

Researchers from Institute of Meteorology and Climate Research (KIT) Visit Department of Meteorology

Researchers from the Institute of Meteorology and Climate Research (KIT) Visited Department of Meteorology on March 30, 2015. The Delegation was led by prof. Andreas Fink and discussed possible collaboration in research among others.

Prof. Fink is an extraordinary Professor at KIT, Karlsruhe, Germany. His research areas include Meteorology and Climatology of the Tropics, Monsoons (e.g. West African and Southeast Asian Monsoons), El Niño-Southern Oscillation, Tropical Intraseasonal Oscillations (Madden-Julian-Oscillation), Tropical Moist Convection (e.g. West African Squall Lines), The Climates of Africa, Tropical Cyclones, Synoptic Dynamics (Tropic, Subtropics, and Mid-Latitudes), Synoptic Dynamics of Extreme Events (Floods, Storms and Heat Waves), Mathematical-biological Climate-Malaria Modeling. Students of Meteorology and Climate Change stand to benefit from this collaboration.

Members of the Department present include Prof. J muthama, Prof. Ininda Joseph, Dr. Raphael Okoola, Mr. Joseph Karanjahi and Mr. Watitwa Masieyi. The Department wishes to thank the Visitors for spearheading this possible collaboration. [click here for the video](#)
