"Inert and Passive Benevolence" to France.

FRENCH DESCRIPTION OF BRITISH ATTITUDE.

The London Negotiations.

DESIRE FOR STRICT FULFILMENT OF EXISTING PLEDGES.

It is stated that during the conversations in London between the British and French delegations which have now concluded, Britain gave no pledges, but clearly stressed the desire for strict fulfilment of existing pledges.

A Paris newspaper sums up the British attitude towards French aspirations as being one of "inert and passive benevolence."

The subjects discussed during the conversations included the French proposals for additional mutual security in Eastern Europe, the future of the Disarmament Conference and the next year's Naval Conference. It was announced in a communiqué that the talks enabled the two Governments clearly to appreciate their respective standpoints.

Eastern Europe Situation.

[BY WIRELESS.]

In the House, July 9. Mr. Stanley Baldwin was asked whether he would inform the House of the object of the recent visit of the Secretary for War, Lord Halifax, to France and the visit of Mr. Barthou to England, and whether the Government contemplated making any arrangements, or had made any arrangements, for a meeting without consultation with the League of Nations, with reference to mutual action in case of hostilities breaking out in Europe.

Mr. Baldwin replied: "The recent visit to France of Lord Halifax was without any special importance and was undertaken in connection with an inspection of our military installations in the late War made by several of our officers as a matter of interest. Such tours have taken place on more than one occasion in the past."

Regarding Mr. Barthou's visit, Mr. Baldwin returned the question to Sir John Simon's recent answer to a similar query in which the Foreign Secretary stated that Mr. Barthou's visit "would afford an opportunity to discuss with him questions of mutual interest to France of this Country."

A further visit. Further asked if it might be taken that not only had Lord Halifax's visit to France of a political significance but that the same applied to the visit of the General Weygand to Britain. Mr. Baldwin replied: "There is nothing in these matters of interest that which I have said."

London and Disarmament. Sir John Simon, the Foreign Secretary, will personally welcome the French Foreign Minister, M. Barthou, on his arrival in London on Monday at the Foreign Office. The negotiations will begin on Monday at the Foreign Office, and after the interview will be held at the residence to the visitors will be given.

In the evening a dinner will be held at the French Embassy. The evening will conclude on Tuesday afternoon. He and other delegates will be the guests of Mr. Stanley Baldwin at the residence at No. 11, Downing Street on that day.

A Warm Welcome. "The Times," commenting on the visit, awards Mr. Barthou of

THE FRENCH NAVY. 1934 Building Programme.

Approved by Senate.

INFLUENCED BY ITALIAN ACTION.

[BY WIRELESS.]

The Senate by 251 votes to 122 has passed the Naval Construction Bill, which has already been adopted by the Chamber, providing for a second ship of the "Dunkerque" class (36,500 tons), a destroyer and two submarines. M. Piarri announced that another capital unit would be laid down before the 1935 Naval Conference, though he was unable to say whether of the "35,000-ton class" or of the "30,000-ton class, but he hoped that it would not be the latter. His announcement was presumably influenced by Italy's programme to lay down two new 35,000-ton capital ships.

SERIOUS OUTBREAK IN GERMANY.

[BY WIRELESS.]

The Freiburg University in Baden is slight and total destruction of Germany and the helplessness owing to the drought. Professors and students are working hard to rescue the irrevocable library.

The Ludovico Albertina University at Freiburg-in-Breisgau in Baden is one of the prominent universities in Germany, founded in 1457 by Albert VI. Austria. The university library contains upwards of 250,000 volumes and 600 valuable manuscripts. Freiburg-in-Breisgau is situated near the Black Forest range about 40 miles north of Baden.

THE RUBBER INDUSTRY. Outlook Better Than Year or Two Ago.

[BY WIRELESS.]

The Secretary of the Colonial, Sir Philip Cunliffe-Lester, yesterday stated that the rubber industry was incomparably better than most export industries in 1930. He said that the rubber industry was incomparably better than most export industries in 1930. He said that the rubber industry was incomparably better than most export industries in 1930.

Unemployment in Amsterdam.

CLASHES BETWEEN COMMUNISTS AND POLICE.

Resolution in the House.

WHOLE POLICE FORCE OF THE CITY CALLED TO ONE AREA.

Unemployment pay led to serious riots.

So serious did the situation become that the police were given instructions to clear the usual primary labour centres.

Searchlight had to be used to quell the riots as all streets were in the dark.

A Motor Cycle Charge.

Amsterdam, July 10. The trial continues up to the tenth week of the trial and 30 in-

cluding the British surveying ship Frolic, Captain A. L. Jackson, the "Enderby" and several other post-war cruisers, the "Hindon," touched at Amsterdam during her world cruise in 1929-30, including Aden, Bombay, Seychelles, Auckland, and Wellington.

In August, 1931, accompanied by the British surveying ship Frolic, Captain A. L. Jackson, the "Enderby" and several other post-war cruisers, the "Hindon," touched at Amsterdam during her world cruise in 1929-30, including Aden, Bombay, Seychelles, Auckland, and Wellington.

In 1931, the "Katharine" was in the course of a world cruise, visiting Bombay, Zanzibar, and Aden, and in 1932 the "Katharine" was seen at Alexandria, Moscow, and in Australia.

The "Hindon" and "Lepiz" completed in 1929 and 1931, are of 6,000 tons, 32 knots, and carry two 5.5in. and four 3.4in. anti-aircraft guns, with 12 torpedo tubes. They carry from 500 to 640 officers and men each.

The "Hindon" and "Lepiz" completed in 1929 and 1931, are of 6,000 tons, 32 knots, and carry two 5.5in. and four 3.4in. anti-aircraft guns, with 12 torpedo tubes. They carry from 500 to 640 officers and men each.

GERMAN CRUISERS AT PORTSMOUTH.

First Visit to British Port Since the War.

A RETURN CALL.

[BY WIRELESS.]

The German cruisers "Koenigsberg" and "Leipzig" reached Portsmouth this morning on a four days visit, the first that any German warships have paid to a British naval port since the war. The customary salutes were exchanged. British Official Wireless Service.

"This visit is a return to that paid to Kiel for a week in July, 1931, by the British cruisers Dorsetshire and Norfolk under the command of Rear-Admiral (now Vice-Admiral) E. A. Astley-Rush-ton."

On several occasions since the war German vessels have visited British ports, but the first of the post-war cruisers, the "Hindon," touched at Amsterdam during her world cruise in 1929-30, including Aden, Bombay, Seychelles, Auckland, and Wellington.

In August, 1931, accompanied by the British surveying ship Frolic, Captain A. L. Jackson, the "Enderby" and several other post-war cruisers, the "Hindon," touched at Amsterdam during her world cruise in 1929-30, including Aden, Bombay, Seychelles, Auckland, and Wellington.

In 1931, the "Katharine" was in the course of a world cruise, visiting Bombay, Zanzibar, and Aden, and in 1932 the "Katharine" was seen at Alexandria, Moscow, and in Australia.

The "Hindon" and "Lepiz" completed in 1929 and 1931, are of 6,000 tons, 32 knots, and carry two 5.5in. and four 3.4in. anti-aircraft guns, with 12 torpedo tubes. They carry from 500 to 640 officers and men each.

THE GERMAN REVOLT. Employment in Britain.

Further Increase During June.

A REASONABLE OVER-CORRECTION.

[BY WIRELESS.]

The June return of employment shows a large number of temporary stoppages of work in the coal industry, seasonal, and in consequence of the hot weather, with seasonal slackening in certain other trades, more than counter-balancing the increase in employment during the period under review in the iron and steel, engineering, shipbuilding, and electrical apparatus industry as well as in shipping and dock and harbour services.

An addition of 2,205 in the number of unemployed registered in the previous month is in consequence recorded and the total, including men, boys, women and children, is 2,092,558. This figure represents a reduction of 345,222 as compared with the total at the corresponding date last year and a reduction of 645,757 as compared with two years ago.

The estimated number of insured persons in employment at the end of June was 10,165,000, representing an increase of 419,000 as compared with the end of 1929, and 882,000 as compared with two years ago.—British Official Wireless Service.

It is understood that scaffolding erected outside the Vice-Chancellor's residence denotes a plan to convert the building into joint headquarters for the Nazi Party and Storm Troops. It is believed that the police intend to order closure of the building operations, to force Herr Von Papen to state which they were unable to open last Saturday. Meanwhile Herr Von Papen has been given temporary quarters elsewhere.

Posts and telegraphs Department Report.

INCREASED USE OF POST OFFICE SAVINGS BANK. Especially by Africans.

INTRODUCTION OF NEW UNIFICATION SCHEME SMOOTHLY EFFECTED.

The scheme, by which the Post and Telegraph services of the three East African territories came under the administrative control of one Postmaster-General, came into operation on January 1, 1933.

There has just been issued an abridged annual report of the Posts and Telegraph Department for 1933, the first year of the working of the unification scheme.

There have been satisfactory savings in expenditure in all three territories and especially in Tanganyika, as a result of the unification. Rates are gradually becoming uniform and the public have thereby benefited.

Savings on Expenditure. The abridged annual report of the Posts and Telegraph Department of Kenya, Uganda and Tanganyika, just issued, shows that in the first year of the operation of the administrative control of one Postmaster-General, each territory saved in 1933, as compared with 1932, the following amounts on operation on January 1, 1933.

Kenya for 1933 showed an excess of each revenue of £43,224 over recurrent expenditure. Uganda £12,157 and Tanganyika shortfalls of £20,267. For 1932 the corresponding figures were: Kenya £46,741 and £24,746, and Tanganyika a shortfalls of £20,267.

"Very briefly the scheme may be described as an arrangement under which the services of the Posts and Telegraphs of the three territories are administered by one Postmaster-General. Each territory is responsible for the expenditure incurred in the operation of its own services, but the unification of the three territories has resulted in a saving of £2,835 per cent. and £2,044 per cent."

As the recording of wild animal scenes in natural surroundings was found to be totally unpracticable, the use of animals in the studio was resorted to, and the animals had been "trained" to do the things they were to do in the picture.

"The introduction of the new animals was accordingly effected without any inconvenience to the public, while in practical work."

of 1932. The number of deposits on the 31st December, 1933, was 1,000,000, compared with 904,000 on the 31st December, 1932, an increase of 10.3 per cent. During the year 2,509 new accounts were opened while 897 were closed.

Deposits.—20,468 deposits totalling £137,821 were made as compared with 16,428 amounting to £105,168 in 1932, representing an increase of 24.5 per cent in number and 31.0 per cent in value. The average amount per deposit was £16.45 as compared with £16.45 in 1932.

Withdrawals.—10,725 withdrawals to the value of £102,407 were made during the year, compared with 9,410 amounting to £93,977 in 1932, representing an increase of 13.5 per cent in number and 8.30 per cent in value. The average amount of each withdrawal was £23.10 as compared with £19.10 in 1932.

Interest and Investments. Interest.—The interest derived from investments (including a small amount in conversion with the transfer of accounts) amounted to £5,501 as compared with £5,397 in 1932. Of this amount £2,371 was paid to depositors of interest on principal and the balance of £2,130 credited to revenue.

Investments.—An additional £23,500 was invested during 1933. The securities invested on behalf of the Post and Telegraphs during the year and on the 31st December, 1933, were: Government securities, £18,612; £ General.—The number of European, Asian and African depositors in the bank at the end of the year was 2,658, 5,303 and 1,890 respectively, as compared with 2,363, 4,737 and 1,890 at the close of 1932. It will be seen that the number of African depositors was no less than 46 per cent. At the end of the year there were 58 in all accounts.

Home Safe—Home safes continued to be very popular and during the year 304 additional safes were issued bringing the total number in use in Kenya to 1,234.

The remainder of the Report deals with televisions, telegrams, wireless, broadcasting, telephones and staff. These subjects will be reviewed in more detail in the next issue of the "East African Standard."

K.D.F. DANCE. Millions of Letters. The report then goes on to detail the work in the several territories from which one learns that the total number of letters, postcards, newspapers, and other packets, inclusive of air mail letters and postcards, sent out during the year was 12,902,992 for Kenya; 2,371,046 for Uganda; and 3,919,413 for Tanganyika.

Here is a long-lived blade with a secret new process. The new Gillette Slotted Blades do more than cut your beard efficiently. They also cut your shaving costs, due to their long life.

These specially tempered blades, with their extremely hard edges, not only provide the smoothest, cleanest, easiest shaves you can possibly have, but they also provide a greater number of perfect shaves per blade.

In other words, the new Gillette Slotted Blades have a longer life, and Gillette shaves are therefore cheaper as well as better. Ask for the new Gillette Slotted Blades.

Mail Services Well Maintained.

INCREASE IN NUMBER OF INLAND TELEGRAMS.

Telephone and Wireless Expansion.

POINTS FROM REPORT OF POST AND TELEGRAPHS DEPARTMENT.

Whereas more inland telegrams were dealt with by the Posts and Telegraphs Department last year than in 1932, there were fewer foreign telegrams. The number of telegrams sent to and from Great Britain dropped by 9.19 per cent.

These facts are reviewed in the abridged annual report of the Department for 1933. The inland, ocean and air mail services were satisfactorily maintained, while expansion and improvement is reported in the telephone, wireless and broadcasting services.

Compared with other countries, the percentages of overseas letters mail conveyed by air to and from Kenya, Uganda and Tanganyika, are believed to be high. Public use of the air parcel service last year was double what it was the previous year.

Fewer Foreign Telegrams.

In the abridged annual report of the Posts and Telegraphs Department for 1933, it is stated that the working of the scheme whereby the post and telegraph services of the three East African territories were combined under one administration, and the appointment of one Postmaster-General—administered in made a total of 1,562,796 telegrams were despatched and 2,656,000 received in the previous year.

The number of inland telegrams dealt with was 514,478, as compared with 461,304 in 1932. The number of foreign telegrams sent to and from Kenya, Uganda and Tanganyika was 288,276 in 1933. There was a decrease of 2.19 per cent. in the number of telegrams sent to and from Great Britain.

Wireless.

The Kenya radio service with Great Britain was satisfactorily maintained. The Uganda, Kenya and International Communications Ltd. (Messrs. Cahill and Wainwright) Ltd. company also satisfactorily operated and maintained the Mombasa Coast Wireless Station from January 1, 1933. The Kenya radio service was extended to Tanganyika.

During the year arrangements were completed for the transfer from January 1, 1934, of the maintenance and operation of the Durban and Momb stations to Kenya Airways Ltd. The company will be relieving the territory of the expense of working these two stations.

The number of wireless receiving licenses issued was 794 as against 762 in the previous year. At the end of the year 911 licenses were current, against 834 at the end of 1932. License fees collected amounted to £1,805, of which £1,517 was paid over to the operating company.

There are no broadcasting services in Uganda or Tanganyika, the report states. "Two receiving licenses, for which no fee is charged, were, however, issued in these territories. At the close of the year, the number of such licenses which were receiving licenses were as follows: Kenya 113, Tanganyika 113.

"It is interesting to recall that despite the prevailing tariff depression there was an increase in 1933 in the number of telegrams in all three territories." At the end of last year there were 2,572 telegrams in Kenya, 792 in Uganda, and 856 in Tanganyika. This gives a total of 4,220 telegrams in 1932 the total was 4,294.

"The number of telegrams sent by air and received by delivery in the three territories was Kenya 207,050; Uganda 103,382; and Tanganyika 139,340.

Letter Mail and Postage. "The proportion of the total overseas letter mail conveyed by air and from each territory to the combined service is as follows: Kenya 31.8 per cent; Uganda 14.8 per cent; and Tanganyika 25.6 per cent. Compared with 1932, these percentages are high.

During the year 601,722 letters were included in the mail reported in Kenya for comparison by air. This figure for Uganda was 200,000 and that for Tanganyika 211,718. The total relating to the three territories was 1,013,440. Letters received by air and received by delivery in the three territories were Kenya 207,050; Uganda 103,382; and Tanganyika 139,340.

NO MORE MALARIA ATTACKS

KEEP YOUR FEVER PROPHYLAXIS HANDY

Keep the dreaded malaria away. Thousands of patients testify to this statement: "ASPRO" is both a prophylaxis before the attack and the best cure after they occur. Furthermore, it has the great advantage of acting as a powerful analgesic. A trial will specify demonstrate its usefulness.

SPRO DOES NOT HARM THE HEAD

ASPRO is both a prophylaxis before the attack and the best cure after they occur. Furthermore, it has the great advantage of acting as a powerful analgesic. A trial will specify demonstrate its usefulness.

Kenya Amateur Golf Championship.

R. W. HOOPER'S THIRD SUCCESSFUL APPEARANCE IN THE FINAL.

H. L. Gurney Turns 7 Down.

WINNER'S RECORD VICTORY OF 11 UP AND 10 TO PLAY.

Friday afternoon saw the start of the Kenya Amateur golf championship, over the course of the Nairobi Club. In many respects this year's championship promised to be more than usually exciting and interesting, if only by reason of the fact that the conditions prevailing were likely to provide a much better test than has been the case for the past two or three years. The long period of drought, followed by the break in the weather a month or so ago, has found the grass springing up fairly generally, although in most courses, some of the fairways have not shown the same degree of progress as others. Again, the rough is a much more formidable affair than has been known for the past three years. This was particularly hazardous over the first nine holes of the Hill course, where off the line meant a whole heap of trouble for the weaker competitor. Indeed, the player who could keep down the middle was likely to prove a handful to the veriest "tiger," and not a few surprises were expected.

On the whole it could be said that the course was playing on the short side. Several improvements had been effected while the weather permitted, and, on the whole, all things considered, was playing wonderfully well. The greens were good, and did not offer much real excuse for failure in this department.

Last Minute Withdrawals.

One or two withdrawals at the last minute robbed the championship of a little interest. Particularly in the case of H. A. Markus, of Mombasa, who was considered to have a fairly good chance of getting into the last stage. An accident to A. B. Tennahill at Rugby earlier in the week, took him out of the tournament, while two Buri entries in W. R. Ritchie and A. V. Aves, both had to cry off. M. Culham, the Muthiga champion, had to scratch at the last minute.

With a total entry of thirty-six players, only four matches were played on the first round, on the Friday afternoon. With Tennahill dropping out, T. R. Gibbs had a walk-over; Holden, a previous runner-up, set off before his initial hurdle in R. B. Boleher of Kisumu, who went down fighting by the margin of 4 and 2. W. G. Holdway won't come into the picture until the 12th and 13th, as he had to go to the 20th before he could be defeated. Pfaff beat the Muthiga man, F. S. Modera, who was one of the last night a year ago.

Saturday's Excitement.

It was left to the play on Saturday morning to provide the real interest, and excitement. Several of the "gladiators" were paired off, and most of the buzz and excitement of the crowd was centred on the match between R. W. Hooper, champion in 1932, and H. D. England, the holder. This pair had fought out the final twelve months ago at Mombasa. The first pair off was J. Vanberg (Railway), and J. E. Martin, (Nairobi). They found the rough a serious trial, and he went down rather easily to Martin.

In most of the ties in which

round the margins separating the winners and losers were fairly substantial. The runner-up, H. D. England, lost to the top half of the draw. Holmes (Limuru), beat Munro (Ruira) by 7 and 6, while Gurney, leader of the title in 1919, eliminated a climber in J. H. Turner, also by a fairly handsome margin. Gurney played exceptionally fine all the way, and gave nothing away. R. E. Anderson (Nairobi) accounted for another Railway competitor in R. A. Duncan, by 4 and 3. J. S. Page (Muthiga), had a walk-over with Markus scratching. Holden had a comfortable journey against Gibbs. Railway passed into the next round at the expense of Pfaff. Bloomberg had a hard journey, but he was known for the past three years. This was particularly hazardous over the first nine holes of the Hill course, where off the line meant a whole heap of trouble for the weaker competitor. Indeed, the player who could keep down the middle was likely to prove a handful to the veriest "tiger," and not a few surprises were expected.

A Return Affair.

The match between Forrest, an ex-champion, and Keatinge was also in the nature of a return match, as they met in the Nairobi Club championship, when Forrest won. It was a grim struggle over the 18th, and winning the 16th, finished matters.

Another upset came with the dismissal of H. A. Boleher, who was fancied to go very far. He went out to Birkhall, who played the stronger end throughout.

The crowd surrounding the 1st tee were keyed up when Hooper and England drove off, and immediately there was a trek down the course to watch the match. Few of the other games had anything in the way of a gallery; it was reserved for the titbit of the round to the 18th hole. But if they were in expectations of seeing some wonderful golf, they were doomed to disappointment. England sliced his drive, and found that the rough was really forming, and he had to get out, losing the hole. He won it back at the 22nd, but he was weak with his approach, but the Truckbarrier was second at the 6th, saw Hooper eventually give up, but he took the hole several, when England was unable to reach at the foot of the tee. He ran up nicely, however, and managed to get a half, when England was faulty with his chip. England had more of the lead at the 9th, and took two to get clear. Hooper playing a wonderful line to the known to become ten up.

Both men were definitely shaky. Neither had really scored down to the 11th. Weakness on the brown was apparent with both of them, particularly Hooper, who seemed far from lappy with his putts.

Hooper Gains Confidence.

He played more confidently in the homecoming hole, where he lengthened his lead to three at the 10th. England's chip was good at the 12th and 13th, on the latter taking three putts. The 14th was a very short hole, and Hooper, on the next two, the 16th with a

"hurtle" to bring the lead down to five. It should have been 11 to 2, as he had a hole in one. England was again played a poor chip, and missed a holeable putt. Hooper went for it at the semi-famous 18th, but found the rough. England was not short with his putts, but his iron, and Hooper getting well on, chipped nicely on. England went well past, and Hooper sinking the putt won 2 up.

The only upset in the afternoon was Saagrin going out to Hunter. Hooper had a narrow shave against Ford, where the match went to the 22nd, almost a record for the championship in Kenya.

The Brookhead man was perhaps a trifle lucky to get home when he did. W. R. Ritchie was also a winner in this regard, and it cost him the tie in the 16th hole. The match between Bolleson and Anderson was possibly of far reason of the number of strokes which dropped off, and all of them against Anderson.

The following are the individual results:

First Round.

A. Holden beat B. E. Boleher 4/2
R. Gibbs won
W. G. Holdway beat L. E. Sala at the 20th.
O. Hoff beat F. S. Modera 5/4

Second Round.

J. R. Martin beat J. Vanberg 6/2
N. Holmes beat H. R. Munro 5/4
H. L. Gurney beat J. H. Turner 5/4
W. Kellison w.o.
J. E. Martin beat R. A. Duncan 5/4
A. Holden beat T. R. Gibbs 7/5
W. G. Holdway beat O. Pfaff 5/4
O. Hoff beat F. S. Modera 4/1
Forrest beat A. E. Keatinge 4/2
F. J. Birkhall beat H. A. Boleher 5/2
T. K. Twist beat Marshal 5/1
W. H. Hooper beat R. D. England 5/1
D. A. Saagrin beat C. E. Pedley 5/4
W. M. Hunter beat C. E. Pedley 5/4

Third Round.

J. N. Holmes beat J. R. Martin 4/2
H. L. Gurney w.o.
H. D. England beat R. B. Anderson 5/4
A. Holden beat J. S. Page 3/2
R. Bloomberg beat W. G. Kook way 1 up
R. Forrest beat F. J. Birkhall 4/3
W. H. Hooper beat T. K. Twist at the 22nd
W. M. Hunter beat D. A. Saagrin 3/1

Fourth Round.

H. L. Gurney beat J. N. Holmes 3/2
A. Holden beat W. Rollston 7/1
R. Forrest beat S. Bloomberg 4/2
W. H. Hooper beat W. M. Hunter 4/2

The Semi-Finals.

In the semi-finals played Monday three ex-champions met. Holden, who went out to Gurney in the penultimate stage, being the only one of the three not to have had the title, although he had been runner-up to R. Forrest in 1931.

The standard of golf was the highest of the tournament thus far. In the morning Forrest, in his besting Bloomberg, Forrest had a hole in one, and he was a point in the penultimate stage. In his besting Bloomberg, Forrest had a hole in one, and he was a point in the penultimate stage.

The semi-finals were played on Monday, and were a very interesting affair. Forrest was completely off form, and went down to Gurney, who was in his best form. In the match between Gurney

and Holden the golf was of a very high standard. Gurney played superbly, although Holden was no means playing badly. The rough was four down at the 13th, and then with a couple of "birdies" in a row, pulled it back to two. At the next Gurney made a chip from eight yards off the town for a 3 and the match at 3 and 2.

The only upset in the afternoon was Saagrin going out to Hunter. Hooper had a narrow shave against Ford, where the match went to the 22nd, almost a record for the championship in Kenya.

The Brookhead man was perhaps a trifle lucky to get home when he did. W. R. Ritchie was also a winner in this regard, and it cost him the tie in the 16th hole. The match between Bolleson and Anderson was possibly of far reason of the number of strokes which dropped off, and all of them against Anderson.

The following are the individual results:

First Round.

A. Holden beat B. E. Boleher 4/2
R. Gibbs won
W. G. Holdway beat L. E. Sala at the 20th.
O. Hoff beat F. S. Modera 5/4

Second Round.

J. R. Martin beat J. Vanberg 6/2
N. Holmes beat H. R. Munro 5/4
H. L. Gurney beat J. H. Turner 5/4
W. Kellison w.o.
J. E. Martin beat R. A. Duncan 5/4
A. Holden beat T. R. Gibbs 7/5
W. G. Holdway beat O. Pfaff 5/4
O. Hoff beat F. S. Modera 4/1
Forrest beat A. E. Keatinge 4/2
F. J. Birkhall beat H. A. Boleher 5/2
T. K. Twist beat Marshal 5/1
W. H. Hooper beat R. D. England 5/1
D. A. Saagrin beat C. E. Pedley 5/4
W. M. Hunter beat C. E. Pedley 5/4

Third Round.

J. N. Holmes beat J. R. Martin 4/2
H. L. Gurney w.o.
H. D. England beat R. B. Anderson 5/4
A. Holden beat J. S. Page 3/2
R. Bloomberg beat W. G. Kook way 1 up
R. Forrest beat F. J. Birkhall 4/3
W. H. Hooper beat T. K. Twist at the 22nd
W. M. Hunter beat D. A. Saagrin 3/1

Fourth Round.

H. L. Gurney beat J. N. Holmes 3/2
A. Holden beat W. Rollston 7/1
R. Forrest beat S. Bloomberg 4/2
W. H. Hooper beat W. M. Hunter 4/2

The Semi-Finals.

In the semi-finals played Monday three ex-champions met. Holden, who went out to Gurney in the penultimate stage, being the only one of the three not to have had the title, although he had been runner-up to R. Forrest in 1931.

The standard of golf was the highest of the tournament thus far. In the morning Forrest, in his besting Bloomberg, Forrest had a hole in one, and he was a point in the penultimate stage. In his besting Bloomberg, Forrest had a hole in one, and he was a point in the penultimate stage.

The semi-finals were played on Monday, and were a very interesting affair. Forrest was completely off form, and went down to Gurney, who was in his best form. In the match between Gurney

and Holden the golf was of a very high standard. Gurney played superbly, although Holden was no means playing badly. The Semi-Finals.

In the semi-finals played Monday three ex-champions met. Holden, who went out to Gurney in the penultimate stage, being the only one of the three not to have had the title, although he had been runner-up to R. Forrest in 1931.

The standard of golf was the highest of the tournament thus far. In the morning Forrest, in his besting Bloomberg, Forrest had a hole in one, and he was a point in the penultimate stage. In his besting Bloomberg, Forrest had a hole in one, and he was a point in the penultimate stage.

The semi-finals were played on Monday, and were a very interesting affair. Forrest was completely off form, and went down to Gurney, who was in his best form. In the match between Gurney

and Holden the golf was of a very high standard. Gurney played superbly, although Holden was no means playing badly. The rough was four down at the 13th, and then with a couple of "birdies" in a row, pulled it back to two. At the next Gurney made a chip from eight yards off the town for a 3 and the match at 3 and 2.

The only upset in the afternoon was Saagrin going out to Hunter. Hooper had a narrow shave against Ford, where the match went to the 22nd, almost a record for the championship in Kenya.

The Brookhead man was perhaps a trifle lucky to get home when he did. W. R. Ritchie was also a winner in this regard, and it cost him the tie in the 16th hole. The match between Bolleson and Anderson was possibly of far reason of the number of strokes which dropped off, and all of them against Anderson.

The following are the individual results:

up to win, and finish up the morning round seven down. Gurney was never lappy all the way through in the morning with his tee shots. On the other hand, Hooper was inclined to spare his short approaches and run up, but his driving, particularly his second nine was amazing, not only for its accuracy, but also for its length.

The Afternoon's Play.

Hooper went from success to success in the afternoon. At the 11th Gurney just failed to get a long putt down for an "eagle." Hooper badly sliced his drive at the 12th, and failed to get out with his next, but placed his third on rough, well short, but put his next on, and again just failed to run down a long run. More trouble came Gurney's way at the 14th, where he pushed his tee shot, and only scrambled his second clear, and out of the hole the match was all square. Gurney playing a perfect run-up to within a couple of feet of the hole. Two halves followed in brief figures, and then Gurney missed another tee shot at the 16th, got over the bunker with his second, and into the ditch along the trees with his third. An awkward lie, and Hooper stepped in to, Gurney gave up the hole. Hooper played a perfect further ahead at the 7th, where Hooper played a perfect run-up, and just got clear, and then pushed his third into the rough on the right, and Hooper broke the chance away when he cut his tee shot into the bunker, followed by a great run-up by Gurney at the next after a short drive, laid him eighteen inches from the tee, and Hooper missing a putt the match was again all square. Both had "birdies" at the ninth to turn all that.

Gurney's Sequence of Troubles.

From the stage of the penalty found "double at every hole." An inclination to play tee shots in the first saw him correct, but only to develop a push, and his drive at the 10th found high, but with his opponent, but high on the left with his drive, it was one stroke behind again at the 11th, and then a strong third made it two down, Hooper being six high with his machine shot in two. Gurney found the drive in two, Gurney found the hole on the left, but played a 1/2 recovery, but Hooper was well on in three and asked the task to make things up. Gurney again pulled his tee shot at the about 13th, and lost another one, after being badly stymied, and an attempt to lay it all over the rough was not other down. A pushed tee shot at the long 14th, and Hooper beautifully down the middle, and long, cost Gurney another hole. Hooper landing it far "birdie" more trouble at the 15th, when he cut his drive, and then found the cross bunker, saw Gurney on the way to losing another. Hooper who was driving brilliantly, long and straight, was well up with his second, but spared his third. A 1/2 was a very short hole, and Gurney was in a row. Another beautiful drive by Hooper, and a hooked tee shot by Gurney, saw Hooper lying reasonably well for a 3. Gurney, who was the partner of the rough was being the only one of the three not to have had the title, although he had been runner-up to R. Forrest in 1931.

The standard of golf was the highest of the tournament thus far. In the morning Forrest, in his besting Bloomberg, Forrest had a hole in one, and he was a point in the penultimate stage. In his besting Bloomberg, Forrest had a hole in one, and he was a point in the penultimate stage.

Gurney again pulled his tee shot at the about 13th, and lost another one, after being badly stymied, and an attempt to lay it all over the rough was not other down. A pushed tee shot at the long 14th, and Hooper beautifully down the middle, and long, cost Gurney another hole. Hooper landing it far "birdie" more trouble at the 15th, when he cut his drive, and then found the cross bunker, saw Gurney on the way to losing another. Hooper who was driving brilliantly, long and straight, was well up with his second, but spared his third. A 1/2 was a very short hole, and Gurney was in a row. Another beautiful drive by Hooper, and a hooked tee shot by Gurney, saw Hooper lying reasonably well for a 3. Gurney, who was the partner of the rough was being the only one of the three not to have had the title, although he had been runner-up to R. Forrest in 1931.

The standard of golf was the highest of the tournament thus far. In the morning Forrest, in his besting Bloomberg, Forrest had a hole in one, and he was a point in the penultimate stage. In his besting Bloomberg, Forrest had a hole in one, and he was a point in the penultimate stage.

The semi-finals were played on Monday, and were a very interesting affair. Forrest was completely off form, and went down to Gurney, who was in his best form. In the match between Gurney

up to win, and finish up the morning round seven down. Gurney was never lappy all the way through in the morning with his tee shots. On the other hand, Hooper was inclined to spare his short approaches and run up, but his driving, particularly his second nine was amazing, not only for its accuracy, but also for its length.

The Afternoon's Play.

Hooper went from success to success in the afternoon. At the 11th Gurney just failed to get a long putt down for an "eagle." Hooper badly sliced his drive at the 12th, and failed to get out with his next, but placed his third on rough, well short, but put his next on, and again just failed to run down a long run. More trouble came Gurney's way at the 14th, where he pushed his tee shot, and only scrambled his second clear, and out of the hole the match was all square. Gurney playing a perfect run-up to within a couple of feet of the hole. Two halves followed in brief figures, and then Gurney missed another tee shot at the 16th, got over the bunker with his second, and into the ditch along the trees with his third. An awkward lie, and Hooper stepped in to, Gurney gave up the hole. Hooper played a perfect further ahead at the 7th, where Hooper played a perfect run-up, and just got clear, and then pushed his third into the rough on the right, and Hooper broke the chance away when he cut his tee shot into the bunker, followed by a great run-up by Gurney at the next after a short drive, laid him eighteen inches from the tee, and Hooper missing a putt the match was again all square. Both had "birdies" at the ninth to turn all that.

up to win, and finish up the morning round seven down. Gurney was never lappy all the way through in the morning with his tee shots. Both had "birdies" at the ninth to turn all that.

Gurney's Sequence of Troubles.

From the stage of the penalty found "double at every hole." An inclination to play tee shots in the first saw him correct, but only to develop a push, and his drive at the 10th found high, but with his opponent, but high on the left with his drive, it was one stroke behind again at the 11th, and then a strong third made it two down, Hooper being six high with his machine shot in two. Gurney found the drive in two, Gurney found the hole on the left, but played a 1/2 recovery, but Hooper was well on in three and asked the task to make things up. Gurney again pulled his tee shot at the about 13th, and lost another one, after being badly stymied, and an attempt to lay it all over the rough was not other down. A pushed tee shot at the long 14th, and Hooper beautifully down the middle, and long, cost Gurney another hole. NEW WORLD'S SWIMMING RECORD.

["THE ASSOCIATED PRESS"]
Jack Medica, of Washington University, has created a new world's record for swimming 100 yards in 1 minute, 11 seconds and 2/10ths of a second. His time of 20 minutes 24 3/10ths seconds, made at the National Amateur championships at Santa Ana, California, set a new world's record established in 1911. Medica's record was made in 21 minutes 4 3/10ths seconds.

Government House at Limu, the new capital of Northern Rhodesia. The building, costing £20,000, was designed by Mr. John A. Hooper, F.R.S.A., of Messrs. Hooper and London, Architects, Nairobi. The upper view is of the entrance front and the lower of the main front. The building is in the Greek style. Mr. W. Wilson, W.A.A.A., is responsible for the water system from which the building is supplied.

Every farmer who has taken the trouble to study problems of manuring realizes that all crops respond in the same way to an application of lime. For instance, potatoes will respond much more than roots to a dressing of fresh lime. Lime is frequently used in the form of an effect of farmyard and other manures. When this practice is followed the lime is scattered unevenly over the soil some time after the farmyard manure has been ploughed deeply into the soil. The practice of spreading farmyard manure and lime together is very wasteful. One of the most valuable constituents of farm yard manure is ammonia, much of which is inevitably lost by direct contact with lime. If the contents of the line container are used as a fertilizer, the ammonia is made available to the soil this loss can be avoided.

The following notes on diseases of the udder have been compiled and published by the New South Wales Department of Agriculture and Stock. Since the udder secretes the milk which is the source of the dairy farmer, its health is of prime importance to the farmer. Unfortunately it is the udder affected with a number of diseases which he is not only unable to lessen the milk production of these animals permanently, but also may have serious effects on the general health of the animal. The more we know of the udder, the better we shall be able to protect it from infection, and to direct attention to sanitary management which can be controlled to a large extent. Inasmuch as milk forms a very important article of human diet, particularly for children, a considerable responsibility is placed on the dairyman to supply only a pure, wholesome, disease-free product.

Major C. Lindsay's "Of Leishau" farm is situated about 10 miles from Thomson's Falls on an allotment of 7,000 acres. The farm covers about 5,000 acres, of which 1,500 acres have been paddocked, and divided into 120 paddocks of approximately 800 acres each. The grazings consist of a mixture of "Maid Marian" Star Grass, Red Out Grass, certain amount of Kikuyu Grass, and a growing proportion of wild white clover. The average rainfall is 50 inches a year, and the character of the farm is suggestive of typical dairy country. The O'Leishau herd was found in 1921 and has been built up by a consistent policy of sowing culled of female stock, and the use of high class pedigree bulls. Today the herd consists of some 100 cows, of which 50 are mares. Some of the female stock there are 10 pedigree animals, and the balance are high class non-pedigree grand bull "Hobland Favourite".

There are many other fertilizers which lose a great part of their value if they are distributed at the same time as lime. For instance, when superphosphate comes into contact with lime, the water-soluble phosphoric acid is converted into non-soluble di-calcium phosphate. Admittedly a similar process will eventually occur in the soil, but it is desirable that it should be delayed as long as possible. If lime comes into contact with any ammonia fertilizer, it will cause volatilization of the ammonia, which will dissolve into the atmosphere.

It was known in the -showed that a complaint had been lodged against two of the exhibitors in the Border Leicester sheep exhibit, one of the exhibitors related to the wool of the champions concerned. In one case the two quarters of wool other than the sheep's own were found attached to the fleece, and in the other case that the sheep's wool had been caught up in the wool of another exhibitor to improve the appearance where the exhibitor was the top of the head behind the ears.

The pure bred cows are descended from three sources. A few were purchased from the Government of Victoria, and the rest of the herd of Australian Anshires imported by Major H. D. Walter, the late owner of the farm. The milk is mainly carried in movable 40-gallon milking cans, which have a fixed capacity. There is a permanent milking line for use in wet weather. The cream is sent to the factory in the morning. The cows graze on their own paddocks, and are milked twice a day. The "Hobland Favourite" is still in excellent condition, and is now in the hands of the well known "Whitton Farm" with a call by "Strathmore Dods."

Many farmers frequently state that the cost of lining is so great that they cannot afford to purchase the quantities required. The same farmers will readily spend large sums on water-lime, but they do not realize that they may save as much as they spend by inserting lime in paper into the damp soil. If the litter paper acquires a pink tinge, it is a clear indication that the lime content is low. In this case it is advisable to increase the quantity of lime for a few months before an application of superphosphate.

It is understood that the two exhibitors who have been disqualified admitted that they had been misled by the committees that reported to the directors. But each case it was explained that the exhibitor had been misled by the exhibitor himself. It is believed that the exhibitor had been misled by the exhibitor himself. It is believed that the exhibitor had been misled by the exhibitor himself.

It is hoped that when times improve, and dairy farmers once again receive a remunerative price for butter fat, the producer of "Hobland Favourite" will again be seen in the Show Ring, where they have gained so many successes in past years. The O'Leishau herd, in common with many others in Kenya, deserves the reward of financial success which the existing conditions of world markets are offering to the producer.

NOTICE APPLICATION FOR WATER PERMIT. An application for a Water Permit under Crown Lands (Water Permits) Rules 1919, to utilize for the watering of stock 5,000 gallons of water per day from an unnamed stream, a tributary of the Kipkelesh River, has been submitted to the Director of Public Works by Major J. Alexander, the registered holder of Farm L.O. No. 628, in respect of the unnamed stream. A site plan of the proposed works may be inspected at the office of the Director of Public Works, Nairobi. Any registered holder of land riparian to the unnamed stream and the Kipkelesh River and downstream of L.O. No. 320 (I) who objects to the issue of the permit now applied for, should file an objection, in writing, with the Director of Public Works, P.O. Box 662, Nairobi, on or before the date of the public hearing, which will be held on the 29th July, 1924. JOHN ALEXANDER, Major (Nairobi). Applicant.

MYSTERIOUS VISION AND VOICE FROM KBY.

Interesting snippets on the beliefs and practices of the Watusi (Men of God) are contained in an article appearing in the June issue of the "Kenya Police Review."

The writer of the article recalls that the five members of the sect who were arrested at Nakuru were all fasting in the vicinity of Elhorron. Two were in the forest service and three on leave. All lived in forest, country and had been in regular employment until shortly before their arrest.

"They were apprehended without violence and make no secret of their religious beliefs, being only too willing to discuss the subject. All have a peculiar and wild facial expression, and appear to be slightly deranged. Whether this is a result of their faith or whether they were previously unbalanced, we do not adopt the faith readily, it is known to us."

Few in Number.

"They do not seem to have attempted to convert to their faith, but keep themselves somewhat aloof, remaining numerically few and being regarded with some amount of respect or fear by their fellow tribesmen (Kikuyu), many of whom regard them with respect."

Poisoned Arrows.

"The next night I saw the man again. This time he was dressed in a suit and was carrying a rifle. He was very nervous and was talking to himself. He was very nervous and was talking to himself. He was very nervous and was talking to himself."

Possible Explanations.

"The possibilities which arise in this connection are as follows:—(1) Are the Watusi Muungu members of a sect of fanatical natives who are suffering from a form of religious hysteria, and who are being misled by some other natives? (2) Are they concealing some other activities, such as the sale of opium, which are being carried out in their name?"

Unanswered Prayers.

"From that time on, I made 11 but never did see him before. I made 11 but never did see him before. I made 11 but never did see him before. I made 11 but never did see him before."

Dreams and Visions.

"The following extracts are quoted from statements alleged to be made by a man named 'KBY.' After living in childhood I have never seen any outsiders attend meetings and we have no teachers."

Monthly Race on July 8.

NINE BOATS PARTICIPATE.

["FROM A CORRESPONDENT."] The Naivasha Yacht Club's monthly race was held last Sunday, July 8, and morning weather was ideal. Owing to there being few boats in the water, the first starting gun was not fired until after three o'clock in order to enable all boats to compete.

Voice from the Sky.

"After that nothing happened until the few lights left the air. I again heard the voice telling me to read a certain verse in the Bible. This time I have heard the voice at intervals. I do not know where it comes, but it seems to be from the sky, and it is always older me to read some particular passage in the Bible. It comes to me in a dream when I am asleep in my hut at night."

"One night last week the voice gave me the following text from the Bible: 'God judge the righteous and God judge the wicked every day.' 'If he turn not, he will visit every soul in his sin, and make it ready.'"

"He had also prepared for him a list of the instruments of the Committee that a cup shall be given to the winner of the monthly race, and that there will be an entrance fee of Shs. 2/6 for all boats competing in the race."

"As Mr. McInnes was unable to present last Sunday, and the absence of him and the few was a disappointment to the members of the club, the Officer of the day."

Entries for August Fixture.

Two Days Function.

Another Good Sporting Event.

An excellent event has been reserved for the Nairobi August race meeting. The August Handicap alone falls below the level in the other events.

THE SECOND DIVISION HANDICAP.

HERR HITLER'S Storm Troops' Plot.

UNFOLDED BY THE CHANCELLOR IN REICHSZAG SPEECH.

Plans for Assassination.

"INTERNATIONAL INTRIGUERS AND APOSTLES OF COMMUNISM."

By a somewhat involved story of a plot against his own life and of treason against the Reich, Herr Hitler, in a momentous speech in the Reichstag, put forward his claim for vindication. Needless to say, the Deputy accepted the Chancellor's statement with acclamation.

Herr Hitler prefaced his speech by giving further details, but no names, of those executed in order that "tens of thousands of innocent men should not bleed to death."

He stated that the death roll numbers seventy-seven, the general consensus of opinion in Germany puts the figure at two hundred.

The Chancellor then unfolded the story of the revolt of the Storm Troops. He detailed the part which was to have been played by the shot leaders Capt. Roehm and General von Schleicher who, with the aid of a Herr von "A," intended to overthrow the Hitler regime, and in fact, assassinate Hitler himself.

An official announcement was made at the conclusion of Herr Hitler's speech, to the effect that the matter was now closed, Herr Hitler had in fact, the last word. As was to be expected there is no dissent in the Reichstag, the Country, but the Press enthusiastically supports the Chancellor and the doubts of the "man in the street" are not openly voiced.

A Mysterious "Von A"

["TROOPERS MUST BE ARRESTED."] Berlin, July 20. Herr Hitler returned this afternoon from Backnang, where he has been recuperating in readiness for tonight's momentous speech in the Reichstag, which is being held in the Reich Opera House. Stringent precautions are being taken to prevent any incidents. Police have been guarding the entrance to the Opera House throughout the day. Herr Hitler will be escorted by an armed body of police, while scores of specially picked "Blackshirt" guards will be distributed throughout the building.

Herr Hitler's claim, in his Reichstag speech, vigorously defended the policy of the Nazi Government. He stated that the country had risen from collapse and had achieved the political unity of the Reich and peace.

Referring to the recent revolt, he mentioned that 77 persons were dead, including 19 highly placed Storm Troop leaders, 31 ordinary Troopers, and three Black-Uniform leaders, all of whom had been shot while resisting arrest.

Herr Hitler declared that under the leadership of Captain Roehm, a plot was being hatched to overthrow the Government through an intermediary, a corrupt swindler, Herr Von "A." He had formed a connection with Von Schleicher, the ex-Chancellor, who had drawn up a proposal to depose the present Chancellor, and to replace Herr Von "A." with Herr Hitler (Herr Hitler) would still remain as any tempoarily. As he stated, the Chancellor had been the main clique of international intriguers and apostles of communism who had abjectly tried to pro-

Herr Hitler had been informed that this sinister feat was accompanied by a Government spokesman's pronouncement that Herr Hitler's speech would result in the definitely closed all discussion of the shootings on June 30 and subsequent who was to remove him, and later Standard Leader had had confided to him the details which he would have to carry out this order.

Herr Hitler said that the plan to remove him was found that he would co-operate in the direct action decided on at the beginning of the attack against the Government. His arrest had been arranged to take further action against the man to his order.

Roehm, Ernst, Hitler and other shot leaders had declared before witnesses that of a very bloody and prolonged fight was to have taken place.

Warning from Abroad.

The seriousness of the situation first became apparent from messages from abroad, English and French, referring to the imminence of the revolution. Therefore, said Herr Hitler, he had decided that, in order to prevent the shedding of blood, he would order the arrest of all those who would attempt to overthrow the Government. He stated that the Storm Troops had been called out in order to prevent the shedding of blood.

He recalled he must not let the revolution spread, and he would not allow the revolution spreading. He stated that the revolution should be destroyed, and he would not allow it to spread.

Reichstag Approval.

After Herr Hitler's speech, the Reichstag, unanimously and with acclamation, approved the Chancellor's action in dealing with the rebels and expressed their thanks to Herr Hitler.

A Court Constituted.

The new Nazi People's Court, which will try never be unhampered by the rules of ordinary justice, will be opened to-day by the Minister of Justice, Frick, who will serve in the place of Herr Hitler. It is expected that persons involved in the recent revolt will be tried first, and afterwards a Court of Honor will be constituted. Other judges will be drawn from Nazi leaders, and the Minister of Justice will be the President of the Court.

Doubts.

Alongside the unanimous approval of the Press is the possibility of industrial organizations in the "Street" as to whether Herr Hitler's speech will compare favorably with the industry and carpers. Sectionals also voiced as to whether Herr Hitler's speech is likely to have satisfied the "Street" as to whether the Government is likely to be satisfied with the results of the industrial action.

The public had hoped to learn the names of those executed but Roehm has been named. It is stated that these will be withheld.

The Death List.

The secret of Herr Hitler's death list will never be revealed.

NAZI ROMANIAN ILLEGAL.

Official Action Taken in S.W.A.

Subversive to Court Order.

Hitler "Youth" Leaders to be Deported.

SEQUEL TO IMMIGRATION DOCUMENTS.

["TROOPERS MUST BE ARRESTED."] Windhoek, July 20. Captain von Schleicher, leader of the Hitler "Youth" movement in South-West Africa and the Immigration Officer, has been ordered to leave the country and the movement has been declared illegal.

The Foreign Secretary, Sir John Simon, will make a statement regarding the movement in the next convention in the House of Commons. Mr. Hartman, in the course of the debate which was opened with a speech by the Hon. Mr. Herbert Samuel, who asked for further Government action in the present situation in regard to immigration with particular reference to the Government's policy of restriction.

BREACH OF TRUST.

Former German Minister Sentenced.

["TROOPERS MUST BE ARRESTED."] Berlin, July 20. The ex-Berlin Governor, Andreas Hermes, has been sentenced to a term of imprisonment for breach of trust.

NAZI ECONOMIC THEORY.

["TROOPERS MUST BE ARRESTED."] Berlin, July 20. Coming out of the mouth of Herr Philip Kessler, it is regarded as evidence of the growing difficulties of reconciling the present economic theory of the Nazi and the Nazi economic theory.

Industrial Organization.

Both Herr Philip Kessler and Dr. Fiesch were appointed under the present Government. On March 13 giving the Ministry of Economics complete control of all industrial organizations with the object of avoiding union competition between various branches of the industry and carpers.

UNION STATUS BILL.

The German Bill, introduced in the Reichstag, is intended that it should not discriminate against the transfer of property.

DAVES AND LOANS.

["STANDARD" CORRESPONDENT.] Dublin, July 21. It is officially stated that the King has assented to the Dues Status Bill.

THE EUROPEAN SITUATION.

Guarantee Pact Proposed.

MR. KAYE DON SENTENCED.

Imprisonment for Four Months. An Appeal Lodged.

[BROOKIN BEVIER'S AGENCY.] London, July 16.

Mr. Kaye Don has been sentenced to four months' imprisonment by the Court at Douglas, Isle of Man, for the manslaughter of his mechanic, Francis Taylor.

"When Mr. Kaye Don's counsel pleaded for bail, the Doemster inquired whether he was prepared to grant bail, but he directed that the case should remain in custody until the appeal was lodged."

The appeal will probably be heard in London in August before another Doemster and an English judge.

"Kaye Don, the well-known racing motorist, was found guilty by the Second Doemster, Mr. E. D. Farrant, at Douglas, Isle of Man, on a charge of manslaughter."

EXPULSION OF JEWS FROM THRACE.

Enquiry by Minister of the Interior.

[BROOKIN BEVIER'S AGENCY.] Istanbul, July 12.

The fact that 3,000 Jews still remained in Thrace is mentioned in the report of the Minister for the Interior. The Minister has been investigating the persecution. The worst atrocities were at Bilecik, where 60 houses were destroyed."

"A message published last week stated that about 3,000 Jews had been expelled from Dardanelles and East Thrace at the order of the Government. About 2,000 of them found shelter in Constantinople. The Government has now issued a decree in expatriation of Turkish Jews from the Dardanelles and East Thrace."

The British Government, he said, would take any suitable opportunity before the Conference to supplement those communications by personal discussions with representatives of the Commonwealth Governments. The Government would likewise consider the interests of the Colonies."

STOCK EXCHANGE.

Steering on New York was quiet at 10.45 and on Paris at 10.50. The Stock market continues quiet with the financial position in London...

Marketing of Native Produce.

ADAPTATION & IMPROVEMENT OF CULTIVATION.

New Ordinance Proposed.

DEBARRED AREAS IN WHICH PURCHASE AND SALE MAY BE CONTROLLED.

[BROOKIN BEVIER'S AGENCY.] London, July 16.

Mr. Kaye Don has been sentenced to four months' imprisonment by the Court at Douglas, Isle of Man, for the manslaughter of his mechanic, Francis Taylor.

The Government proposes to adapt and improve the cultivation of native produce and to regulate the marketing of such produce by the issue of a new Ordinance, 1934.

The Ordinance proposed to vest in the Governor, or his representative in Council, the power to prohibit the purchase of native produce to be controlled and the granting of exclusive trading licences, and the appointment of markets.

The Government Commissioner of any Province in which such an ordinance is situated may require purchase and sale to be paid for in cash.

Cash Payments.

[BROOKIN BEVIER'S AGENCY.] London, July 16.

"The Government proposes to adapt and improve the cultivation of native produce and to regulate the marketing of such produce by the issue of a new Ordinance, 1934."

Clause 12 is important. It gives the Provincial Commissioner the power to order in a declared area that the purchase of any particular class of native produce shall, for each period not exceeding twelve months, be paid for in cash, and failure to do so shall be an offence against the Ordinance.

There is right of appeal to the Governor, who may make rules prescribing the details of licensing officers, establishing markets and regulating their use, etc.

The final clause says—"Nothing in this Ordinance shall be taken to apply to markets established or maintained by any person upon land owned or leased to him and occupied by him primarily for the supply of persons employed by him upon such land."

Uganda Ordinance.

By the introduction of this Bill, Kenya is but following the example of Uganda, where the sale of native produce in a declared area has been established for some time. Entitled the Native Produce Marketing Ordinance, 1933, it now proposed to amend it.

The Government proposes that the Governor in Council shall be empowered to issue orders in a declared area, where the sale of native produce in a declared area has been established for some time.

Entitled the Native Produce Marketing Ordinance, 1933, it now proposed to amend it.

The Government proposes that the Governor in Council shall be empowered to issue orders in a declared area, where the sale of native produce in a declared area has been established for some time.

GOLD PRODUCTION IN KENYA.

Output for Half Year. TWENTY-FIVE PER CENT. INCREASE.

[BROOKIN BEVIER'S AGENCY.] London, July 5.

During the first six months of 1933, the total gold output of Kenya was 5,973 ounces.

For the corresponding period this year, the total output was 7,067 ounces, or an increase of approximately 20 per cent.

The figures for June are:—Kakamega.—Alloyed, 298 ounces, as against 216 ounces last year; reef, 356 ounces, compared with 667 ounces in 1933.

The sales of Mr. Gustav Holt, the famous British composer, who died from heart failure in London on May 25, were valued at £100,000.

PIONEERS IN MALAYA RESEARCH.

Sir Ronald Ross and Sir P. Manson.

[STANDARD CORRESPONDENT.] London, July 5.

The Earl of Athlone, Chancellor of the University of London, wrote of the magnitude of the malaria problem when he presented a list of the late Sir Ronald Ross and a tablet to the memory of Sir Patrick Manson at a reception at the London School of Hygiene and Tropical Medicine.

The Earl of Athlone said that they did honour to the memorial of Ross because, after his labours overseas alone as a lieutenant, he had the vision of the source and the means of its control.

The sales of Mr. Gustav Holt, the famous British composer, who died from heart failure in London on May 25, were valued at £100,000.

GERMAN LINERS TO BE REBUILT.

The German African Line are, at the present time, rebuilding their popular passenger steamer "Ubeni," which are to be lengthened by about 20 feet and will be fitted with more powerful engines.

By this means the two vessels, which will be employed on the express line from Europe to South Africa via Las Palmas, will be able to complete the journey from Southampton to Cape Town and vice-versa in about 17 days.

(By air mail.)

The pictures show scenes during the course of the work in the dockyards at Hamburg. On the left is the old bow being cut off, and on the right an impressive view of the new bow after its completion.

UNION SHIVERS IN COLD SPELL.

Below Freezing Point on Rand.

TRIOK ON EDGE OF SNOW ON DRAKENSBURG.

["STANDARD" CORRESPONDENT].
Durban, July 9. (By air mail.)
The whole of Natal, Transvaal, and the Free State have, since arriving in a bitter cold spell of weather, states the "Natal Mercury."

In Johannesburg in the early hours of Saturday morning the temperature dropped to 35 degrees Fahrenheit—seven degrees below freezing point.

The Drakensberg is thickly coated with snow, and in the brilliant sunlight yesterday was a beautiful sight. On Saturday morning a strong wind swept over the whole of Natal. It reached Gelo River in places.

Water Frozen.

North of Murrumbidgee all standing water has been frozen during the last three nights. In Eastport on Saturday morning there was at least two inches of ice on some public ponds. It was also cold in Durban, and after the sun-shine, and in spite of the temperature dropped rapidly, and the evening was one of the coldest Durban has had during the past few years.

Yesterday the weather was considerably warmer, but there was still an ice freeze blowing off the Berg. After sunrise farmers were the grip of a real winter's evening.

KENYA GIRAFFE DIES AT WHIPSADE.

Neck Injury Proves Fatal.

["STANDARD" CORRESPONDENT].
London, July 2. (By air mail.)
One of the young giraffe which arrived from Kenya at Whipsnade only ten days ago is dead. A post mortem examination showed that he died from the effects of an injury to the neck.

The arriving giraffe—a female—has settled down satisfactorily. Although the Zoo has in the "Queen's Park" enclosure a young male, which arrived at the same time as the Whipsnade pair, it is not, apparently, proposed to send this giraffe to join his lonely relative at Whipsnade this season.

The giraffe was intended to be the "piece de resistance" in the Zoological park this summer, and a special house, heated by electricity, has been designed and built for them. They were taken to England by Mr. and Mrs. H. B. Stanton.

I asked Mr. G. M. Nevins, Superintendent of the Queen's Park Zoo, about the cause of the death of the young giraffe at Whipsnade. He writes to me as follows:

"The young male giraffe, which was sent to Whipsnade, died from an injury of the neck three days after arrival. It is thought that the injury may have been caused by the other giraffe, which came to the Zoo with it and which was in the same house."

MARKET QUOTATIONS.

Latest Cabled Prices From London.

Messrs. Dalgety and Co., Ltd., are in receipt of a cable from their head office in London, dated July 20, which gives the following quotations:—

Maize Flat White No. 2 21 per cent.
Sisal No. 1 grade—no port 414.10 per ton.
Sisal No. 2 grade—no port 405.00 per ton.
Sisal W. B. Tow—no port 39.00 per ton.
The steel market is idle.

Butter Australian 44 cwt. 53.8.6
53 cwt. 53.7.
Butter New Zealand 1st Grade 53.12.0 52.13.8 per cwt.

The butter market is quiet.

Plaster Ceylon 49 per ton.
F. M. Sundry Cops 45 per ton.
No. of bags offered 570. No. of bags sold 132; at an average price of 130s. 6d. per ton.

Kenya Coffee C grade average price 418 per ton.
Kenya Coffee A grade highest price 482.0 per ton.
Kenya Coffee B grade average price 254.0 per ton.
Kenya Coffee G grade average price 418 per ton.

No. of bags offered 570. No. of bags sold 132; at an average price of 130s. 6d. per ton.

Roboka Plantation 423.0 per ton.

The demand continues to be restricted, and in the present circumstances in London will be held on a week only. The above results are favourable, and the prospect of sales to the total unsold stock owing to the present limited price enquiry.

TIMBER INDUSTRY IN TANALAND.

Grading Regulations Imposed.

["STANDARD" CORRESPONDENT].
Lamu, July 7. (By air mail.)
In the matter of the grading of mangrove timbers—principally for export, the Lamu Import Committee was informed to-day that the Conservator of Forests had agreed that such standard sizes as were agreed upon locally as a minimum for export should be endorsed upon the backs of licenses to cut, and any port brought in that did not conform to these standards would be confiscated by the Department and sold as firewood. The Committee was of the opinion that this would meet the case and would prevent the threatened loss of trade due to the poor qualities that have, in some cases, been put upon the export market in recent years.

The Committee, however, requested that the Conservator of Forests should require that payment in full of the royalties must be made by the cutters before they have sold the timbers. It was pointed out that the cutters were not always invariably too poor to be able to put up the money and, therefore, will be driven into the hands of lenders, which is the very thing that it was sought to avoid. It was, therefore, urged that before any possibility of their removal of these bulky timbers there payment in full had been made. It would meet the case if a short time—say a fortnight—were allowed for the cutters to sell and pay the royalties, falling which the Department might itself sell from the proceeds.

RABBI SUES GREY SHIRT LEADERS.

Forgery of Document Alleged.

["STANDARD" CORRESPONDENT].
Durban, July 8. (By air mail.)
This week, writes the Johannesburg "Sunday Times," will see the opening in the Supreme Court at Johannesburg, of a trial which is arousing extraordinary interest throughout South Africa.

It has its origin in the publication recently by Von Moltke and other Grey-shirt leaders of a document alleged to have been taken from the Western Road Jewish Synagogue, Port Elizabeth, purporting to contain instructions to Jewish committees on the methods to be adopted to break up Grey-shirt meetings and to counter their anti-Jewish propaganda, and employing most scurrilous attacks on Christians.

Alleged Author.

The authorship of the document in question was ascribed to the Rev. A. Levy, minister in charge of the Synagogue, who it was declared by Von Moltke at a public meeting and published in the Greyshirt journal, "The Support," had signed it as "Rabbi."

Levy applied to the Supreme Court at Johannesburg and obtained an injunction against Von Moltke.

Mr. van Nieuing Von Moltke, Jesh and other Grey Shirts for damages, alleging that the document is a forgery and that it was never in the Synagogue, and had never been penned by him or any one connected with him.

The hearing of the case, it is expected to last about ten days, as voluminous evidence has been submitted.

The Grey Shirt defendants are conducting their own defence and have lodged a formidable list of books, newspapers, and so on, from which they intend to quote.

APPOINTED GOVERNOR OF SIERRA LEONE.

Promotion For Kenya's Colonial Secretary.

[THROUGH BENTLEY'S AGENCY.]

London, July 19. Mr. Henry Monck-Mason Moore, C.M.G., has been appointed to succeed Sir Arnold Woodhouse as Governor and Commander-in-Chief of Sierra Leone.

Mr. Moore came to the post five years with many of the more important unofficial organizations in the Colony.

He is, for instance, a trustee of the Coryndon Memorial Museum, the McMillan Library, and of the Sir All Bin Salim Arab School.

Another appointment held by him is that of chairman of the Board of Governors of the Lady Grigg Welfare League.

He is also President and trustee of the Civil Service Club, and of the Royal East African and Indian Association, and chairman of the Air Board of Kenya, and a full member of the Kenya Agricultural and Horticultural Society, and in the past President of a United and

he was the first of the government or acting governor to carry out a safari into the Turkish district, and, more recently, he headed a new trail, as it were, by making a journey in a boat out down the Tana River with Mr. Moore. This was the first occasion on which the trip was undertaken by the head of an administrative department.

His chairmanship of the Air Board is particularly interesting because it is the only one of the Colony's progress in which he has been a moving spirit. He attaches great importance to the orderly development of civil aviation.

He was responsible for the selection of Shimani at the aerodrome Memorial Hall, and in many other directions has encouraged the progress of civil aviation in this country.

To Fly Home.

Mr. Moore will not be allowed a very long interval between his departure from Kenya and the date on which he takes up his post in Sierra Leone.

Together with Mrs. Moore he will fly home on August 10. Their children will leave on July 28, and on their journey on their way to their new posts on their governorship on the 1st of August.

Recently there have been several changes in the colonial governorships, and an adequate reason why Mr. Moore will not be able to enjoy a lengthy holiday after leaving Kenya is that what recently a new Colonial Secretary has been appointed to Sierra Leone.

Neither he nor Mrs. Moore are strangers to Sierra Leone, as both of them have been active at Freetown, the capital, on several occasions while viceroy to Governor of Nigeria.

Cheeks Aglow with Radiant Health

"YOU need not fear that gloomy unless a few months will see these rosy cheeks on your children's cheeks. You can keep them healthy and happy by making delicious 'Ovaline' their daily beverage."

Remember that good health depends upon correct and adequate nourishment—and active children need more nourishment than ordinary food supplies, to make good the strength and energy they expend so lavishly. That is why they need "Ovaline."

"Ovaline" is a 100 per cent. nutriment, extracted from the highest qualities of Nature's best food—milk and eggs. It provides every nutritive element essential for building up health, strength and vitality.

"Ovaline" must not be confused with other food beverages, which contain large percentages of cheap ingredients such as household sugar and cocoa, to reduce the cost. "Ovaline" is superior for maintaining glorious health. Resist cheap imitations.

For their Health's sake—give them OVALINE

TILLEY Vapour Lamps.

BRITISH MADE THROUGHOUT, they will stand plenty of rough usage and the mantles do not jar off. The Tilley Lamp is not a wick lamp with a mantle and is therefore unaffected by draughts. You can take it out of doors if necessary, when it will still go on burning brightly.

After the day's toil your evening comfort largely depends on your lighting. You need a lamp that has powerful light lamps, but at the same time they must be easy to operate and thoroughly dependable.

THE TILLEY LAMPS fulfil these conditions. They burn ordinary paraffin without smoke or smell and yield a splendid white light of 300 c.p.s. at the small cost of four cents per hour.

Main on the Lamu Road.

Mr. Calton Kent writes as follows:—During the months of July, August and September a certain number of visitors return to Lamu via the Northern Frontier District. I have just heard from the District Commissioner, Lamu, that since April 41 inches of rain has fallen, and it is now unlikely that the road will be passable to motor traffic until the end of August, or the beginning of September. The Lamu-Lamu train, which is partially intended visitors to that lovely old town to take the s.s. "Dumara" from Kilindi.

WESTON'S HUMANE ACTION.

Tommy Weston, first jockey to Lord Derby, bought Cappa-Pie, a colt who had ridden the special object of having him disposed of by the Veterinary Surgeon.

Cappa-Pie was put up for auction at the Sales of the Veterinary Surgeon, being put up for sale by Lord Derby, bought him for £250 guineas. As soon as the sale was completed the horse was despatched to the stud.

Cappa-Pie is a three-year-old in 1933 won the Ebor Handicap at York.

KIPPENFIELD AND CHIPPERS RECOVER.

["STANDARD" CORRESPONDENT].
London, July 14. Kippax and Chipperfield, the Australian cricketers, who were detained in hospital at Manchester, are now able to leave the institution, and are proceeding to Sheffield to join the rest of the team.

Mr. Henry Monck-Mason Moore, C.M.G.

Colonial Service record of special importance to Kenya. He has had political as well as administrative experience and had been well trained in the organization and dispatch of the complex work of a large, modern secretariat. When Mr. Moore's appointment to the Kenya Governorship was first announced His Excellency, then presiding over the session of the Legislative Council in Mombasa said: "I believe him to be an officer of tact, judgment and ability who, in the administration, legislation and general affairs of the Colony will command himself to all commendation."

Born in 1887, Mr. Moore joined the Colonial Service as a cadet in the Ceylon Administration in 1910 and served in various parts of the Colony following his appointment as a political assistant in 1912. In 1916, he was appointed fourth assistant, and later in the same year, third assistant to the Colonial Secretary. After three years' service with His Majesty's Government in the Ceylon Administration, he returned to the Ceylon Administration in 1920 as a member of the Government Agent at Trincomalee.

In January, 1922, he was promoted to the rank of Secretary of Borneo and two years later was appointed to the Nigerian Administration.

Many and Varied Interests.

In addition to his official activities, Mr. Moore has been closely

Cambridge College of Kenya.

He holds an important appointment in the Arab and African Athletes' Association. The Society for Race Improvement, the Girl Guides Executive Committee and the Kenya Holiday Camp Committee. The most recent event of his life was his appointment as Governor's representative to the Kenya Council of Education.

He has also had a great deal to do with the discussions in regard to the establishment of a local university and has always been keenly interested in this important development in the life of the country.

In the Native Reserves.

Another side of public life which has attracted his attention has been the gradual development of the native reserves of the system of native district councils. In March last he was appointed to the post of Council for the development of a scheme of representative government in the native reserves. Mr. Moore has been a pioneer in these directions. For instance

GIROUARD CUP MATCH.

Callies Overcome Nyeri Side.

Last Few Minutes Decide Issue.

VISITORS LEAD AT THE INTERVAL.

Calcedonians were at home to Nyeri on Saturday last, in the second round of the Girouard Cup competition, and won by the odd goal in five, after being a goal down at the interval.

The ball was set rolling by the home team, but Nyeri, defending the South Avenue end, immediately secured and tested their opponents' defence, the finishing shot going behind. From the goal kick the Calcedonians attacked, and Tate shot over when in a good position.

The Nyeri left wing then got going, but Thomson threw the visitors returned to the attack but two goals in quick succession, relieving the pressure. Barker was sent away, but was charged by Allen the ball going into touch. A period of long kicking ensued, in which the two centre halves were prominent. A shot by Gordon was well saved by the keeper, and Goldworthy mistook net goal. A third "hand" against Nyeri gave the Callies defence a short respite, but Nyeri came back in determined manner.

So far, the visitors had done most of the attacking and the home team's supporters were having a

The first Rugby match between England and Scotland took place in March, 1871. England was led by F. Stokes, and Scotland by Dr. Houn.

Twelve-a-side, played in four halves, and three full-backs.

anxious time. Gordon sent in a very fine goal which just missed the post, and a regular bombardment of the Callies goal followed. Weight saved time and the upright was struck several times on one occasion. The siege was raised by the ball going behind and Calcedonians backs away. Barker took the sphere down and sent it to Hutton, who headed into the waiting hands of Allen. A second "header" shortly after met the same fate, before the latter played a fine goal and always appeared to be where he was most needed. Many promising movements by the Callies right wing were frustrated by his anticipation and speed. Hutton and Thomson charged each other, but retaining their mistake, recovered in time to regain the ball, but "hands" again.

Hutton remained in play being again transferred to the other end, where Robertson recovered a pass from the right end, a bounding ball at close range which he kicked into the net to secure the scoring for Nyeri.

This reverse operated the home team to greater efforts, and a determined onslaught was made on the Nyeri goal. Tate and Barker were knocked away by the keeper, and Callies tried a free shot which Allen fisted out with both hands. Nyeri then took over the running, but Goldworthy was too late in centring, and a goal kick resulted. A promising move by the Callies was frustrated by Barker being obliged. F. M. Allen headed Tate and took the ball over the half line, but with a long put sent the ball behind. A kick against Calber for hands resulted in an unproductive free kick. The home team then had a

glorious opportunity of equalising. Thomson centred and the goal-keeper ran out but failed to intercept the pass. Tate, with an open goal shot over the bar. Half time passing Nyeri leading 1-0.

Callies One Short. The second half opened with a Callies end, but Thomson shot first. Then in a collision, Tate received a kick on the ankle, and had to retire for the remainder of the game.

This was a disaster for the Scots, however, maintained a cautious offensive. The whistle blew for what appeared to be "hands" against a Nyeri defence in the penalty area, but the referee allowed a free kick to the defence. Several passes appeared and the referee, who apparently had given his decision only momentarily under the impression that Nyeri was attacking, altered his award to a penalty. Tate took the kick and scored with a hard ground forward, which gave the keeper no chance whatever.

The incident was not without its effect on the players, and the referee appeared less confident for a time thereafter, as he seemed and as a well placed corner "came" to nothing. At the other end Thomson could not pass safely, but a fruitless corner followed. Callies now appeared to be in the lead, and kept it in the Nyeri half, Thomson miscalculating and sending behind in attempting to clear a breakdown by the Nyeri right wing led to a hand-out by Goldworthy, which was well saved by Weight, who efficiently dealt with two hard shots in succession. Nyeri then smart shot over the bar. Calder and Tate were then prominent in a midfield run. Hutton receiving and testing the goals with a shot which the latter did well to clear. Allen then had to punch out to save a hand shot from Calder, taking a free kick for "hands" against Seton. After some more midfield play, Callies scored and sent in a drive which beat Allen, thus giving the home team the lead.

All Square. Callies pressed from the restart and a rush by the inside forerunners looked dangerous. Hutton, who had anticipated the Nyeri goal, was given offence as he stood almost under the bar when the ball was again played in line, after Allen had retrieved a miscue by one of his back-row men then gave a pretty exhibition of dribbling to the centre of the field and passed to Barker who shortly after was beaten by Allen, who shortly after headed Tate in his stride. Nyeri then had another try, and forced a corner which was placed behind the posts by the centre. Weight again saved twice in succession from Robertson and Thomson, but a move in the goalmouth Goldworthy scored with a low shot.

The visitors were now level with only ten minutes to go and excitement increased. Both sides did their utmost to secure what would almost inevitably prove to be the winning goal.

The Decider. A good movement by the Callies was spilt by offence this time against Hutton. Robertson broke through the right end, but he was tackled by Forrest, who kicked into touch. Gordon then made a splendid effort and harassed by three opponents, contrived to get his shot in, only to see Weight bring off another fine shot. Hutton took the ball to the Nyeri end and passed to Thomson who shot wide. Although Nyeri were strong every move against the Callies were keeping up a sustained attack and eventually Tate scored by way through and drawing the defence, passed to Thompson who, in sending the ball into the goalmouth headed behind at the ball striking an upright and then the crossbar before coming to rest on the net. Nyeri tried hard for the few minutes remaining but were never essayed from any angles and distances, but without avail. The fence watched the strain and Calcedonians ran out winners by 3 goals to 2.

NAIROBI POLO CLUB'S GYMKHANA.

List of the Prize Winners.

K. MACKENZIE WINS "VICTOR LUDORUM" CUP.

In the 11 events at the recent polo gymkhana an average of 18 competitors per event faced the 200 entries, there being practically 2000 entries. One of the most popular wins of the afternoon was that of the Victor Ludorum Cup (presented by the Hon. H.M.-M. Moore) by Mr. K. McKenzie, with eight points. The runner-up were Miss Anne Joyce and Mr. G. Bumpus, each with six points.

The events for motor-cars and motor-cycles were well supported, but the Committee of the Club feels that for future gymkhana, some improvements might be made in the nature of this class of event, and would be pleased to receive suggestions from those who are interested.

The following is a list of the events and prize-winners: Pony Steerage—(Men) 1. M. & G. Lane. 2. A. D. Imper. 3. E. J. Laidler. 1. Mrs. B. Allen. 2. Miss Joyce. 3. Mrs. C. Bumpus. 4. Mrs. C. Bumpus. 1. E. J. Laidler. 2. R. McKenzie. 1. Mr. and Mrs. C. Bumpus. 2. Miss Joyce and Mr. B. Allen. 1. Mr. and Mrs. C. Bumpus. 2. Mr. and Mrs. McKenzie. Musical Chairs—(Men) 1. A. D. Imper. 2. E. J. Laidler. 3. Mrs. D. Esling. 4. Miss Burrell. Musical Bumps—(Cars) 1. Miss S. McDonnell and Swift. 2. Miss Joyce and Mr. B. Allen. 3. Childrens Riding—(Boys) 1. Nicholas Allen. 2. Percy Johnson. 3. Miss S. McDonnell. 4. Miss Jocelyn Moore. Special Prize—Miss Susan Appleby. Lucky Programmes—1. No. 257. 2. No. 56.

TACTICS IN GOLF.

A Peculiar Point Raised.

The Spirit of the Game.

WHEN A STYMIE MAY BE AVOIDED.

I have been perusing a rather curious query with regard to the game of golf. My correspondent asks an answer to the following: "A and B" are playing a match. At one brown A lays B a stymie, but by taking advantage of the rule that a ball lying within twelve inches of the edge may be moved a foot inside. If A's ball is then less than six inches from A's ball, according to the rule "a ball lying on the green within less than twelve inches from the edge of the bunker may be lifted and placed twelve inches from the edge of the bunker forward or backward without penalty."

B, therefore, is entitled to take such course provided he does not, in so doing, violate the rule, in which case he is permitted to overcome the stymie. But it seems to be attempted here as a case wherein the spirit of the game enters into it. If the above advantage of the fact that he may take the ball in a foot, then it is definitely against the spirit of the game that to stymie a stymie. On the other hand, if he takes it back a foot then the same applies, but in a much lower degree.

By taking it back twelve inches, however, he does not avoid the stymie, although he has improved his lie to such an extent that a stymie is more easily negotiated.

Take it Back! The majority of players, I rather fancy, if they would call themselves, that would not attempt to adopt the lack of the game, but adopt the second course, namely, that of taking the ball back. The chances are that the player may quite probably give his opponent a similar handle to negotiate.

At the same time, under the local rule, there is nothing to prevent him, in my opinion, from avoiding the stymie, but I feel that the player who would do so, would do far towards being regarded as one of his fellow golfers, who is a question of one's own mind, if it is studied. If the spirit of the game is to remain then he would play the stymie. It might be hard luck, but better to be a good loser than a bad winner.

A Unique Post. A great deal of ink has been spilt over the "Amateur," but one thing which remains strongly in my mind is the wonderful display of the winner, Mr. Hooper. For three successive years he has figured in the final, winning on two of these occasions. It is a unique feat, some which I am glad to meet. A fine golfer, he defeated another fine player in Mr. Hooper, even though by a narrow margin.

SPOON. THE KING'S YACHT. For the first time for many years the King's yacht "Britannia" went to race in foreign waters. Towed by H.M.S. "Tiverton" she left Cowes this morning for Brixia where the big yacht and her crew gathered to race later this week. British Official Wireless Service.

LUCIFER GOLFING TOURNAMENT.

Australian Wins With 3 Up.

TWO KENYA MEN FINISH IN THE FIRST TEN.

["STANDARD" CORRESPONDENT]. London, July 12. The Lucifer Golfing Tournament was this year won by an Australian entry, Mr. Parker, who finished three up on Gordon. Kenya had two entrants in the first ten, B. L. Ballantyne (Mushaka), who finished seventh, and Claude Wright (Edmore) who won in 1903, eighth, seven down. (Copyright.)

East African Entries.

["STANDARD" CORRESPONDENT]. London, July 10. (By Air Mail.) Three courses were used for qualifying competitors in connection with the Lucifer Golfing Society's annual Empire Overseas Tournament, the final of which was played over Walton Heath. There were some remarkable scoring on the Stoke Poges course, where H. A. Parker, Australia, playing off 18, headed the list with a net score of 58. One competitor, Lord Cecil W. C. Spenshale, India, accomplished the third hole (180 yards) in one stroke.

Among the competitors from East Africa who qualified were the following: Mr. T. E. D. Wilson (Kenia) (16). Mr. R. L. Ballantyne (Mushaka) (7). Mr. C. P. Hirst (Mushaka) (6). Mr. C. Marshall (6). Mr. M. E. Coombs (Nairobi) (6). Mr. Claude Wright (Edmore) (4). Mr. C. W. Arnold (Edmore) (1).

Mr. A. H. Hoy (Kenia) (16). Mr. A. N. Hegarty (Thika) (9). Mr. H. J. Gibbs (Mushaka) (9). Mr. G. H. Anderson, (Mushaka) (9). Mr. E. K. Fegis, (Nairobi) (11). Mr. Owen Hughes (Kiambu) (7). Mr. B. W. Burt, (Derby) (Salama) (2).

Mr. A. Anderson (Mogogoro) (7). Mr. G. F. Webster (Arusha) (9). Mr. B. L. Hett (Tandaa) (9). Mr. Bernard Bouldon (Mushaka) (6). Mr. F. Forrest (Lango) (11). Mr. D. D. O'Connell Williams (Kenia) (16).

SMALL BORE RIFLE SHOOTING.

Kenya Club versus Nyasaland Club.

A postal match was shot between the Zomba Ladies Rifle Club, Nyasaland, and the Nairobi Ladies Rifle Club, Kenya, which resulted in a win for the latter club by 21 points.

Conditions were, ten of 4; 700 yds, even with 100 yds, each at 25 yards; 10 shots at each end. Highest possible individual score 200 points. Mr. Betty Irvine made top score of the contest, only dropping 1 point.

Success. Lukemba R.C. Total. Miss Betty Irvine 95 100-100. Mr. M. Irvine 98 100-100. Miss Madeline Irvine 97 98-185. Miss Sylvia Irvine 93 92-185. 777.

Zomba Ladies R.C. Mrs. Beaton 95 90-191. Mrs. Beaton 95 90-191. Mrs. Archer 96 94-187. Mrs. Harrier 95 94-187. 755.

GIROUARD CUP TIE AT NAKURU.

Kitale Lose by 4 Goals to 2.

Nakuru won their Girouard Cup match against Kitale at Nakuru on Saturday, by four goals to two.

Nervousness marked the play on both sides during the first half, when the home team needed a couple of goals. Nakuru forwards were much quicker on the ball, especially the centre-forward, J. Potgieter, who was always dangerous.

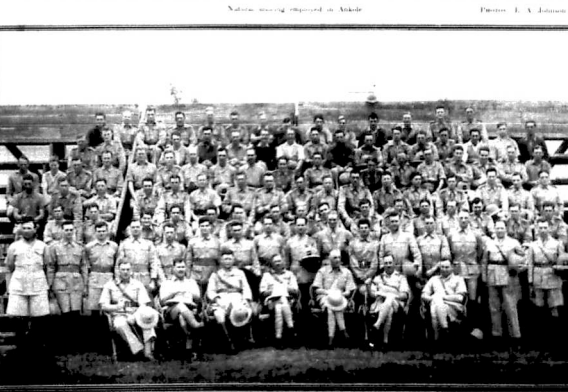

For the most part the end was a draw, with an occasional breakaway on the part of Kitale. Terraced 'rain fell throughout the second half, the pitch being rendered to sodden more or less than a quagmire. Kitale scored by a long shot, but the goal was not reached, but both teams were not able to register twice each.

Bennett was outstanding for Kitale, and J. Potgieter for Nakuru. Egebrech and Davis for Nakuru. Mr. O. C. Claver, of Nairobi refereed the match.

THE KING'S YACHT.

To Race in Foreign Waters.

[BY WIRELESS]. Rugby, July 17. For the first time for many years the King's yacht "Britannia" went to race in foreign waters. Towed by H.M.S. "Tiverton" she left Cowes this morning for Brixia where the big yacht and her crew gathered to race later this week. British Official Wireless Service.

The Nairobi Band (British Services of the Kenya Indian Force) at the Nairobi Race Ground when they were in camp from 20th to the 21st July 1904.

THE FEEDING OF BACON PIGS

Advantage of Giving Salt.

AUSTRALIAN AND CANADIAN EXPERIMENTS.

It is generally admitted that the popularity of Danish bacon on the British market is largely due to the fact that in Denmark pigs are finished in an approximately average weight of 250 lbs. and the pigs are light in the shoulder, and they also carry the correct amount of fat and lean which is the essential feature of the production of high quality bacon.

The Canadian Government Experiment Station, recently has spent a great deal of time and money in studying the factors which lead to the early finishing of bacon pigs, and the production of high class "baconers" from 200 lbs. to 220 lbs. weight. As a result of these experiments it has been conclusively proved, as Mr. Leachon states, that the feeding of a certain amount of salt is an important factor in the rapid production of the most desirable type of pig.

Astonishing Results.

Experiments, conducted over a period of years with 1,500 pigs, yielded some astonishing results. It was found that when salt was given to pigs at the rate of 2 lbs. to each 100 lbs. of live weight, the pigs averaged 1.7 lbs. per day. The pigs which were not given salt averaged only 1.2 lbs. a day. As a result it was possible to finish the pigs on the salt ration in about 125 days, while the pigs which did not get salt required 150 days to finish. The pigs were ready for the bacon factory in many parts of the world. It is believed that salt should not be fed to bacon pigs. This belief is curious in explanation, because salt is an essential part of the diet of almost every other animal.

Method of Giving Salt.

Trouble caused in the past by giving salt to pigs has been largely due to faulty methods of administration. Pigs which have been given salt in large quantities if an unlimited supply is suddenly made available, the consequent over-feeding of the pigs "interior economy" will result. On the other hand, if a daily ration is given in the right proportion, and in the right way, the results will be decidedly beneficial. In the feeding of salt, the pig, proper attention should be given to the quantity of salt given. It is not too much to say that the pig requires no salt in the feed, but that a small amount of salt is required, the salt should be mixed with the grain so that it will not be lost. The grain of meal should then be placed in the feeding trough, and the salt should be added thereto. The pigs will then eat the meal and grain, and the salt will be taken in this way there is no concentration of salt in any part of the feed.

No Ill Effect.

When a ration of salt was fed to pigs at Leachon's in the above manner, no ill effects were noted throughout the period of the experiment. The results of the experiment were so very evident that it gave a salt ration pigs made more profitable. Moreover, the pigs to be finished in 125 days, and the change from solid salt blocks in the pasture, to a salt ration in the feed, was not a harmful effect.

The six years' experiment at Leachon's definitely and conclusively proved that salt was a pig's ally, and the rate and according to the method used is beneficial, safe, and necessary. Rapid gain in weight was to be achieved, no ill effects were noted, and the salt thoroughly, and this proper giving removes the difficulty of salt in the feed, it is a helpful pig.

It was also established at Leachon's that by giving salt to a pig a considerable reduction in the economic grain ration can be effected. In fact, the salt ration made it possible to produce a cheaper and better bacon pig in a shorter time.

Australian Experiments.

At the Animal Health Station, (originally, Australia, feeding experiments were conducted with pigs from two months old upwards, which comprise cereal meal, protein meal, minerals and protein supplement, plus 250 lbs. of live weight per ton of maize and interest. In fact, the results of these experiments are sufficiently good to warrant particular consideration of their value as pig food.

A prominent American authority has recently stated that under existing conditions in Ohio, pigs can be fed efficiently and cheaply on corn, supplemented by protein concentrates derived from animal and plant sources, and a limited amount of salt. In fact, the complete ration for the pig can be prepared practically economy, marketing grain "on the hoof" or purchasing it in the guise of hogs.

The Value of Concentrates.

The main conclusion which has been reached is that the results of the experiments are embodied in the following summary: It is not too much to say that the pig by nature is a consumer of salt. The digestive organs of a pig can not utilize the same proportion of roughage or fibre in the feed as the pig. In fact, pigs cannot properly consume more than nine to ten per cent. of their body weight of some of the nerve tissues, and they will certainly eat a considerable quantity of salt, but the additional quantity will be largely wasted in the process of digestion. Food for use as mature stock can be fed more profitably if the concentrates are destined for the bacon factory.

In feeding cereals and cereal concentrates to pigs, it is essential to give protein concentrates. Protein derived from animal sources are more efficient than those derived from plant sources. The most profitable animal meal is milk by-product, and most meals of this type have been in use throughout the various experiments.

"SANDUQY" SOIL BACTERIA.

A Great Race Mare. Need for Phosphates.

REDDING AND PERFORMANCE

(By "Amiga")

There are very few race-goers who can fail to appreciate the great merit of "Sanduqy's" performance in carrying 11 or 12 10 lbs. and only failing by half a length to defeat her stable companion "Prince of Wales" (8 st.) in the Summer Handicap at the Nairobi July Meeting.

"Sanduqy" has now won 8 races, of which she has won 5 on the remaining four courses she has been placed second.

"Sanduqy" was foaled on March 31 1920 and got by the great stayer the Acol Cup G. G. "Sanduqy" daughter of "Ducky Queen," and "Sanduqy" brother "Sanduqy." With such pedigree there could be little doubt of "Sanduqy's" stamina, but it is remarkable that she has also inherited the speed and dash which can only be derived from "Sanduqy" and his sire the brilliant "Sandridge." "Sanduqy" has won over distances varying from five furlongs to two miles.

"Sanduqy" made her debut on the racecourse before she was actually two years old at the Nairobi March Meeting of 1922, and then showed surprising speed in running second to the brilliant "Cellarius" in the All Age Plate in 2 1/2 mile weight.

At the Nairobi July Meeting, she won in an easy victory in the All-Birds Cup (2 miles). On her next start, in the Kenya Derby Handicap, and a month later, in the Kenya Derby Handicap, she won in an easy victory.

"Sanduqy" gave 7 lbs. and a seven furlong race, and she won only just failed to coincide all the "Bouquet" in the summer Handicap, and next won the August Plate over five furlongs.

At the New Year Meeting "Sanduqy" got into all sorts of trouble, but she was eventually defeated by two horses, "Prince of Wales" and "Ducky Queen."

By whom she was coaching 30 lbs., and two days later again won the Kenya Cup (2 miles) at the Nairobi June Meeting. "Sanduqy" (11st. 10lb.) experienced her first defeat in securing the Ladies Plate (7 furlongs), and in July she ran second to "Prince of Wales" in the same race, to which some reference has already been made.

For some time past "Sanduqy" has been troubled with a slightly nervous condition, which is caused by the fact that she is invariably called upon to carry a heavy weight who think that this great mare should be treated as a champion, and in South Africa, proving her merit gives a chance of some other horse to win or India.

In conclusion, reference must be made to "Sanduqy's" perfect temperament. Nothing ever makes her nervous, and she is free from some of the nervous states which are so common to the race horse. "Sanduqy" is a very calm, a very brilliant, and a very sensible mare, and she is a very good race horse.

The soil, ground limestone, and the addition of a certain percentage of salt to the ration is advisable when the soil is deficient in this mineral. Particular attention should be paid to the feeding of grain, and the soil specially designed for the purpose, and most meals of this type have been in use throughout the various experiments.

THE "CARRIER" PROBLEM.

Definition and Description.

A MENACE TO THE FARMER.

The following article contributed by Mr. E. E. Butler, of the Johannesburg "Sunday Times" Farming Supplement will be of considerable interest to all farmers who recognize the imperative necessity of maintaining the fertility of the soil.

The wonderful researches of Professor Dr. Stokloss, the celebrated European authority, have given us some idea of the huge quantities of carbon dioxide and organic acids found in those portions of the soil where the roots of plants exist. These amounts of gases and acids are sufficient to kill most soil bacteria, and without them the soil can reach maximum production.

In order to fulfil their task, however, these soil organisms must have a plentiful supply of phosphorus at hand. For it has been found that all the valuable soil bacteria contain from 1 to 2 per cent. phosphorus of the dry matter when analysed.

Unfortunately, the view is prevalent that it is only the plants which require such elements as nitrogen, phosphorus, lime, potash, etc., but Professor Stokloss has found that these substances play as important a part in the nutrition of soil bacteria.

These organisms increase at an enormous rate, and it needs no great stretch of the imagination to realise the large quantities of phosphorus and other elements which these organisms require for their activity of the soil bacteria.

Plant Food.

But phosphorus is not only the most important constituent of the mineral portion of these creatures, but nitrogen in organic and inorganic form, phosphorus in the form of phosphate, potassium in the form of potash salts, iron in the form of iron salts, and other elements, all essential to the welfare of these microscopic forms of life.

It is, of course, impossible for the plants they assist to grow. Naturally the soil must contain sufficient and suitable organic matter as well as minerals.

The work of these soil bacteria is to transform the soil constituents (fertilisers and potential plant-foods) into forms suitable for direct assimilation and absorption by the roots. That is, and if the time before fertilisers were used, the soil would be able to support a crop.

Even the most available and suitable mineral matter, if not prepared by the soil bacteria, before the roots can absorb it.

It is, of course, impossible for the soil bacteria to do this unless they themselves cannot be assimilated by the plants.

Merit of Compost.

We can now understand why artificial fertilisers give better results when reinforced by animal manure. As a matter of fact, decomposing or better still, fully decomposed animal manure is like a host of soil bacteria with it every time it is applied to the soil. The exact stage of decomposition, for every stage has its specific set of bacteria.

The most useful ones are found in fully rotted manure, especially if plenty of earth is mixed with it while fresh, as is the ideal for a fertiliser, particularly from the point of view of soil bacteria.

Compost may be used to land with a piece of "dead" manure, especially if artificial fertilisers have been added to the soil.

The East African Standard
NATIVE PRODUCE.
The Marketing Bill.

Following the example of Tanganyika and Uganda, the Government of Kenya has introduced legislation to control and regulate the marketing of Native produce. The Bill was published in the Official Gazette last week and is similar to legislation already in force in East Africa. Legislation of this kind is necessary to protect the interests of the producer and to ensure that the produce is marketed in the most advantageous manner. The Bill provides for the appointment of a Native Produce Marketing Board, which will be responsible for the control and regulation of the marketing of Native produce. The Board will be composed of representatives of the Government and of the producers. The Bill also provides for the appointment of a Native Produce Marketing Officer, who will be responsible for the day-to-day management of the Board. The Bill is expected to be passed by the Government in the near future.

tion for Kenya, an exclusive trading licence may be granted. The Government is expected to consider all applications and make a selection of those which will be most beneficial to the country. The monopoly may be granted for longer than seven years initially, with the possibility of renewal. Such an exclusive licence can be a powerful means of increasing the revenue of the Government. It is expected that the Government will be successful in securing such a licence for Kenya. The Government is also expected to consider the possibility of granting such a licence to other parts of East Africa.

fire had ceased to do into their nerves and were now able to begin to do their bidding. It had meant some sacrifice and now they were beginning to see the results of their sacrifice. The Government was in a difficult position. It had to face the fact that the people were no longer willing to be treated as subjects. They wanted to be treated as citizens. The Government had to find a way to meet their demands. It was expected that the Government would be successful in doing so.

when British has made trade agreements in her own interests. She has expected property to be returned to her. The revenue of the Colony is still being paid to the Government. The Government is in a difficult position. It has to face the fact that the people are no longer willing to be treated as subjects. They want to be treated as citizens. The Government has to find a way to meet their demands. It is expected that the Government will be successful in doing so.

in order and in policy between the Government and the people. The Government is expected to consider all applications and make a selection of those which will be most beneficial to the country. The monopoly may be granted for longer than seven years initially, with the possibility of renewal. Such an exclusive licence can be a powerful means of increasing the revenue of the Government. It is expected that the Government will be successful in securing such a licence for Kenya. The Government is also expected to consider the possibility of granting such a licence to other parts of East Africa.

Mining License.
The Mining License Bill is expected to be passed by the Government in the near future. The Bill provides for the appointment of a Mining License Board, which will be responsible for the control and regulation of the mining industry. The Board will be composed of representatives of the Government and of the miners. The Bill also provides for the appointment of a Mining License Officer, who will be responsible for the day-to-day management of the Board. The Bill is expected to be passed by the Government in the near future.

of service from a highly organized business. In return, they enjoy the privilege of being able to work on their own terms. They are not bound by the restrictions of a salaried position. They are able to make their own decisions and to take responsibility for their own actions. This is a great advantage for many people. It is expected that the Government will be successful in securing such a licence for Kenya. The Government is also expected to consider the possibility of granting such a licence to other parts of East Africa.

BRITISH AIR FORCE.
Six Hundred New Machines.
Cabinet Approval.
For Expansion.
[LONDON, July 18.]
It is understood that to-day's meeting of the Cabinet finally approved the programme for the expansion of the British Air Force, by which it is believed that about 50 squadrons or 600 machines will be added during a series of years. The Air Force strength is at present 800 first line aircraft or 910 with the additional already arranged for during the present financial year.

Commons' Statement.
[LONDON, July 18.]
Mr. Stanley Baldwin will make a statement on the subject of wireless telegraphy in the House of Commons to-day. The statement is expected to be a long one. It is expected that the Government will be successful in securing such a licence for Kenya. The Government is also expected to consider the possibility of granting such a licence to other parts of East Africa.

HOPPERS IN MALINDI DISTRICT.
The Locust Report.
The following Bird Locust Report for the week ending July 19, 1919, is published by the Department of Agriculture:—The locusts are still in the Malindi district and in Malindi. In most of the other affected areas young birds are largely predated. Little really effective work has been done against these swarms as yet. It is considered that the cost of such a large force at this stage of the locusts is unjustified. One of the largest areas covered by locusts is in the vicinity of Mombasa where swarms will certainly cover it in a few days. In most of the intensive spraying which has been done recently, the swarms will not be affected. It is expected that the Government will be successful in securing such a licence for Kenya. The Government is also expected to consider the possibility of granting such a licence to other parts of East Africa.

A Distorted Picture.
For some time Saturday morning has been regarded as a day of rest. The Government is expected to consider all applications and make a selection of those which will be most beneficial to the country. The monopoly may be granted for longer than seven years initially, with the possibility of renewal. Such an exclusive licence can be a powerful means of increasing the revenue of the Government. It is expected that the Government will be successful in securing such a licence for Kenya. The Government is also expected to consider the possibility of granting such a licence to other parts of East Africa.

A Popular Appointment.
Every community in Kenya and every circle outside the Colony, and indeed beyond Eastern Africa, will join in congratulating the Colonial Secretary, Mr. H. M. M. Moore, upon his appointment to the post of Secretary of State for the Colonies in succession to Sir Arnold Hodson. The appointment is a great honor and a great responsibility. It is expected that the Government will be successful in securing such a licence for Kenya. The Government is also expected to consider the possibility of granting such a licence to other parts of East Africa.

The Labour Licensing Law.
The Labour Licensing Law is expected to be passed by the Government in the near future. The Law provides for the appointment of a Labour Licensing Board, which will be responsible for the control and regulation of the labour market. The Board will be composed of representatives of the Government and of the employers. The Law also provides for the appointment of a Labour Licensing Officer, who will be responsible for the day-to-day management of the Board. The Law is expected to be passed by the Government in the near future.

The Law also provides for the appointment of a Labour Licensing Officer, who will be responsible for the day-to-day management of the Board. The Law is expected to be passed by the Government in the near future.

Better Than Past Two Years.
The Government is expected to consider all applications and make a selection of those which will be most beneficial to the country. The monopoly may be granted for longer than seven years initially, with the possibility of renewal. Such an exclusive licence can be a powerful means of increasing the revenue of the Government. It is expected that the Government will be successful in securing such a licence for Kenya. The Government is also expected to consider the possibility of granting such a licence to other parts of East Africa.

Nyanza Province.
Very few firm swarms have been reported in Nyanza Province since the beginning of the season. It is expected that the Government will be successful in securing such a licence for Kenya. The Government is also expected to consider the possibility of granting such a licence to other parts of East Africa.

Wireless Service.
The wireless service is expected to be improved in the near future. The Government is expected to consider all applications and make a selection of those which will be most beneficial to the country. The monopoly may be granted for longer than seven years initially, with the possibility of renewal. Such an exclusive licence can be a powerful means of increasing the revenue of the Government. It is expected that the Government will be successful in securing such a licence for Kenya. The Government is also expected to consider the possibility of granting such a licence to other parts of East Africa.
