensive reputation. Oddly enough, it needn't be. Its expense, particularly to those who own C.A.V. equipment, has been, we are probably aware, the electrical equipment which is fitted to every British car. The latter is its commercial vehicle counterpart.

Diagnosis and repair of electrical faults can stump many of the technology-minded and even cause much head-scratching to the average mechanic. K.R.G.T. Auto electrical service is operated by technicians expressly trained for this work, aided by modern precision test machinery.

It is cheaper to use K.R.G.T. Auto electrical service because fault diagnosis is more rapid and more quickly, accurately corrected.

Well, look! The Coronation Safari is a trial over a 3,200 mile route. It is a test of the car's reliability in the worst of conditions. It is a test of the car's performance in the most difficult terrain. It is a test of the car's durability in the most demanding conditions.

And now you look at the Ford Zephyr... you see a car that has passed this test with flying colours. You see a car that has proven its reliability and performance in the most demanding conditions.

# WEEK-END STANDARD TANNERS OF MACHAKOS LAY CLAIM TO A WORLD TITLE

By J. A. Lyall

**MACHAKOS** claims to be the place in the world where black men are being trained in the complete craft of tanning skins.

In a group of men meeting on the Kapsir Road, established by Kinnear's 1911 "white" tannery, the tanners of Machakos laid claim to the world title of being the only place where black men are being trained in the complete craft of tanning skins.

The buildings were about 25,000 of which the Kenya Government purchased half while the remainder was retained by the Kapsir tannery.

## Wifely influence on male fashions

By JEAN GRANHAM

Do you decide what your husband wears? If you do, you're not alone. Many women are influencing their husbands' fashions in a big way.

There are several reasons why women are influencing their husbands' fashions. One is that women are becoming more fashion-conscious themselves. Another is that women are becoming more influential in the home.

The husband who is influenced by his wife's taste in fashion is usually a man who is well-dressed and who is interested in the latest fashions. He is usually a man who is well-to-do and who is well-educated.

## JAPANESE GIRLS CHOOSE CLOTHES BY PERFUME

By EYDNEY BROOKES

When a favorite fragrance leads to a choice of clothes, it is a sign of a woman's taste. In Japan, girls are choosing their clothes by the perfume they wear.

Next came a line of simple, sporty underwear. Its simplicity suggested that models should choose her dress for the day with the idea of matching the perfume available in her wardrobe.

Some of the models wore a simple, sporty, sleeveless dress. Others wore a simple, sporty, sleeveless dress with a high collar.

There were some notes of interest in the public reception of all this.

How asked into women's wear, colorists, choice of lock, cover of a new fashion personality to pose in all the models.

# Fastening the poison of hatred and nectar of friendship

It is a curious thing that the world is so full of hatred and so full of friendship. The two are like the two sides of a coin, and they are both necessary to the human condition. Hatred is the poison that makes life bitter, and friendship is the nectar that makes it sweet. We are born with a heart that is capable of both, and it is up to us to choose which we will follow. The world is a stage, and we are the actors in it. We must play our part to the best of our ability, and we must do so with a clear conscience and a pure heart. The world is a great and wonderful place, and it is full of so much to love and so much to hate. We must learn to love what is good and to hate what is evil, and we must do so with a firm and steady hand. The world is a great and wonderful place, and it is full of so much to love and so much to hate. We must learn to love what is good and to hate what is evil, and we must do so with a firm and steady hand.

**On the brink**

All whites look fairly white at a distance - but it's the close-up look that tells you when clothes have been washed in Omo, the wonderful blue powder.

That pretty little dress she's wearing catches your eye because it's white, really white. Blue Omo gives you the whitest wash in the world - everything has that

'optimal' look about it that even to be admired. If you wash with Blue Omo you are the envy of others - white, and at the coldest change - they envy you for and brighten on the day they wear you. ### —DOWN ON THE FARM

By Jean Vaughan

CHILDREN living on East African farms have a wonderful opportunity to keep a wide variety of pets — not only puppies, kittens and lambs, but orphaned and abandoned, mostly baby animals, brought in by the herd boys.

When the children go back to school, it falls to mother's lot to care for the animals. Few mothers, however, are fortunate enough to see their own animals at Mrs. M. D. Graham's farm at Allie River.

Max Graham is a farmer, by his training and occupation at Rhodes University in South Africa, but he was always interested in animals — mostly birds, but especially — and during the last few years, especially mammals and also, most of the mammals with scientific interest.

Practical work on the farm of the mother and child is a regular feature of the Graham family. The children are not in a laboratory, but in the field, and the animals are not in a laboratory, but in the field, and the animals are not in a laboratory, but in the field.

## MULTIGRADE PROTECTS...because it's the new all-temperature engine oil

- PROTECTS your engine—
- PROTECTS your battery—
- PROTECTS your pocket—

This low-diluting oil bestically protects your engine during the vital warm-up period. Multigrade's low-based oil does more quickly, correct starting, less drain on your battery.

actual tests prove that Multigrade gives better fuel economy — up to 18 per cent more on everyday stop-start driving.

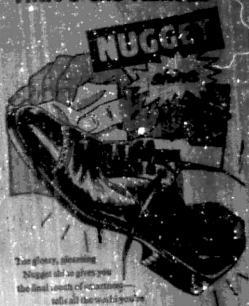

ARE YOU A REGULAR CHANGER? Every time you change the oil you get a new dose of life. That's because regular oil changes are essential for the life of your engine. Shell X-100 Motor Oil is the best oil for your engine.

THIS IS WHY: Shell X-100 Multigrade is the modern, all-temperature motor oil, specially adapted for East Africa conditions. It's thick when the engine is cold, lubricates smoothly, and settles on starting. Yet when in extreme heat, it provides an outstanding oil cushion between moving parts, even when temperatures of 150° C or more are reached.

Oil is cheaper than metal — USE SHELL X-100 MOTOR OIL
