

The second day of the Open day, the School of Business had an opportunity to show case its programmes and services to the members of public. This event held at the Main Campus saw the School interact and network with prospective students and partners drawn from different places in the world.

This Open Day is significant to the School as it aims to provide a convergence platform for the academia through engagement with the public sector, for discussing and strategizing on effective mechanisms for promoting academia for sustained socio-economic development in the region.
