### The Save Food Initiative

Speaker: Mr. Thomas Dohse  
Account Manager interpack  
Co-organiser of FPPE 2014  
Partner to FAO and UNEP

3 billion tons of food are already wasted, lost or improperly used today every single year on their way from agricultural producers to consumers to disposal. This is more than what is needed to cover the global need. Messe Düsseldorf and FAO founded the initiative save Food to find solutions to avoid global food waste.

### **Technology for People – Kenya as a Partner for German Manufacturers of Food Processing and Packaging Machinery**

Speaker: Mr. Richard Clemens  
Managing Director  
VDMA, Food Processing and  
Packaging Machinery Association

Without intelligent technology it will not be possible to supply the rapidly increasing population with food and drink. We must accept that the skilled and proper handling of food and beverages requires high technological competence and experience. It is “technology for people” in the actual sense of the word. German manufacturers of machinery for the food and beverage industry have proven to be competent partners and suppliers to all regions of the world.

### Juices and Dairy Products – Innovative System for Manufacturing and Packaging Practices

Speaker:

Ms. Marta Rutynowska-Eising  
MD Stellar Tech  
Partner with Trepko and  
Zentis Poland

Dairy drinks and juices have become very popular and commonly consumed products especially amongst the younger consumers. Latest innovation is introduction of a system for dosing and filling fruit and flavor compounds into juices, flavoured and dairy products (flavoured milk, yoghurts, desserts) that can bring great results to the manufacturers that will invest in using it. Process improves hygiene and is much safer, quicker and more efficient than traditional one.

### The Role of Smallholder Farmers in Sustaining Food Processing and Packaging Industry in Kenya

Speaker: Dr. John Mutunga  
Chief Executive Officer  
KENAFF - Kenya National  
Farmers' Federation

Most countries in the Africa Kenya included rely on agriculture as the best anchor for livelihood support and development. National and County (Kenyan Case) development initiatives should therefore make all the possible efforts to focus on improving agricultural production and productivity. When it comes to processing, agricultural production must be enhanced to ensure constant and sustainable supply of raw materials for processing.

### 09:15 Baker Perkins – An Overview

Speaker: Mr. Jason Scott  
Sales Team Manager:  
Confectionery, Cereal and Snack  
Baker Perkins

In developing markets, the ability to quickly respond to both growing demand and changing trends is key to successfully creating products with both domestic and international appeal. To maximise value, manufacturers must be able to adapt to developing trends with innovative products, without sacrificing quality or consistency.

### 10:45 Tackling East African Challenges in the Food Value Chain Through Better Packaging

Speaker: Ms. Marah Koberle  
Regional Operations Manager  
Multivac North Africa Kenya

Agriculture and Farming are the backbone of many East African countries. Up to 75% of working East Africans are active in the agricultural sector but half of the agricultural produce is non-marketed and used for subsistence alone. Challenges in the supply chain lead to food losses and food waste as well as lost potential in product placement, marketing as well as branding.
