

Exchange programme for academic staff and student's school of nursing sciences,
University of Nairobi and University of Massachusetts, Boston College of Nursing

The exchange Programme is through collaboration between the University of Massachusetts, Boston College of Nursing and the University of Nairobi under a project called Kenya heart and role afya njema. The project deals with non-communicable diseases that is, cardiovascular and metabolic diseases/conditions.

Learning curves for the program will focus on service learning, research and advocacy. Main objectives of the trip are as listed:-

- To provide education and enrichment for students and introduce them to a different educational philosophy, environment and curriculum.
- To develop cultural awareness and understanding among students on the school environment.
- To promote international understanding and cooperation.

The team will be going for a ten day visit from April 16th, 2015 to April 27th, 2015. Team members include:-

- [Prof. Anne Karani](#).
- Tony Brian Mungai Muthee, BScN Fourth Year student.
- Winnie Wambui Karuga, BScN Third Year student.
