

Knowledge For Life (K4Life) Mentorship for SCI Students

As part of the mentorship programme of the School of Computing and Informatics, thirteen students successfully completed the Knowledge for Life program (K4Life) in August 2015. The K4Life is a programme run by the Seven Seas Technology Group (<http://sstgroup.com/about-us/knowledge-for-life>) is aimed at bridging the gap between the University CS/ICT curriculum and industry needs. The training positively sheds light to the students on the various technology fields in the industry that they can align their career with.

At the end of the training, the students sat for an exam and Purity Wangui Njoroge, a second year BSc in Computer Science, emerged top having scored a mark of 80%.

Through this program, the students were trained and mentored on Networking Essentials, Project Management, Business Planning and Entrepreneurship, Personal Branding, Presentation Skills, SAP & Business Applications, Network Operating Centre, Data Centre Solution and Design, Interview and CV Writing Skills, and Legal.

We congratulate the following students for successfully completing the programme:

1. Purity Wangui Njoroge
2. Clément Mwendwa
3. Kelvin Mihingo
4. Paul Ekirapa
5. Kevin Kaigai Kamau
6. Said Barke
7. Edwin Ochieng
8. Evans Munene
9. Mundi Collins Kirimi
10. Ruth Njeri Waiganjo
11. Kezengwa Maxwel
12. Brian Savatia Keyonzo
13. Peter Kiarie
