FINANCE AND COMMERCE

Sugar Act's effect on refiners

The chairman of Tate and Lyle, the sugar refining company, said in London that British refiners would have to absorb the flow of foreign refined sugar by ordinary means of competition, as the proposed British Sugar Act came into force.

At present the uncontrolled entry of sugar to the British market is prevented because the Ministry of Agriculture and Fisheries is the sole buyer, and it has the right to pass through the Committee for the Control of Imports and Exports to implement the terms of the Commonwealth Sugar Agreement and to ensure the continuation of the United Kingdom sugar industry on a footing as equitable as possible to other countries.

KENYA (WOOL)

KENYA SHEEP SELLS WELL

Almost 100,000 of Kenya wool sold well in good competition with New Zealand wool in the London sale on Wednesday. Prices reached a record and were well above the previous year's level. The sale was held under very poor quality but the quality was good and the price was high.

Features of the market was competition for some consignments of New Zealand wool, with several of the consignments from the United States, New Zealand and good state and some very strong demand and under very poor quality but the quality was good and the price was high.

£600,000 PAPER MILL PLANNED IN KENYA

LONDON may soon have a large-scale mill supplying paper for the Kenya Box Factory. A pilot plant to be built in Mombasa proves successful. During recent visits to Kenya, Mr. J. Baumgardner and Mr. M. Baumgardner, managers of the Danish Columbus Group, which controls the Kenya Box Factory and the Viking Sack Factory in Mombasa, discussed the construction of a paper mill in Kenya with the Government.

U.S. food bartered for houses in U.K.

Barter American food for houses in U.K. has been agreed by the U.S. Government for £1,000,000. The agreement is for 100,000 tons of food to be bartered for 100,000 houses in U.K. The agreement is for 100,000 tons of food to be bartered for 100,000 houses in U.K.

The bulk of Mombasa for manufacturing part of the paper used in the existing factory to deal with the water, timber and stone. The factory would be a modern one.

If the quality of these raw materials is good, the mill will be taken as a pilot plant to be built in Mombasa. The mill will be taken as a pilot plant to be built in Mombasa.

3 cheers for mother for discovering HEINZ

It was a great day when mother discovered Heinz Cream of Tomato Soup! Her family and dinner guests were thrilled with its rich, creamy flavor and tender pot complemented palate. Now the mother a host of delicious everyday meals about them!

At Heinz Cream of Tomato Soup stand these you shops. Its wonderful, honey flavor will make a hit with your family and friends, too.

GENIUS DENIED TEARS OF FAILURE

When war came to East Africa

By **MAT KOPSKY**

In these days of industrial revolution, mass production, mass "celebrities," of national epics, of frequently applied means of eliquo the claque and the publicity agent, one with difference to the "mass-produced genius" that in the term which is so common, when contemplating the life and work of a man, is a biographical the most crucial word is now celebrating.

It is a pleasure in January 27, 1956. Mozart is now 250 years exact; the span of 35 years exact; the work of his genius in particular forms.

From memory
Consider the external signs that genius has at the age of 5, he could, in a given hour, play a half an hour piano, and a year later he was making up small pieces which he later wrote down.

In his sixth year he started to compose as a performer and in his eighth year he used the pen to compose. The work of his genius was all the amount as composer.

Mozart

with more than 250 works to his credit. In his nineteenth years for instance, having been nearly introduced in the concert hall at that time, he made his first three violin concertos in the first three months of his life.

At the most striking point in his adult life, he was in his fourteenth year. In 1762 he was taken to hear the celebrated *Misere* by Pergolesi. After the performance he was taken home and wrote down the entire work from memory.

Pauper's grave
The internal ailment of his genius, however, is best gauged from the later years, the years of failure, of neglect by a hostile public, and the ensuing bitterness and poverty. Despite all that the spiritual

quality of his music grew to a point where he was no longer content with the three last symphonies for instance, he wrote a score of 26, and was composed in the field on December 6, 1791, and was buried in a poor man's grave. The few children who followed in a violent storm, and the few who were left behind in the same place remain unknown.

There is one more thing to be said. Mozart was not an all-out genius in his music. We have not seen his work in all countries of opera as the great symphonist and today the hierarchy of art, there will be Mary Marston, a convert at Government, and all three of these are the most important works will be heard. The *String Quartet* (No. 15) for the *Sonata for Violin and Piano* (No. 17) and a most fitting form of Mozart collaboration, the wonderful *Concerto for Violin and Piano* (No. 21).

Devotion to music
From what one knows of Mozart's mother he favored looking and his later devotion to music is not surprising. He was taken to hear the celebrated *Misere* by Pergolesi. After the performance he was taken home and wrote down the entire work from memory.

He was taken to hear the celebrated *Misere* by Pergolesi. After the performance he was taken home and wrote down the entire work from memory. He was taken to hear the celebrated *Misere* by Pergolesi. After the performance he was taken home and wrote down the entire work from memory.

ORE MEAT FOR MOMBASA AT EXTRA COST

Doctor tells of heaped bodies at prison

Producer prices raised to cover Rift Valley supply

W. MOORE, of the Uganda Medical Services, Kampala, has found a pile of bodies when he arrived at the hospital at Buganda on the afternoon of October 17, the day the bodies of 50 patients were given over at the first of a series of handovers. The bodies were given over to the Uganda Medical Services, Kampala, by the Uganda Medical Services, Mombasa, who were sent to Mombasa with a number of other medical staff.

PRODUCER prices for goats and Grade C sheep for consumption in Mombasa are increased from February 1, 1966. The Government announced last night that it had decided to increase to ease the acute shortage from the Rift Valley.

Town's growth

At the 1960 census the population of Mombasa was 100,000. It is now estimated to be 150,000. The town's growth has been rapid and is expected to continue.

Willing to pay

The increases have become a source of concern to the African Reserve Bank, which has been asked to pay the extra costs of the meat.

CLIPPER

TRAFFIC COMPETITION

The manufacturers of 'CLIPPER' cigarettes offer the following prizes for the three best answers towards meeting the present-day traffic problem in the CITY of NAIROBI

1st. 100 gns., 2nd. 50 gns., 3rd. 20 gns.

Envelopes to be marked "Traffic Competition" and address to top left-hand corner, and affixed to the envelope.

Traffic Competition
P.O. Box 1945
Nairobi

Entries to arrive by Feb. 29th, 1956, and received after that date will not be considered.

Competitors may send in as many entries as they wish, but they should be brief and should not exceed 200 words.

The following gentlemen have kindly agreed to act as judges and their decision will be final.

- Brig. Sir. Godfrey Elphinstone, C.B.E., D.S.O., (President)
- Sir Eboos Birbhai, O.B.E.
- Mr. J. C. Thetford, M.A.

The result of the Competition will be published in the East African Standard on Wednesday, 1st March, 1956, and the three winning entries will be forwarded to the appropriate authorities for their consideration.

In promoting this Competition the manufacturers of 'CLIPPER' cigarettes are in no way inviting criticisms. Traffic is a problem in every country in the world and every city has its own particular

AMONG THE NEW BOOKS BY J. HUMPHRIES

A WORLD OF 'GOINGS-ON'

OUR books for review this week have the common denominator of being described as noisy. They are all concerned in one way or another with going-on and what is generally known as 'going-on'.

The 'noisy' element is by Mrs. Carme Crosby (the Christian name of the author) and the surname that of her second husband's in the autobiography of a well-known character in the art world. Like the famous Elia Maxwell also an American-born and has lived a similar, mostly gay, life.

The reminiscences are written with her delicate dandy, and she was at the height of her career in the nineties. This is a well-told, pitiful of the art world. Like the famous Elia Maxwell also an American-born and has lived a similar, mostly gay, life.

The reminiscences are written with her delicate dandy, and she was at the height of her career in the nineties. This is a well-told, pitiful of the art world.

The first novel of London, *Diavolo in Northumberland*, is an early one of the 18th century. The 'Goings-On' of the novel is the story of a young man and three beautiful women who are drawn to a sticky end. The Captain is a well-told, pitiful of the art world.

Russian plans a 'climate factory'

A Russian engineer, Mr. A. M. Mikhlin, has proposed to construct a factory in the north-west of Russia which will produce artificial climates for the purpose of testing the durability of various materials under different conditions of temperature and humidity.

The factory will be built in the north-west of Russia, where the climate is very severe. The purpose of the factory is to produce artificial climates for the purpose of testing the durability of various materials under different conditions of temperature and humidity.

ROBINA WRIGHT'S Story For The Children

Henrietta's Magic Skipping Rope

HENRIETTA was very upset. She had lost her skipping rope—the new one with ball bearings—and she knew Linda wouldn't give it back.

She didn't exactly say 'I won't give it back but she kept saying "I won't give it back" and she just one more' or 'I'll stop when you give me another one' or 'I managed last time', and so on. Of course she didn't manage to cross and she always had one more turn at that.

I think she thought that the skipping rope was Henrietta's all, and though it was really her own.

"I promise you I'll bring it back at bedtime tonight," she called at last, and Henrietta only looked at her and had shared her toys before she had even said a word.

"I'll stop when you give me another one" or "I'll stop when you give me another one" or "I managed last time", and so on. Of course she didn't manage to cross and she always had one more turn at that.

The prince and politicians must have used the same rope, but it is the same and so long because this was the province of the Bohemian for many years.

It is altogether a beautifully re-imagined in the colored illustrations of himself an habitué of the place.

This is a most enjoyable and very round of a famous illustration of the 18th century. The first novel of London, *Diavolo in Northumberland*, is an early one of the 18th century. The 'Goings-On' of the novel is the story of a young man and three beautiful women who are drawn to a sticky end. The Captain is a well-told, pitiful of the art world.

Henrietta started to cry. She was so tired and angry. She had been so kind and fair and taken turns with her rope. She had been so kind and fair and taken turns with her rope. She had been so kind and fair and taken turns with her rope.

Henrietta started to cry. She was so tired and angry. She had been so kind and fair and taken turns with her rope. She had been so kind and fair and taken turns with her rope. She had been so kind and fair and taken turns with her rope.

PIONEERS OF KENYA

MRS. HALLER—A WOMAN OF FAITH

by Joy Nicholl

As I sat talking to Mrs. Lily Haller about her life, I felt it was like reading an absorbing book or watching a particularly interesting play...

There is in Mrs. Haller a certain quality of vitality and give of her heart to it. Her face radiates an interest in everything and everyone.

Fled country Her father was forced to flee the country, driven to the coast and then to the islands...

Promised land There they had to hide their faces in the shadows of the forest, until the dark of night came...

On a mule The only other European they saw was the policeman who rode his mule on a path...

Bought farms Mrs. Haller had a great deal of trouble in getting the land she wanted...

Great hardships Mrs. Haller has overcome the hardships which have befallen her...

Nearly murdered They tried most of the country, vegetable, and fruit...

Things of value Three years ago while travelling south he had brought with him...

Kenya destiny She is the woman who has made the difference between the dream and the reality...

Iceland Is The World's Oldest Democracy

Few people realize that the world's oldest democracy is to be found in the tiny island of Iceland...

It happened in this way. From the earliest times, the people of Iceland have had a say in their own government...

On the contrary for the greater part of the year, the people of Iceland have been engaged in a struggle...

Once again, the people of Iceland have been engaged in a struggle for the preservation of their independence...

SUBMERSIBLE ELECTRIC PUMPS
for un-fading service

The ideal pumps for domestic and industrial water supply...

The pumps are the most popular and efficient means of providing the country-dweller with a water supply equal to that of a town system. The complete motor-pump unit is submerged in the well or borehole and simply connected to the surface by an electric cable. The pump works as well as it should, in fact, in the garden, yet the water will supply abundant water from a well or shallow water tank. It is not so complicated and well worth attention. Borehole submersible pumps are suitable for 1/2 in. or small outlets, for the home, farm, factory and many other uses.

DOLLAR RESERVES 'NOT GOOD ENOUGH'

Uganda firm's cement output up by 1,000 tons a month

An increase of more than 1,000 tons a month in production from the Tororo factory has been announced by Mr. C. M. Gibson, chairman of the Uganda Cement Industry.

In January the factory produced 3,000 tons of cement, compared with the average of 4,000 tons of clinker and 4,800 tons of cement a month last year.

Mr. Gibson said the higher production was the result of a new method of feeding the raw material into the kilns at Tororo and the introduction of a system to increase the circulation of air through the kilns. The improvements had been made by the factory's general manager Mr. J. Cameron.

New plant to be installed at Tororo will increase production to 10,000 tons a month by the end of 1956.

Orders for cement have been ordered from Germany, with the possibility of orders for about 100,000 tons of cement for the next year. The factory is also supplying Uganda's entire needs of cement, apart from supplying the Belgian Congo, and will pay their air passages and expenses for three to four years.

January figure: Treasury view

By Raimond Coxall

Gold and dollar reserves have been called the most sensitive barometer of the sterling area's economic condition. What a disappointment in terms is not only welcome. But, like the weather, the economic climate is subject to sudden changes, and, in this light, the trading on the January gold barometer must be considered accordingly.

The reserves rose during the month, but the increase was allowed for \$23,000,000 paid to the Bank of England in settlement of the sterling area's balance of payments. The draw on the gold reserves for the last three days and the monthly account shows a picture for the first time since the Agreement. But the official view of the Treasury spokesman is that it is still not good enough.

Gem deals in Sierra Leone

For the first time in Sierra Leone's history, a diamond and a large number of other gem stones were sold at a public auction on Wednesday. The stones were sold by the Government's diamond and gemstone department, which had been set up in 1954.

Seasonal factors

But we are now at the time of the year when seasonal factors are all in the picture for the first time since the Agreement. So, in the view of the Treasury spokesman, the January gold barometer is 'nothing to get excited about'.

Kaffirs still favoured: Coppers lower

THE London Share Market closed lower on Tuesday with a Wall Street decline. Kaffirs were still favoured, but a few new high-fliers were also seen.

at beck and call...

Shell's world-wide resources are at the service of East Africa.

When oil is found it is very often thousands of miles removed from cities and from those service stations, factories and farms that will ultimately require it: it is also, more often than not, hundreds of feet below the surface of the earth. A year spent on drilling an exploration well is by no means uncommon and the driller's work is long, arduous and skilled. His reward is found not only in his pay packet but in the sense of achievement felt when a new well 'comes on stream'.

Getting ready to start drilling. The bit is cleaned and then attached to the drill pipe and screwed fast.

FIVE REASONS STATED IN CASE FOR DISMISSAL

Treasurer 'disturbed' because the Council staff was becoming very restive'

(Continued from Page 7)

Mayor was of the view that was a matter for the Municipal Council to decide. He said that the Council should be allowed to do what it thought fit. He said that the Council should be allowed to do what it thought fit. He said that the Council should be allowed to do what it thought fit.

Talk with councillors

Mr. Brookes: What did you do to do what you did before the Finance Committee?

Mr. Ken: Yes, I was on the Finance Committee. I was on the Finance Committee. I was on the Finance Committee.

Reason for deferment

Mr. Brookes: Could he take this Finance Committee on March 21—do you know what the date is?

Mr. Ken: Yes, the only thing I can remember is that the Finance Committee was to meet on March 21. I was on the Finance Committee. I was on the Finance Committee.

Restlessness explained

Mr. Brookes: I am glad to see that you are all so happy. I am glad to see that you are all so happy. I am glad to see that you are all so happy.

Basis of argument

Mr. Ken: I am glad to see that you are all so happy. I am glad to see that you are all so happy. I am glad to see that you are all so happy.

views were very well known. What did the chairman of the Finance Committee say? He said that the Council should be allowed to do what it thought fit. He said that the Council should be allowed to do what it thought fit.

Views well known

Witness said he received the Commissioner's letter from the Town Clerk. The Town Clerk requested that it be a matter for the Council to decide. He said that the Council should be allowed to do what it thought fit.

Staff 'distressed'

Witness said that he was distressed. He said that he was distressed. He said that he was distressed. He said that he was distressed.

Staff 'distressed'

Witness said that he was distressed. He said that he was distressed. He said that he was distressed. He said that he was distressed.

what's the link?

There is a link and that is the speaking shop—whatever the vehicle, there is a Dependable CHAMPION to suit its engine. Motor Cycles, Private Cars and Heavy Lorries, all work better and more economically with CHAMPION—The Motor's Favourite Engine.

THE QUEEN'S 'STATE COACH' WITH WINGS

By J. W. R. Taylor

THE Queen's first two-vehicle air-ride was just a fair-tale figure in the city on a postage stamp to the hundreds of thousands of children in Nigeria. Here they are seeing her for the first time and, like millions of Australians, they are watching her with interest and other children in the Commonwealth, are facing a new pride and a new excitement.

This change in the Queen's life for the Queen's visit to the Commonwealth is the first time she has been seen in the air. The B.O.A.C. Argonaut flew from London to the Cape of Good Hope and the old Pariser Airport at Heathrow, which now forms part of London Airport, at Heathrow, was used for the Queen's arrival. The Queen's flight, which is still remembered for its speed and safety, was a triumph for the B.O.A.C. Argonaut. The Queen's flight, which is still remembered for its speed and safety, was a triumph for the B.O.A.C. Argonaut.

THE first submarine church in the world is built on the island of Minorca in the Mediterranean. The church, which will be dedicated to Our Lady of the Sea, is being executed in a unique style by members of the Submarine Expeditionary Force. One of the two principal towers of the church is being built by the Marine Bishop of Minorca.

Lowered from yacht on the interior of the church, and mounted on a platform, the church is being lowered by means of a crane. The church is being lowered by means of a crane. The church is being lowered by means of a crane.

Now the Queen's flight has been a triumph for the B.O.A.C. Argonaut. The Queen's flight, which is still remembered for its speed and safety, was a triumph for the B.O.A.C. Argonaut.

There can be few more such triumphs in the world than the Duke, who won his wings, and who is now a member of the Royal Air Force. The Duke, who won his wings, and who is now a member of the Royal Air Force.

It is in the present, the danger of the world, that we have decided to place it before the world. It is in the present, the danger of the world, that we have decided to place it before the world.

It is in the present, the danger of the world, that we have decided to place it before the world. It is in the present, the danger of the world, that we have decided to place it before the world.

Royal Progress

Nairobi, February 4.—The Majesty's tour of East Africa in respect of Nigeria the personal progress of the latter is the first African people the made in his earlier country, the first in the Commonwealth and Colonial States. His Majesty's visit to Nigeria was given a healthy atmosphere and traditional character.

The Nigerian government has been making a remarkable demonstration of order and discipline in the territory of the north, the first in the history of the country. The progress of the Nigerian government has been marked by the bearing of the world-wide fame of the Nigerian people, the first in the Commonwealth and Colonial States. His Majesty's visit to Nigeria was given a healthy atmosphere and traditional character.

These who talk of unity and unity will find little more to say. The Royal visit to Nigeria is the first in the history of the Commonwealth and Colonial States. His Majesty's visit to Nigeria was given a healthy atmosphere and traditional character.

which which is showing much promise. That pattern of joint action, a common endeavour more than a mere co-operation, is also being examined. The progress of the Nigerian government has been marked by the bearing of the world-wide fame of the Nigerian people, the first in the Commonwealth and Colonial States. His Majesty's visit to Nigeria was given a healthy atmosphere and traditional character.

And Now, Malaya

Thursday, February 9, 1956.—The talks in London between the British and Malayan Governments for the Colonies and a delegate of the Malayan Government, the Chief Minister of the recently elected Government, the late Mr. F. M. Yusoff, were most successful. They were completed within the time allotted and there is every prospect of complete harmony throughout. The result is an agreement of transfer of power to self-government to Malaya by August 31, next year and meanwhile a Commission made up of experts from both countries will draw up a constitution for Malaya to be in force within the Commonwealth.

The agreement has been hailed as a most important step in the history of Malaya. It has been under the leadership of the late Mr. Yusoff, and his most important responsibility for internal defence of the country. The late Mr. Yusoff was the Chief Minister of the British Overseas Civil Service until his death in Malaya.

In April this year the claims of Singapore, already proposed for the return of the Chief Minister, Mr. Marshall, is also being examined. The progress of the Nigerian government has been marked by the bearing of the world-wide fame of the Nigerian people, the first in the Commonwealth and Colonial States. His Majesty's visit to Nigeria was given a healthy atmosphere and traditional character.

But, at least the responsibility for the successful return of the Chief Minister, Mr. Marshall, is also being examined. The progress of the Nigerian government has been marked by the bearing of the world-wide fame of the Nigerian people, the first in the Commonwealth and Colonial States. His Majesty's visit to Nigeria was given a healthy atmosphere and traditional character.

HOW CONVICTS LEARN THE WAY BACK

BY JOHN NEIL

BEHIND the padlocked iron gates and forbidding grey walls of Nairobi Prison, the one of the Colony's most productive industrial centres. Accepting the principle that wrongdoers must be retrained, it is an arrangement which benefits all—prison wardens, officers, the Kenya Colony and, by a long way, the prisoners themselves.

Men who have violated the laws of society and have been sentenced to terms of imprisonment ranging from three years to more than ten, are taught not only to make their own clothes but also to make their own shoes and to make their own furniture. They are also taught to make their own tools and to make their own furniture. They are also taught to make their own tools and to make their own furniture.

Old tags who have committed murder and "new boys" convicted for theft, strive to add work an eight-hour day from seven in the morning until five in the afternoon with an hour's break for a mid-day meal.

Shirts to mend
Articles are turned out in a steady stream—iron, trousers and shirts for the "Colony's police force to mend and repair. It is an interesting hobby and an important part of the workshop given to the convicts as a means of retraining.

The workshops
Equipped by a large wire fence the yard known as the "workshop" is a well-organized factory. The workshop is divided into several sections, each with its own manager. The sections are: carpentry, blacksmithing, shoemaking, tailoring, and general work.

It is in the shop picture

Men whose courage helped Britain to victory

By Muriel Penn

ALMOST every year since the end of the Second World War has brought its crop of astounding revelations of heroism and self-sacrifice, miraculous escapes from prison fortresses of seemingly certain death, and amazing feats of espionage.

The year 1953, although it freely with the end of hostilities, marked the end of the era of the "warrior" and the dawn of the "peace" era. It was a year of new methods and new techniques made it possible for the first time to reveal the secrets of the old. It was a year of new methods and new techniques made it possible for the first time to reveal the secrets of the old.

More short stories
This time of heroism and self-sacrifice, miraculous escapes from prison fortresses of seemingly certain death, and amazing feats of espionage.

Then there is the story
This time of heroism and self-sacrifice, miraculous escapes from prison fortresses of seemingly certain death, and amazing feats of espionage.

No fair tale for China
China has launched a new campaign to stop people reading anything but Marxist-Leninist propaganda.

Another man, the Graham
Another man, the Graham, has been captured by his captors. He has been captured by his captors.

It is in the shop picture
