

**Seminar by Dr. Brande Wulff of John Innes Centre,UK**

Seminar will be on Wednesday, 20th August 2014, in Room 205 starting 9.00am ó 10.00am by Dr. Brande Wulff of John Innes Centre,UK

title òwheat stem rust: battling an old foe with cloned resistance genes from wild relativesö

The Wulff group uses mutational genomics to isolate and Study genes that restrict wheat stem rust and septoria disease in wheat. Our long term goal is to isolate multiple resistance (R) genes and deploy these in combinations as single loci. The key advantage of such stacks includes zero linkage drag and the potent for more durable disease resistance
