Allowance to nurses
pending leave in S. Africa

Recommendation of special agent
57 p.

and del. - 30 June 17.

W. Read

This is reasonable. It is to be presumed that the nurses would have home or friends to come to in this country. If they must have leave, but are detained by the Capt. restriction from coming here, the proposed allowance is justified.

TELEGRAM from the Officer Administering the Government of the East Africa Protectorate to the Secretary of State for the Colonies. Dated 28th June, 1917.
(Received Colonial Office 12.5 a.m. 29th June, 1917.)

42/15088

21126/16

21126/16

367 28th June your telegram 18th May as Company not prepared to accept our interpretation of 3rd clause subclause seven my despatch 5th April last year confidential 42 I consider that 19 cusecs should be ~~allocated~~ for 150,000 gallons in 3rd clause subclause four. Minimum flow ever recorded in river near Fort Hall Road is 254 cusecs. Maximum flow at least 5,000 cusecs. Power which could be developed is thus from 8,300 to 163500 brake horse power. Present maximum demand upon works of Company does not exceed 555 brake horse power. Report with diagram explaining how these figures arrived at follows by post. (2) As regards clause nine I have no arguments other than those in paragraph 9 my despatch 5th April last year but suggest that action be guided by provisions of new proposed Ordinance copy of which has been forwarded to you 6th June. (3) As regards clause eight there is already immediate demand for power at the Thika and Posho Ltd have offered to negotiate with a view to providing guarantee of capital which will be required by Electric Light Company for immediate provision of from 1500 to 2500 horse power and alternatively request permission to utilize 500 horse power from the (?) falls

from unexplained. Everyone who has
suffered inconvenience through accidental
causes or through our carelessness will
seek to drive a nail into the Company
instead of into the coils of his motor.

(an actual
accident)

348

I do not propose to come for a
preliminary discussion of this telegram,
hoping it clear that he shall wait the
dispatches before expressing any view.

LCB
30/6/17

The only points we can
discuss with Mr. M. before
we receive the promised
despatches are those under
(1) & (3). Even the former we
can deal with better when
we have the further infor-
-mation & on the whole
I should prefer to await
the despatches before seeing
Mr. Menkhous.

It looks as if para 3 of the
Tel. will be our one strong
card & I would sooner keep it
til we can deal with the
whole thing together.

LCB. 30/6/17. Mr. Lead

position of the proposed power station
is not sufficient for us to criticize;
but it is a district of many streams
and the Thuda may have many
tributaries ~~appearing~~ between the station
& the Fort Hall Road.

Cl. 9. Date of redemption of charges. We
must wait for the Bill, but the
treatment of this C^o is a matter of
equity.

Cl. 8. Date of removal. Here at all events
we have some new info. to put to
the Board. It may affect his
view.

Cl. 13. There can be no doubt that the agreement
could be subject to the terms of the
Bill, but I believe that the Bill
when received will be considered from
the point of view of its effect on this
Company. Still less, so far as I know,
have we anything to decrease the opposition &
obstruction which it seems to be getting.

Para 5. Mr. W. C. Gray Ross learned all he
knows about water power during his
last leave - no doubt much of it from
Mr. Rider. I certainly think that we
shall need expert advice about the
Bill, & it will follow that the terms of
the draft Agreement will have to
be considered too.

Para 6. There has been considerable ^{reported} concern on the local
paper, on this concession and I
think justification can hardly be
avoided, though we may be sure
that the best of the extreme will
