

# **Prevalence Of Khat Chewers Among Primary Health Clinic Attenders In Kenya**

Omolo, O E; Dhadphale, M.

Date: 1987-03

## **Abstract:**

In a rural district hospital in Kenya, the authors screened 100 randomly selected outpatients for khat (miraa) chewing. A surprisingly high number of them admitted chewing khat leaves. The implications of this finding and the controversy about whether or not khat is a harmful drug are discussed
