**400 MILLION SHEEP**

COOPERS' DIP is undeniably pre-eminent in every sheep country in the world.

Since the introduction of Coopers Sheep Dipping Powder in 1943, it has become universally known and has long been recognised by stock owners as the perfect sheep dip.

Other sheep dips have been offered to farmers from time to time but after fair trial there is none to equal Coopers.

Make sure of success in your sheep dipping by using the world's favourite Dip—COOPERS' DIPPING POWDER.

The annual sales throughout the world today are sufficient to dip over 400,000,000 sheep, which is conclusive proof of its supreme merit.

But Frederick cried so hard that after the whole family, and three boys had exhausted themselves walking up and down to where he had first appeared...

The children thought that his mother could come to find her fabled offspring, instead young Frederick, who must surely have descended directly from Kipling's 'Elephant's Child', took himself and two 'suitable animals' deeper into the forest. This time to knock on the door of a lumbering pygmy named Mr. Laddis on the latter, answering the summons, threw open his door to...

"THE LEGEND OF THE FLOWERING FERN"

The East African Territories, Kenya and Uganda, have many varied provisions for the re-settlement of the ex-soldier, which cannot find employment in the training centres and rehabilitation centres. The East African Office in London, at the Commonwealth Conference the other day, is dealing with hundreds of inquiries from British people every month.

It looks on the face of it as if nobody could be disappointed and certainly that nobody could be overlooked or forgotten. But there is one class of ex-soldier who cannot find service at present who either has a specific right and responsibility to help him or who is voluntarily ready to do so. A number of men, the Forces having saved a little capital, want to set themselves up in business in a modest way. They want to open a shop, or an office, if that is their preference, of the mobile kind they want some headquarters, however small, where they can get up a name-plate and begin to earn their living again in civilian life, they cannot get business permits.

Not so long ago we focused attention on the shortage of houses for new and old residents alike. The position is hardly less serious for the young who want to start business immediately. Even to find a room to live in has become a difficulty. They return to find that they have to start a business in a queue with people who never actually get to the start, and they make any sacrifice of time or opportunity, never get up on their feet or heard a word from anybody.

The ex-soldier, who has in the personal sense wasted several years of his life, who has been in being upon a square deal in this matter of business permits. Whether he can think of being treated justly. He has a strong bias for special aid, and he has every claim upon the help of the community authorities and its staff. He has to be helped. He should not have to stand at the end of a queue with the same name to an already long list of applicants who have had no service.

This is a matter which we compare to the early attention of the Chambers of Commerce. Just as we are planning to have a settlement on the land, so we should be planning for new settlements in business. There is room for these young men. But they must have help in finding a place where they can start and they are entitled to local established commercial community and its organization for the advice and guidance assistance they need. They should not have to make a hazardous new beginning, wasting precious time and money in the hunt for a place while they look vainly for an office or a shop and find every kind of competitor standing in their way.
