DREAM CAME TRUE

To Guide Handicapped Children

PIONEER SPECIALIST IN THIS FIELD OF WORK ARRIVES IN NAIROBI

EVEN the worst cases can be made into fairly useful citizens. This is the hope Mrs. H. M. Glennie, who has just arrived in Kenya to join her ex-Army husband, holds out for mothers of physically and mentally handicapped children. She should know, as she has been guiding backward little people to keep pace with their World since 1922, when the work she was doing was very much at the pioneer stage in Britain. Today also is a pioneer specialist in this type of work in Kenya.

It all began when Mrs. Glennie, then aged 21, was called out from the hospital where she had the post of a trained nurse to take a child of 11 years to a special school in London. Her small patient was one of the first private school establishments in England for backward children. There were only nine pupils at the time and the majority of them were boys. It was the prohibition of the war which made it difficult to get the school started and so Mrs. Glennie stayed on for a year and a half. After she had gained some practical experience she then went on to London to take a proper training course.

As I was saying...
 "when you interrupted me—Cow & Gate is quite the most satisfactory food I know."
 "As a young man I was not very robust—but I got like a million dollars!" says
 Yes, take the advice of age and long experience and INSIST ON COW & GATE!

Kenya's First Children's Hospital Will Fulfill an Urgent Need

After work broke out, Mrs. W. Wright, matron of the Nursing Home, found it was not possible to take any more patients with sick children. It was the old and story of a hospital which could not be stretched to meet the increased demands of a growing population—both adults and children.

There were 120 patients in the hospital at the time of the outbreak. The hospital was built in 1922 and was designed to accommodate 100 patients. It was found that the hospital was not only overcrowded but also that the buildings were in a state of disrepair. The hospital was built in 1922 and was designed to accommodate 100 patients.
