

REQUIREMENTS OF A LARGE
MODERN FACTORY TO MANUFACTURE
PRECAST CONCRETE UNITS

BY
H. v. BERGER.

PROJECT : REQUIREMENTS OF A LARGE

MODERN FACTORY TO MANUFACTURE PRECAST

CONCRETE UNITS - details of flow-lines and design of particular aspect of the factory.

Object.

- I To write a report.
 - II To design a factory based on material gathered in the report.
-

I Information

To write the report information had to be gathered to answer the following questions:-

- A Are precast concrete units being used, for what purposes are they being used, and will there be a demand for them in future.
- B Who are the present manufacturers, what units do they make, and how do they make them.
- C The type of factory needed based on collected information.

The above questions have been answered in the report which follows and are to be found under the following headings:-

- 1 Development proposals.
- 2 Present planning and tenders.
- 3 Existing manufacturers, including flow lines.
- 4 Procedure and conclusion.
- 5 Acknowledgement and appendix
