

Training of trainers course completed in department of surgery

A four day train the trainers course was held in the department of surgery boardroom from 7th to 10th April 2015.

The TOT was on medical education and offered by the Paediatric Anaesthesia Fellowship programme in association with World Federation Societies of Anaesthesiologists. Faculty from the World Federation Societies of Anaesthesiologists were Dr. Lesley Bromley (interests in education in anaesthesia pain medicine) and Dr. Drothy Kanya of the Aga Khan University, Nairobi..

Course aims were to improve teaching skills using different interactive tools to deliver medical education and assist in student and lecturer self evaluation. The course was well received and an eye opener for most participants on how simple change in course delivery can go a long way to improve effectiveness of teaching.

The department of surgery sent two participants, Dr Shahbal Swaleh and Dr. Peter Mwika
