CURRENCY NOTE GUARANTEE FUND.

Trs detailed statement by Treasurer
showing position of affairs and need for action
agrees with Treasurer that it is more advisable
increase coin portion by drawing on Surplus balances
by realising Securities.

To Read

Written 22/04 did not
refer to article 17(3) of the 1903 Act.
(Treasur.) That says that where there is a
deficiency in the coin portion of the fund
securities shall be sold "if and so far as
necessary". It may be agreed that when
the Govt. Govt. is ~~willing~~ to make up
the deficiency from its balances, or in
this case, the sale of securities, is not
"necessary", but in any case where
the deficiency is due to causes beyond
the Treasury and the sale of securities
~~is~~ ~~not~~ ~~possible~~ to the fund as a
whole ~~and~~ there are funds of credit
for not selling.

to the Gazette of 19.4.16 annexed
shows that the securities, of which the
present value is £ 239,334.8¹2, originally
cost the Currency Commissioners £ 287,233.10.3.

I.e., to raise 5 lakhs by sale of securities
would involve a loss of £ 58,88.10.0 of
the money originally invested.

A considerable permanent depreciation
of these securities is to be expected & if
there is any great contraction in the
circulation of the notes, a sale of securities
may be necessary. The loss falls ultimately
on the Govt. as I pointed out on 22/7/09.

With regard to the last two pages of Mr.
Kemp's report, I do not think that
any immediate decision is required. Under
the 1st. arrangement for providing funds
about £ 33,000 will be available from the 5 lakhs
less than £ 24,000 in excess of the
deficiency of the contribution at 10 April
and £ 10,000 more than the total deficiency
of the fund.

? Ask next by despatch and say that
the advance to the Currency Board may
be allowed to remain for the present but
that the position of the fund should
be carefully watched and reported from
time to time. Add that there can be
no question of making further investments
at present.

You will notice by
my pencil notes
in the Gazette the
case of the stocks
now stand after
due legal action
April.

No 5 books arranged and to be taken
up by now on the account of Agent. (2024083)

Regd 3 MAY 16

Sir,

With reference to my telegram of to-day's date relating to a proposal to increase the coin portion of the Currency Note Guarantee Fund by five lacs of rupees, I have the honour to transmit herewith the accompanying detailed statement by the Treasurer showing the position of affairs at present and the need for action, in accordance with the Currency Order-in-Council of 1908.

2. I agree with the Treasurer that, under the present circumstances, it is more advisable to increase the coin portion by drawing on our surplus balances than by realising our securities which have greatly depreciated, but will, it is hoped, recover in time.

I have the honour to be,

Sir,

Your humble, obedient servant,

H. Conroy, Brigadier.

GOVERNOR.

THE RIGHT HONOURABLE

ANDREW BONAR LAW, P.C., M.P.,

SECRETARY OF STATE FOR THE COLONIES,

DOWNING STREET, LONDON, S. W.

237

INCLOSURE

Domic No. 273 of May 1st 1916

27379

1. At the end of January last the coin portion of the Currency Note Guarantee Fund fell to less than half the amount of the notes in circulation, the minimum fixed by His Excellency's proclamation of the 21st of October 1914.

2. The following statement shows the amount of this deficiency on certain dates since

29th January	Rs. 55,253
10th February	74,753
17th " "	1,74,753
25th " "	2,24,753
29th March	1,74,753
10th April	1,30,153

3. The deficiency has arisen from a decrease in the note circulation, caused by the presentation of notes of high value in order to obtain silver to meet the present unusual demand.

4. The following table shows the average monthly circulation of currency notes since April 1914 in lacs of rupees.

	1914-15	1915-16	1916-17
April	43	68	78
May	42	72	
June	42	76	
July	42	83	
August	41	85	
September	41	86	
October	42	87	
November	49	93	
December	54	93	
January	62	91	
February	64	85	
March	66	80	

5. As the date from which the deficiency first existed is now more than 3 months ago, in accordance with section 17 (3) of the Currency Order in Council of 1905 Securities ought to be sold to make up the deficiency.

6. This deficiency may further be increased in the near future, as the Manager of the National Bank of India states that it is not improbable that he may have to present for payment more notes of high value, which form part of his cash balance. He recommends that the coin portion of the fund should be strengthened by 5 lacs of rupees.

7. The coin for the purpose is not to be had in this country. The Manager of the National Bank has offered to arrange shipment of the specie required on payment in Bombay, charging the actual cost of packing and insurance only, and I do not think we can make better arrangements. He will be able to get the benefit of free transport from the Military. These expenses are fairly chargeable to War Expenses Custom Charges, because some part of our surplus balances has been utilized to finance this account and the cost of importation has thereby been avoided in the past.

8. There are two important points to be considered before selling out securities to meet this emergency.

9. The first is the possibility of the position being restored by the extension of our note circulation to German East Africa. A temporary restoration will take place when we receive a further stock of Rs.5 and Rs.10 notes of which we have run short, but this will only last while the large bodies of troops remain

3.

remain in the country. There has been an unusual and unexpected demand for notes of this description in order to pay the South African troops, who receive Rs. 15/- per man per month on the spot. A further consignment was ordered from the Crown Agents in February but we are advised that this cannot be shipped before the middle of June.

10. The second point is the fall in the price of securities. On the 31st of March last in accordance with section 20 (3) of the Currency Order in Council 1905, Rs. 144,600 was paid in to make up the deficiency caused by the depreciation of value of securities. Payment was made in silver to increase the coin portion of the fund. Since that date according to such information as is available here, which probably requires verification, the securities appear to have depreciated further to the extent of Rs. 345,125. The following statement shows how this amount of difference between the value of notes in circulation and the market value of securities added to the coin portion of the fund is arrived at.

Total amount of Currency Notes in circulation on the 10th April 1916.

525,833. 6.8

11. Although under the Currency Order in Council this deficiency should be dealt with at the time of audit it may be considered advisable to deal with it at the same time as the deficiency in the coin portion of the fund, as any payment from Protectorate Revenues to make up the former deficiency would help to make up the latter at the same time.

12. The temporary expedient of treating the £1m as an advance from Protectorate Revenue has been recommended because the importation of the coin is a matter of urgency, while the method by which the cost should be met depends upon the ultimate destination of German East Africa and the advisability of selling out securities at the present time, and cannot, I submit, be dealt with here on the spot.

13. The exact condition of the fund should be reported by telegram to the Secretary of State when he has received the report and is dealing with the matter. About this we shall probably receive due notification.

Sd. W. A. Kempe
