A RECULAR "DUST-UP" ON

David and Goliath Tuccle

BUT DAVID WON.

A story is current in English notoring circles of a "dust up" on the road between two "works" drivers from different factories one equipped with a famous sports car costing something around 4500, and the other driving a small, unpretentions family saloon. Although the sports car small. had every opportunity of showing its pace, it was held and finally passed by the cheap saloon. The surprising winner of this

little speed scrap is a most unusuat car. Its title is the Standard Ten-Twelve—which explains that it is an ordinary Standard Ten it is an ordinary Standard Ten-chassis carrying a Standard Twelve engine—and its home price, with a four-seater, four-door, sun-roof, sporting saloon body, is the modest one of £245, Its performance would give drivers of costly sports cars a shock, for, spart from a maximum speed of over 70 m.p.h., it has outstanding acceleration, and sits the road and handles so well that full use can be made with safety of these speed characteristics.

reached from a standing start in 16 seconds, and, if conditions per-mit, a mile or two covered at 60 or even 70 m.p.h, will soon make up for a brief stop.

SOIL EROSION.

A Study of Cause and Effect.

World Wide Problem of Vital Importance.

DISCUSSION OF DEFENSIVE MEASURES.

During the recent Coffee Planters' Days held in Nairobi, Capt. M. F. Ball, formerly a tea planter in Tanganyika and Ceylon, delivered a most interesting lecture on the vital problem of soil erosion.

The following article has been prepared from the lecturer's notes. In great part it is a verbatim report of the lecture. In certain instances, however, the article departs from the exact words but never from the sense of the lecturer's remarks.

Soil erosion is a most insidious enemy. It is all important that it should be recognised and fought by every farmer and planter in Kenya.

insisting too that Southern

Rhodesia must in future have a

representative on the East African

Group in London. One of the

most important matters of joint concern to all the territories was the question of native policy

which was likely to occupy an in creasing amount of attention in the near future.

Dr. Huggins said he would very much like to pay more than a flying visit to Kenya and he indicated that he would willingly come to the Colony if he could find an excuse to do so. "You

may find," he said "that I shall make the native problem an

Drowned While Returning from South Island?

POSSIBLE FATE OF MISSING SCIENTISTS.

Dr. Dyson and Mr. Martin.

As there now appears to be practically no hope that the two missing members of the Lake Rudolf Expedition, Dr. Dyson and Mr. Martin can still be alive the "East African Standard" learns that it is probable that an enquiry into their disappearance will be held shortly.

There seems little doubt that both the missing men succeeded in reaching South Island for traces of camping places were found. It is supposed that on their return trip to the mainland, their boat was wrecked and they themselves drowned. The story of their disappearance, as far as it is possible to piece together, is published to-day

No Further News.

to judge—those who are acquainted at first hand with condi-tions in the Lake Rudolf area— there is no hope that the two missing members of the Lake missing members of the Rudolf Rift Valley Expedition are atill alive.
The most likely explanation of

the fate of Dr. Dyson and Mr. W. R. H. Martin is that after leaving South Island in the expedition's South Island in the expedition's collapsible boat they encountered atormy conditions, their frail craft was wrecked and they were drown-ed. In support of this theory is the fact that although traces of their camping places on South Iswas no sign of equipment or of the book: whilst the discovery of the mainland, were drowned.

It is now possible to provide a diary of the events leading up to the tragedy and the fruitless search for the two scientists.

First Crossing to Island. July 25. Mr. Fuchs, leader of the expedition and Mr. Martin, sur-veyor, crossed in a small canvas boot, fitted with an out board issel, fitted with an out board motor from their camp on the shores of Lake Rudolf to South Island. The suggestion to ex-plore South Island was made in a letter received by Mr. Foshs from Admirsi von Hobuel, who with Count Felek, discovered Lake Rudolf in 1889. One of the questions to be decided and which the expedition hoped to answer was whether South Is-

turn to his camp on the lake shore with the object of trying to obtain further news of his missing colleagues. He was accompanied by a police patrol which had been instructed to obtain camels at Sirima and to answer was whether South Is-land has ever supported human life. July 29. Mr. Fuchs returned to the patrol as quickly as ever pos-sible the eastern shore of the lake for traces of the missing mainland leaving Mr. Martin working on the island in the ex-pectation that Dr. Dyson would

oin him in a day or so. on the mainland and travelled on foot to the south end of the lake. Dr. Dyson remained in comp awaiting favourable weather to cross to South Island. Natives employed in the main-land camp state that Dr. Dyson left for the island that day. Whilet there is of course no de Whilst there is of course no de-nite proof that he reached the island, the probability is that he island, the probability is that he did, since the camp sevenats say they saw the light of a hurri-cane lamp on the island that night, which was the pre-arranged signal for reporting a sate landing. Championship Table. Good General Level of Play. SUSSEX DEPOSED FROM THE TOP

OF THE LIST.

Magnificent Challengers But-

IS THE DRESS TOO FORMAL FOR THEM TO WEAR?

Sussex have lost the lead in the County Cricket championship. It would seem that they are not intended to be a champion county; the title, which they have never yet worn, does not suit them. Perhaps it withat the dress is too formal for a side who by nature wear more Of the older clubs in the country the majority were represented, and it was to be regretted that of the newer clubs, Naivasha could not send a team to compete in the easy-going clothes. So soon as the threat of the championship fall on them so soon does their cricket deteriorate.

a tusion to compete in the barriers of the bar of a position of honour. Moreover, they are not really quite good enough when faced with adversity or a spell of particularly good play by their

If they are to win the title, then they must succeed in the three remaining matches which they have to play. Somerset, Lancashire and Yorkshire must all be accounted for. But it must be said that Sussex game, missed very few shots at goal. As a side they played above their handicap and of this fact the have been unbecky in the absence of Jim Parks and Wensley, two toer nameers and of this fact the basic section unitary in the absence of Jim Parks and Wensley, two handicapping committee have take typical Sunex cricketers, for it is in the aggregate value of their players and due note, with the result that rather than in any individual qualities that their strength lies.

fell to Surrey at the Oval. But the Ovalites are a much better side than their position in the table makes them out to be. On their "ain midden" they are just about as good a "home" side as there is in the

Lancashire have pulled up tremendously in the last few weeks to get to the top. One doubts if they can or will be overhauled. Their game with Sussex should be a very exciting one.

The following table shows the positions of the counties at the game.

The remaining tie in the first week-end, the figures in parentheses indicating how the County finished

Keep Young and Healthy What KALZANA does

The discovery of Kalzana has confirmed the theory that many com-firmed the theory that many com-tained the second of the second of the third element in our system. Years ago physicians had expected to find that lack of calcium would be at the bottom of many complaints, but ex-periment to conquer these com-plaints with calcium-salus were a ladors. We now know that the happened because ordinary calcium.

happened because ordinary calcium combinations leave the body again without doing any good. But all these difficulties have been over-come with Kalzana. In Kalzana

Complaints that show that Kalzana is needed-right away

In Women

Discomfort and pain can usually be combated in a short time by Kalzana tablets, for Kalzana regulates the system and relieves the pain.

As a doctor wrote in the "South African Medical Record": "Whenever there is disfunction in the body, lack of calcium is probably a contributing factor." By is probably a contributing factor." By taking Kalana the Calcium balance is restored and the functions are regulated again. Because Kalzana is a calcium food and does not contain any harmful ingredients it must do good and cannot possibly be harmful.

In Skin 2 Troubles

Lack of calcium leads to Rashes, Ecz Nettle-rash, and other forms of Skin Trouble. Here Kalzana has been proven of the greatest value.

In the case of Nettle-rash a few large doses (6-8 tablets each time) will conquer the rash very quickly indeed and stop the itching. In the case of Eczema, it will take a little longer, for the calcium must have time to strengther the walls of the blood-vessels and the cells of the skin.

Gradually the Eczema will disappear and the itching will stop.

When one is over forty

Easily induced fatigue, dizzineas, difficult breathing, blurred vision, low resistance against colds and infections—all these symptoms are warnings which should be heeded immediately, especially if one is over forty. Calcium deficiency at that age becomes a distinct menace and Kalzana should be taken in order to avoid unpleasant reminders of

salt in such a vay that it is ;—
easily absorbed,
easily retained,

advancing age. For Kalzana (by increasing the calcium content in the body) lowers high blood pressure, and once the blood pressure is brought back to normal the annoying

symptoms will disappear. Remain healthy throughout

middle and old age you can with KALZANA.

In expectant Calcium is needed in great quantities to build up bones and body cells of the expected child. Manuscomplaints of the mother are due to the growing child's excessive demands for calcium. General weakness, loss of hair and toothecay may be conquered with Kalzans, the calcium food.

Do not wait till YOU

or your CHILD suffer

The General Practitioner,

well-known Medical Journal, writes "Kalgana acts efficiently in pro-tecting the expectant and nursing mother against a dangerous loss of calcium."

Why lose your health? Guard your youth and freshness by taking Kalzans. Then you will also be sure that beby will be strong and sturdy.

For Weak Teeth

Many people suffer continuously from their teeth. Of course this should not be, and it need not be, if one takes Kalzana tablets regularly. For Kalzana arrests tooth-deary and makes your teeth estrong-dard hard, and able to withstand the attacks of microbes and acids.

Body cells ~ Remember that your teeth are living parts of your body and that the food they require -calcium-is liberally infused into your body by Kalana.

will be remembered that the original scheme published last autumn, whilst meeting with general approval in principle, was criticised on the scope of expense.

The new scheme has been designed with the express purpose of meeting this objection and yet ensuring that an all important service is instituted as soon as possible.

It is intended that the Milk Recording Scheme will commence on April 1st, 1935, always provided that adequate support is ensured. It will be conducted under the authority of the committee of the East Africa Stud Book.

PROGRESS TOWARDS EVENTUAL CONTROL

SEARCH FOR ORIGINAL BREEDING GROUNDS.

The memory of man is notoriously short, but not so short that farmers will readily forget the "years which the locust has eaten."

Kenya experienced the force of the locust menace at a time when she was also faced with an unprecedented fall in the value of primary commodities. Thus the lesson was well rubbed-in and cereal and dairy farmers will read with anxious interest the steps which are being taken in the effort to eliminate this dread pest.

The following paper by Mr. H. B. Johnston of The Imperial Institute of Entomology was read at the annual conference of the Uganda Planters' Association.

NEW STRATOSPHERE ASCENT.

Professor Max Cosyns Probes Higher Regions.

STUDY OF COSMIC RAYS: NO ATTEMPT ON ALTITUDE RECORD.

THEODOR REUTER'S AGENCY.

Professor Max Cosyns, Belgian engineer and companion to Professo. Piccard on the latter's first attempt to enter the stratosphere, will take off to-day from Hourhavenne, Ardennes.

Three hundred soldiers are assisting in the work of inflating the huge balloon to its capacity of 14,000 cubic metres in the glare of floodlights and in the presence of many journalists, photographers and members of the general public. Cosyns will not attempt to set up any records, his object in making the ascent being to study cosmic rays.

SEEN IN JUGO-SLAVIA

Vicana, August 19. Professor Cosyns's balloon passed over Graz, and later, Ossek is Professor Cosyns was apparently making no effort A prominent scientist expresses the view that the occupants we

suffocated after reaching a great height.

BOTH OCCUPANTS SAFE.

Belgrade, August 19, Professor Cosyns's stratosphere balloon landed near Murska So Yugoslavia at 9 a.m. to-day. Both occupanta are safe.

The photograph shows Professor Cosyns (left) in his laborator Mr. Nanderelts, who accompanies him on his ascent.

ANTIGOLAY, REPTEMBER I,

See State Control of the Colony, and loss of soil at less to converse of and, but also to the Colony, and loss of soil at less to converse of the concern of information of the Colony of t

control, the effect of evaporation and matter than the state into consideration. This has a direct beauting on the problem.

It is evident that have soil extended that the state of the st

the Native has oven usefuling on tering seeds. Some falling on stony ground, but the majority on good ground. They seem to adopt the same procedure with their momie eropa.

COST OF LIVING

Slight Rise Recorded in England.

[BY WIRELESS.]

Extraordinary enthusiasm has arked the opening of the season Rugby, August 17.
The cost of living figure rose marked the opening of the season of promands concerts at the opening of the part mostly of produced in Falli, which Siz Heavy The Ministry of Labour Gazette conducting.

Since Sir Henry first took over the conductoring at the age of 23 he has renormously simulated proplate interest in classical and unodern music.

The simulation of the production of the conductoring the simulated can also we that of the corresponding date of last year.—British under music.
