

BASE TITANIUM LIMITED - PIT SAMPLING TECHNICIAN VACANCY

Date and time: Sat, 2014-05-17 08:30

[Base Titanium Limited](#), the Kenyan subsidiary of the Australian company, Base Resources limited, is developing globally significant Kwale Mineral Sands project about 50 Km south of Mombasa. Production started during the second half of 2013.

Base is a creative resource company that places a strong emphasis on being part of the community in which it operates and on attracting and developing good people. Kwale is the first large mining development in Kenya since 1911 and represents an exciting opportunity for high performing candidates seeking to be part of the successful development of the project. Pragmatic and pro-active candidates with strong integrity and who work well in a team environment are encouraged to apply.

Role, Purpose and Scope

Reporting to the Technical Services Manager this role will provide technical and mining personnel with up to date grade information for day to day mining decision making.

Key Accountabilities Include:

- Daily collection and submission of grade control samples
- Liaison with surveying and mining personnel to ensure ore recovery is maximized and waste dilution is minimized.

Qualifications and Experience:

- Bachelor of Science or equivalent with a Major in Geology.
- Excellent oral and written communication skills
- Excellent understanding and use of English and Kiswahili
- Excellent organisational skills
- Proven ability to learn quickly and work with minimal supervision
- High level of computer skills with particular focus on Microsoft Office

- Demonstrate an ability to work in a challenging environment with a multinational workforce with minimal supervision and high ethical standards

We encourage suitable candidates to apply **by no later than 7th June 2014**. Apply online www.basetitanium.com/careers/ Only shortlisted candidates will be contacted.

Expiry Date: Fri, 2014-06-13 07:00
