from this abuse.

Under the intense heat developed by Motorcar engines in this country ordinary lubricating oil forms great quantities of black sediment which has no lubricating value.

SOCONY oils resist heat to an unusual degree. Sediment in reduced 80 per cent.

Have your engine flushed out to clear it of grit and sediment. Put in Socony oil. You will notice the difference at once.

There is a special grade for your car. Do not put in too ght or too heavy a grade. Ask your dealer or garage for the correct grade of Socony for your car.
