

Neurosurgeon from Turkey visits department

Prof. Dr. Mehmet Faik Özveren, a neurosurgeon from Turkey paid a courtesy call on the department of Surgery.

His main medical interests are open and closed surgical treatment of cerebrovascular disease, brain and spine tumour, waist and neck hernias, using the instrument stabilisation of spinal fractures.

He was in the country to drum up support of local surgeons to start collaborative efforts between the two countries.

The chairman assured him the department would be interested in collaborative efforts and would facilitate any such activity.

Dr. Özveren also met the neurosurgical team in the department.

He was accompanied on his courtesy call by Stephen Masinde of A&K Global Health
