IMPORTANT RULING BY REVISION COURT.

To Hear Defence Story before Committal.

The Revision Court has ruled that a defendant in a criminal case should be allowed to hear the prosecution's case before being committed to prison. This ruling is significant as it allows the accused to know the charges against them and to prepare a defence before being taken into custody.

The court's decision was reached after a long and detailed hearing. It is expected that this ruling will be applied to all future criminal cases, ensuring a fair trial for all accused persons.

High Court Ruling

The High Court has ruled in favour of the plaintiff in a case involving a contract dispute. The court found that the defendant had breached the terms of the agreement, and the plaintiff is entitled to damages. The ruling is a clear statement of the law regarding contractual obligations.

LUBRICATION PROBLEMS.

Explanation of How Wear is Prevented

DOES OIL WEAR OUT?

It is a common question whether or not oil wears out. The answer is that it does, but not in the way that is generally supposed. The oil does not become "used up" in the sense that it is consumed and cannot be used again. It is rather that it becomes "contaminated" and loses its lubricating properties. The oil is constantly being broken down by the heat and pressure of the engine, and it is constantly being oxidized by the oxygen in the air. This process of oxidation is accelerated by the presence of lead in the oil, and it is this oxidation which produces the "sludge" which is often found in the oil pan of an engine. This sludge is a mixture of carbon and other products of the oxidation process, and it is this sludge which is the real cause of the wear and tear of the engine. It is this sludge which is the real enemy of the engine, and it is this sludge which is the real cause of the "oil starvation" which is often experienced by the driver of an old engine. The oil does not wear out in the sense that it is consumed and cannot be used again. It is rather that it becomes "contaminated" and loses its lubricating properties. The oil does not wear out in the sense that it is consumed and cannot be used again. It is rather that it becomes "contaminated" and loses its lubricating properties. The oil is constantly being broken down by the heat and pressure of the engine, and it is constantly being oxidized by the oxygen in the air. This process of oxidation is accelerated by the presence of lead in the oil, and it is this oxidation which produces the "sludge" which is often found in the oil pan of an engine. This sludge is a mixture of carbon and other products of the oxidation process, and it is this sludge which is the real cause of the wear and tear of the engine. It is this sludge which is the real enemy of the engine, and it is this sludge which is the real cause of the "oil starvation" which is often experienced by the driver of an old engine.

How Bearings Overheat.
When a bearing is run in oil, the oil film between the shaft and the bearing is broken up by the heat and pressure of the engine, and it is this broken up oil film which is the real cause of the "oil starvation" which is often experienced by the driver of an old engine. The oil does not wear out in the sense that it is consumed and cannot be used again. It is rather that it becomes "contaminated" and loses its lubricating properties. THE NEW FORD CAR

FIRST AUTHENTIC PHOTOGRAPHS OF THE NEW FORD CAR. The six body models and chassis of the new Ford car are shown above. The new car has graceful, distinctive lines, exceptional power, unusual speed and getaway. It has been driven at more than sixty miles per hour; accelerates from 0 to 25 miles per hour in 8 1/2 seconds in high gear; travels 40 miles per hour in second gear; is fitted with three-speed transmission of Lincoln design and is completely equipped. Each model is offered in a number of light optional color combinations. No. 1 is the new Tudor; 2 the new Chassis; 3, rear view of the Flinton; 4, the new Chassis; 5, front view of the Flinton; 6, the new Sport Roadster; 7, the new Sport Coupe; 8, the new Fordor Sedan and 9, the new Coupe.

Acceleration—0 to 25 miles per hour in high gear in 8 1/2 seconds. Spread—better than a mile a minute. Power in first gear—low speed with the front wheels cranked and from a dead stop the car will turn in a tight circle, forward or reverse, without effort. Riding comfort—shock absorbers permit comfortable travel at high speed over the roughest road. Roadability—this car's low center of gravity holds it steady to the road on its unbalanced tires over all high speed. Positive steering control—A hand held on the steering wheel will hold the car steady in loose road and over bumps. Turning radius 17 ft. Relative braking—the constant response of mechanical foot...

Engine lubrication—Combination of pump, splash and gravity feed lubricates all frictional surfaces—excess of motor oil is... Cooling system—Combination water pump and Ford thermosyphon system, double radiator, ample ventilation. Engine warmers are quickly set with an overboard. Electrical system—The new Ford design distributor is mounted on the cylinder head and connected to spark plugs by means of short bronze links instead of long wires ordinarily subjected to wear and oil. The "American" steering knuckle and axle design, motor car idea of Ford design. Chassis—15,000 revolution per minute the low speed engine develops 40 H.P. The revolution speed is low for each power and sets an entirely new standard for light car speed and acceleration, entering speed and operating economy. Exhaust—Exhaust system is a premium. Chassis lubrication—Oil is fed to all 1000 daily accessible, cup-like by means of a pressure oil feeding lubrication tank and pump.

A Letter from Paris

BY FLORENCE BODLEY

There is a great deal of interest in the new styles of hats and shoes which are being introduced in Paris. The new styles of hats are very different from those which we have seen in London. They are more elaborate and more ornate. The new styles of shoes are also very different from those which we have seen in London. They are more elegant and more graceful.

THE TRAINING OF AFRICAN WOMEN.

(Continued from page 25.)

The former lady would disappear when active business was begun. He thought the League should attack the subject in a pamphlet to be distributed in the country. They were in a unique position to attack. Being established, as they always the country. They should be able to public that they actively supported the movement. It was the will of the women of the country. It required that to most deprive himself of the pleasure of hearing Miss Heywood's address was to be called by a meeting of the Executive Council.

Mr. Orlando de Bejean, President for the afternoon, said that she was not a member of the League, but she was a woman making Miss Heywood a better subject. A heavy vote of thanks was passed with acclamation.

The Scheme Explained.

Miss Heywood was greeted with applause when she rose to speak. She said she was grateful for the opportunity to explain the scheme and she would be pleased to do so. She believed that most people thought it was a good scheme if it was not a practical one. She provided a way to solve the social problem and would also meet the social problem. She was not a member of the League, but she was a woman making Miss Heywood a better subject. A heavy vote of thanks was passed with acclamation.

Appl's Difficulties.

Miss Heywood then turned to the audience with which many were already familiar. She said she was glad to see so many people present. She was not a member of the League, but she was a woman making Miss Heywood a better subject. A heavy vote of thanks was passed with acclamation.

TEA CAKES FROM THE OXIDIZ.

The tea cakes from the oxidiz were very good. They were made with the best ingredients and were very delicious. They were a great treat for everyone who ate them. They were a great success and were very popular.

THE TRAINING OF AFRICAN WOMEN.

The training of African women was a very important subject. It was one that needed to be discussed and debated. It was a subject that affected the lives of many people. It was a subject that needed to be discussed and debated.

KENYA INDIANS ATTRACTED BY BRAZILIAN OFFERS

Between 100 and 500 Prepared to Emigrate to South America.

ARTISANS, LABOURERS AND RAILWAY SERVAANTS.

Secretary of Nairobi Association Delays Departure of Large Group.

A movement is in foot among Indians in Kenya to emigrate to Brazil where attractive conditions are offered to agricultural labourers and artisans. According to the Secretary of the Kenya Indian Association at least 100 or 500 Indians are interested and had recently been stopped on the Nairobi Railway platform until the Indian leaders had made further enquiries into the scheme which had attracted their compatriots.

There have been difficulties regarding passports but it is being clear that emigration to Brazil from East Africa must take place through Bombay.

PASSPORT ARRANGEMENTS.

While making enquiries the Secretary of the Kenya Indian Association, Nairobi, the East African Standard learned that the Indian community in Nairobi had been informed that the British Government had agreed to issue passports to the Indian community in Kenya. THE NEGLECT OF THE COAST AREA OF KENYA.

Major R. B. W. Robertson-Eustace, M.L.C.,
Deplores Government Inactivity.

TROPICAL EXPERTS REQUIRED.

Coconut Industry Stagnant; Tropical Fruit Imported and
Production Unstimulated.

Last week the "East African Standard" changed the title of the article on the neglect of the coast and inland areas of Kenya from "The Neglect of the Coast and Inland Areas of Kenya" to "The Neglect of the Coast and Inland Areas of Kenya." The article is a plea for the Government to take steps to develop the coast and inland areas of Kenya. It is a plea for the Government to take steps to develop the coast and inland areas of Kenya.

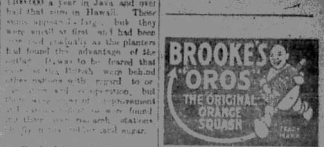

WHITE VS. NATIVE INTERESTS.

Major Robertson-Eustace, in his article on the neglect of the coast and inland areas of Kenya, points out the conflict between the interests of the white and native populations. He argues that the Government should take steps to develop the coast and inland areas of Kenya in a way that is beneficial to both groups.

Make old age enjoyable!

Old age is not merely a matter of years, as most people suppose. It is a matter of the wisdom of the body. A great deal can be done to avoid old people, for lackadaisical, ordinary, everyday habits, such as bad diet, indigestion and gravel, are the cause of old age. The advice, probably, are the most to be of help. They tend to give old people a better life. The advice, probably, are the most to be of help. They tend to give old people a better life.

Glorious White Teeth

There is nothing more beautiful than a smile that shows off a set of brilliant white teeth. It is the key to a happy and successful life. If your teeth are not white, you are not only less attractive, but you are also more likely to suffer from dental decay and other dental troubles.

There is a simple and effective way to get your teeth white and keep them that way. It is called Pepsodent. Pepsodent is a tooth powder that cleans and whitens your teeth without hurting them. It is the most popular tooth powder in the world, and for good reason. It really works.

FINGER PRINTS OF ASIAN DOMESTIC SERVANTS!

Common Ignorance of Terms of New Bill.

It has occurred to members of the Legislative Council of the Straits Settlements that the terms of the new Bill for the registration of domestic servants are not generally understood by the public.

The Bill provides that all domestic servants, whether they are Chinese, Indian, or Malay, must have their fingerprints taken and registered. It is alleged that many domestic servants do not understand the terms of the Bill and are therefore reluctant to have their fingerprints taken.

RAMADHAN UPIHEVAL AT THE COAST.

Rite Which is Misinterpreted by Natives.

The celebration of the festival of Ramadhan at the coast is a subject which has attracted much attention in the past few days. The festival is a religious observance which is observed by the Muslims of the coast.

It is alleged that the festival is often misinterpreted by the natives, who do not understand the religious significance of the festival. It is also alleged that the festival is often celebrated in a way which is contrary to the teachings of the religion.

COLD WATER THROWN ON ASIAN EMIGRATION.

Permanent Residence in Brazil Prohibited.

The Government of Brazil has issued a decree which prohibits the permanent residence of Asian emigrants in Brazil. This decree is a significant step in the government's policy of restricting the immigration of Asians into Brazil.

It is alleged that the decree is a result of the government's concern over the increasing number of Asian emigrants who are settling in Brazil. The government is concerned that the presence of a large number of Asian emigrants will have a detrimental effect on the Brazilian economy and society.

"These Kalzana-tablets cured me of Eczema"

In all skin infections Kalzana-tablets will in a very short time allay the itching, which as often drives the sufferer almost to despair. Used with outward remedies (lotions, etc.) Kalzana will quickly cure Eczema.

Kalzana tablets contain calcium in a form which is easily digested and greedily taken up by the millions of body-cells.

Kalzana strengthens the infected tissues and has a very soothing influence on the whole nervous system. By increasing the number of blood-corpuscles the assimilation of oxygen and indispensable food is aided. The calcium moreover checks inflammation by contracting the veins and so lessening the painful stretching of the skin in the infected tissues.

Get a supply of Kalzana-tablets to-day and see how quickly it will reduce the itching, check the inflammation and conquer the Eczema.

Kalzana THE CALCIUM FOOD

One large dose of Kalzana will cure eczema rash. At least 20 tablets of Kalzana are contained in each box. Made by the most eminent of European and American

Britain in Egypt.

The failure of the Egyptian Government to meet all reasonable requests by the people of Egypt regarding the withdrawal of British troops has had less reaction in Egypt than might have been expected. The situation has undoubtedly been made by the unwillingness of the Premier to carry on the government of the country and of the inability of any of the other parties, particularly the Nationalists, to be bitterly opposed to the British regime to see their way clear to undertake that responsibility by which they would have been in a position, if at all, to carry out their policy of antagonism. Beyond a statement of their case that on principle they maintain their objection to the presence of the British administration, and particularly of the British armed forces, as opposed to the desire for complete independence, they have been unable to take any action likely to precipitate a critical position. The draft Treaty was at the moment attempted to meet the Egyptian view consistent with the nearest imposed on Britain of safeguarding the interests of the Empire politically and economically and that it has been rejected by Egyptian legislators on grounds of an inability or unwillingness on their part to face the realities of the situation. The British Government, much to the relief of a large body of public opinion here, has not taken any action in Egypt and the result has been the failure of the draft Treaty to meet comprehensive purposes of Egyptian effect, the responsibilities which have existed since the declaration of 1922. There was a fear and without adequate grounds, that in their desire to carry out the policy of granting independence to Egypt which has been laid down since the Declaration, the Conservative Government might ignore themselves the very practical realities which place on Britain in Egypt a very special responsibility. That fear has been dispelled and it is significant that no criticism of the proposed Treaty or of the failure of the negotiations has emerged from any Party which gives grounds for the belief that a change in Government in Britain will revise that anxiety. The Conservative Government has given every definite assurance. It has declared that it will not admit its special responsibilities and interests in Egypt to be questioned by any other Power and will regard as unfriendly any interference in the affairs of Egypt by any foreign nation. Not only so, but in view of these special interests, Egypt is afforded a measure of protection on behalf of the British Empire against any aggression which she could never hope to provide from internal resources. Foreign interests in Egypt are also again secured by the British guarantee and on the strength of the declaration the development of the resources of the territory can be carried on with security under peaceful conditions both in Egypt and in the Sudan. The outcome of the recent negotiations has been in all respects satisfactory. Britain has shown her willingness to meet Egypt's legitimate aspirations. She has enhanced the prestige she has won by her willingness to meet Egypt's legitimate aspirations. She has enhanced the prestige she has won by her willingness to meet Egypt's legitimate aspirations.

NASH

Leads the World in Motor Car Value

Unique Beauty---a 7-Bearing Motor and an Array of Costly Car Features

A pronounced advantage of the Nash standard is Sedan or coupe over other cars in its field is its 7 bearing motor.

As compared to a Four or to a six still powered with the older type four bearing motor its performance superiority is so great as to be almost unbelievable until you actually experience it.

You'll find it trigger quick in getaway of great power and speed, and with the supreme smoothness and quietness inherent only to the 7 bearing type of motor design. Its finely modeled body, of genuine hardwood construction like the world's highest priced cars, is a symphony in blue with the lighter shade of the body

panels and its casters hand-suitably set in Parker trim of the upper body.

In the interior there is further evidence of costly quality. For these Nash Motor Vehicles are fitted for the upholstery the strongest wheel of solid walnut, and the instrument panel and window ledges are of walnut finish.

Among many notable attractions included in a standard equipment are front bumpers, bumperless motorometer, 1 wheel brakes, and 5 disc wheels.

And Nash has set the price so low as to be but little more than that of a Four or cheap Six.

HOMELIGHT

This remarkable plant is destined to be the most important and largest selling house lighting outfit in the rapidly developing territories of East Africa.

There has long been a demand for a high grade, compact electric lighting outfit, smaller in size than the usual type of lighting plant, low enough in price to be easily afforded by every farm, estate and private home. HOMELIGHT meets this demand.

Homelight is a self-contained electric generating unit, which means an engine and dynamo contained in one single compact unit.

The engine operates on petrol or paraffin.

The engine is of unique design and construction—the most efficient, dependable and economical ever known. It is simple itself as valves—ONLY SIX MOVING PARTS. Hundreds of plants have been in operation for years without a repair or replacement part. No Homelight has ever worn out.

The dynamo is wonderfully efficient, furnishing an output of 900 watts or more of 24 volts. The Bosch Magneto and control devices are marvels of ingenuity and sturdy reliability, proved by years of practical use.

Can be used to illuminate a large or small house, three or four cottages, or a battery of six or eight storage batteries may be employed.

Homelight needs no foundation, supports it down with heavy cast iron legs. Homelight is really portable, weighs only

110 pounds and can be carried for short distances by hand or longer distances in any motor car.

Homelight operates silently and without vibration, and will light all lights, including separate electrical machinery up to and including 10 horse power.

Homelight is simplicity itself, simpler than any motor car, and if there should be any trouble, no need to send for a repair man, just pick up Homelight, put it in your car and take it to any garage. No electrician's services needed.

Homelight is really portable, weighs only

LADIES FASHION'S

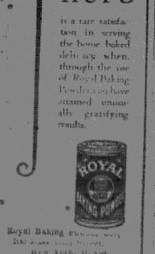

Bonny striped Fashion's latest whamy is the frock of striped stripes, cut out and arranged that the stripes suggest money springs from the right hip, where the drapery are held in place by a large twisted buckle.

According to all the reports, the fashion world is about to begin life in its new season. A lot of models and models are expected to start the season of the year. The new season is about to begin. The new season is about to begin. The new season is about to begin.

A Letter from Paris

BY THOMAS BURNETT

Paris, April 13, 1906. The fashion world is about to begin life in its new season. A lot of models and models are expected to start the season of the year. The new season is about to begin. The new season is about to begin. The new season is about to begin.

Quant-shaped pockets are a favorite feature of some of the latest frocks. The baggy-shaped frock, finished with long pink lined drapery from the breast part of the pocket, is the most favored.

THE NEW COLOUR SCHEME

In reviewing the new color scheme, it has been noted that the new color scheme is about to begin. The new color scheme is about to begin. The new color scheme is about to begin.

Accused's Statement

After the witness had finished his statement, the accused was asked to give his statement. He stated that he was not a party to the crime and that he was innocent of the charges against him.

The Defence

The defence counsel presented a strong case for his client, arguing that the evidence against him was circumstantial and that there were reasonable doubts as to his guilt.

Denial of Guilt by Accused

The accused has firmly denied all charges against him, stating that he is innocent and that the prosecution has failed to prove its case beyond a reasonable doubt.

Borri, Limited.

A YEAR OF RECORD SALES.

The 1919 Annual Meeting of Borri, Limited, was held in London on 24th February, 1920. The Chairman, Mr. George Lawson, Chairman of the Board, reported that the year was 1919-20, the highest dividends were being paid in the previous year, 1918-19, had been added to the Reserve, bringing that up to £1,000,000. He added that not only had Borri's sales for the year broken all previous records, but that the actual increase in the 1917 sales over those of 1916—had been greater than in any year since 1911.

A 9,000,000 Acre Estate.

The Board Australian Estates, some 9,000,000 acres in extent, were situated in Northern Australia, over 1,500 miles from a big city.

The recently reported break-up of the drought would seem to be a great relief to those who had expected a good part of their stock as an acreage could now be rapidly taken Australia, once again.

The readiness of water from their land-owning trust had even more to do with price than quality. Each season they sent a good portion of the Borri Australian Estates to the West Australian Government works, and the price received for them was just about the price they received for a kilo (taken off a stone of similar weight) at their factory in the Argentine. Yet the price paid for better cattle in Malawi or Rhodesia was quite as high as that paid by buyers for cattle in large Argentine estates.

"First-Class" for Cattle.

Their land-owning trust had a cattle service from Malawi. The cattle they would buy from the land and use to do the work on their own make-pens. From the end of the year it would be done with their own cattle service, and the cattle would be used in the making of wool. The cattle would be used in the making of wool, and the wool would be used in the making of wool.

Buy power and economy - not rated horse-power.

TO-DAY horse-power rating has an entirely new value. It is not size that determines a car's power and performance, but efficiency and it is in the building of efficient cars that Great Britain leads the world.

Morris from the outset has built only high efficiency cars, and consistently through the years the power unit of the Morris has been more and more developed, towards greater efficiency, increased economy.

To-day, when choosing your car, look for efficient economical power - rather than rated horse-power. **You will save good money.**

Reliable

The new Four is of true Dodge five in the high quality of its vital parts.

All forgings, gears, shafts and springs are of premium materials and other costly alloy steel giving great strength and long wear, with low maintenance expense.

Bearing is amazingly easy because of the great leverage exerted by the steering gear, and the reduced friction resulting from ball-bearing steering spindle.

The famous Dodge 134" motor bears quiet, reliable engine performance with exceptional speed, surplus power and quick acceleration—more than adequate for every need.

LADY BAILEY CRASHES AT TABORA.

Machine Wrecked But Pilot Uninjured.

Lady Bailey, wife of the well-known South African millionaire, who is flying in her Moth aeroplane from England to the Union of South Africa, crashed at Tabora on Tuesday. She was unhurt.

The bare official intimation of the disaster to her courageous flight gives no details but it is presumed that she crashed on landing on Tuesday afternoon. It is known that the Moth is so badly damaged that it cannot continue the flight.

Inducted, however, by the Moth and determined to complete her trip, Lady Bailey wired to Commander Mansfield Robinson, Nairobi, yesterday and he hopes to send or take his Moth to Tabora in a few days.
