

White-eye, a sex-linked mutant of *Aedes (Stegomyia) cooki* Belkin.

Wade, JO

Abstract:

A mutant designated white-eye (*w*) is described from a colony of *Aedes cooki*. White-eye is sex-linked and recessive and the crossover value with the sex locus is $7.18 \pm 1.38\%$. The gene *w* has full penetrance and expressivity at all stages of the life-cycle, but in the adults the eyes darken with age to a yellowish colour
