Submits objections to proposed triple survey  
Scheme, & suggests alterations proposed

Last previous Paper.

9481.

Sr. G. Fiddes.

It appears from p 2 of the 2<sup>nd</sup> vol  
i. for that the triple survey is only to  
7578 extend over a section of the proposed line

I annex a print of the Macdonald  
Survey, but I do not know whether it is  
in sufficient detail to be acted upon at  
once. It was made 20 years ago & is  
probably out of date in some particulars.

But Mr. Church seems to have been  
employed on the original location of the  
triplicate R.R. & is no doubt conversant with  
the Macdonald Report. If he had thought  
that further survey could have been dispensed  
with, he would have said so.

Subsequent Paper.

12762

11034

With regard to the latter part of  
the letter, see para. 3 & 2nd one.

for ~~which~~ indicating the course which  
7528  
is proposed to adopt.

Mr. Taylor has stated in a private letter  
that he hopes to come on leave shortly &  
I think that the best plan will  
be to discuss Mr. Lloyd's points with  
him when he arrives.

Some time  
this year  
before August  
starts.

*Whom for  
Amendment  
Rt*

Sir George,

I enclose you my plea against the  
multiple survey scheme. This has been much  
delayed owing to unavoidable circumstances,  
but I send it on to-day in the hopes that  
you may think it advisable to forward such  
extracts as are pertinent to the Governor,  
by this mail which leaves on Thursday.

I think I have said nothing in it  
which could give umbrage to the B.E.A.  
Government, but if I have raised the matter  
too directly you may think it well only  
to send a resumé or nothing at all.

If you will allow me I shall hope to  
call and see you the beginning of next week.

Yours sincerely,

*George Lloyd*
