LOAN OF £375,000

States Acting General Manager of Railway has brought to notice certain circumstances in connection with expenditure which should have been reported earlier. Encloses copy letter from Mr Eastwood with Schedules showing approved expdre and expdre incurred or to be incurred. Submits observations. Promises despatch as to Mr Taylor's financial irregularities. Requests sanction to reappropriations.

To Read.

File no 11067

This is rather a tangle.

(1) Generally as to reallocation.

(a) The Ord & contains no schedule & presents as limit other than the total of £375,000.

(b) Our letter to the Treasury on 19/1/12 expressly stated, of the £300,000 for "Expsn rolling stock &c", that readjustment could be necessary but "it can be understood that such readjustment will be within the total of £300,000".  
Now if this total has not been exceeded, it is hard to understand about the £35,000 set aside for "air stream &c" which is far in an excess, & mid that £40,000 for improvement at Kilimanjaro is having to be applied, but there is no excess on this either.

100,000 110,000 120,000 130,000

Gov  
11067 off

(c) The Treasury note as we understand it applies to the £300,000

had occasion to consult them about the  
balance share of the loan (viz. the financial  
provision for the Kaspala Port Bill  
outway) we have regarded the expenditure  
of the E.A.O.s share of the total  
head of all costs as a matter for the  
C.W. See e.g. minutes on 40528/12,

where a new issue of oil bonds at  
Kildare was approved, & especially on 16/5/13  
as to refection of £<sup>13</sup> 300,000.

In the case? I think there is no  
difficulty to refer this to the Treasury, so  
long as ~~the~~ we observe the  
available balance pledge that  
the £300,000 under the first head shall  
not be exceeded. As the commitments  
under this head are £290,866 & the total  
available balance is only £8677 there  
is no chance of an excess.

2. In the above I have taken the figures as put  
to the Treasury. In four deals with the matter  
from the point of view of the S.O.F.'s direction  
paper tabbed in white.

Head I - ~~sanctioned~~ £300,000. Details  
were sanctioned on 16/5/13 - they included  
a sum of £146,500 for a debt already  
being executed & the Governor's comments  
admit precisely the nature of these  
debts.

In most cases the variations  
between the sanctioned & the actual are  
minor restorations & releases which  
cannot ought to have been reported but  
are out of the general significance.

I will give you however that the  
total on 16/5/13 was £10m but that any  
sums must be met on the annual estimates.

The short term loans  
over £100,000  
must have been  
settled by payment  
of balances.

had occasion to consult them about the  
affordance of the loan (e.g. the various  
provisions for the Kempster Port Bill  
etc.) we have regarded the expenditure  
of the E.A.P.'s funds within the District  
headed at all costs as a matter for the

C.W. See e.g. minutes on 400528/12,  
where a new service of oil (hydro-  
carbon) was approved, i.e. estimated, on 16/05  
as to refection of the £300,000.

The charters were  
granted (Decr 30)  
but to them been  
credited through  
balances. J

In the air? I think there is no  
accusing to refer this to the Treasury, so  
let us observe the available balance pledge that  
the £300,000 under the first head shall  
not be exceeded. As to commitments  
under this head are £190,866 & the total  
available balance is only £8697 there  
is no chance of an excess.

2. In the above I have taken the figures as put  
to the Treasury. The four deals with the water  
from the point of view of the S. off. 5 sanction -  
paper tabbed as white.

Head 5 - sanctioned £300,000. Details  
were sanctioned on 16/05/13 - they included  
a sum of £146,500 for a debt already  
being executed by the Governor's commands  
advised generally the nature of these  
debts.

Point 6. It does not cover the variations  
before the sanctioned, the actual are  
minor rectifications & excuses which  
certainly ought to have been reported but  
are not of a serious importance.

Point 7. We have now got the  
£146,500/13 long ago, but any  
debt must be met on the annual estimate.

and it is interesting to see how anxious  
they have avoided

127

(i) It appears that only £12,500 of the  
proposed £30,000 has been allotted  
to construction - in spite of the rather  
short time they have always been on  
getting money supplies. I suspect that  
the date agrees with the intended  
time out of the £30,000 are  
included in the amount wanted  
for rolling stock out of the new  
loan. What do you think?

(ii). Stanley (Aug 10) £6,000 for divisions  
higher out of roads than have al-  
ways been on the £300,000. The Gov regards  
it as a magadi service, but I  
think we must ask whether the  
divisions have been constructed  
and from what source they have  
been or will be paid for?

(iii). Harbour Dredger & Hooper - £10,000.

No doubt this was a genuine under-estimate.  
I see that £31,200 appears in the  
proposals for the new loan for a dredger  
& three hoppers - without any reference  
to this previous provision. Probably  
Mr Taylor would have regarded the  
£10,000 as a sufficient sum for his  
requirements - or as much of it as  
was contemplated for the two 50-ton  
gaffers [see 36041], which Justice  
gave as indication that the dredger was  
[not] part of the question.]

In addition, the reported 60% mark on the first

36828  
14  
not sent on

100 ton lighter is necessary.

To the £35,000 for new steamer etc. There are Sanctioned items amounting to £33,300<sup>0</sup>, but the actual commitments are £42,350<sup>0</sup>. The excess on the "Rusya" is not very serious, as there was nearly as great an excess on the former vessel - the "Urga", & the Govt. is wary about the 3 per cent. rights (£337) not being fully sanctioned. See 14316/13 (green label) on which £364 was approved from this loan for this purpose.

As regards the huge excess for the Helidini tanks, Mr. Eastwood, while admitting that the excess ought to have been reported long ago, blames unreasonably for fixing of a bad estimate for work which was on an unusually big scale. I attach a separate note on this. I think he is wrong.

III The £40,000 for Helidini. Sanctioned items, £29,284, constituting £35,087<sup>0</sup>.

Taylor's only serious break on this head is the £3133 for the Shimoneji Beach affair, & the Govt. needs to admit it as necessary. But the proposals in 7039/15 (which has been referred to C.A.) call for twice the Eastwood's. The Govt. will charge to this head £8333 for warehouse & forehouse improvements & to avoid excess by transferring the Custom House (£5000) to the helidini

166,000 for  
to the account  
whether the £364 used for the  
proposed loan scheme under  
including the new Loan.  
£485 in 110/15

(£100,000)  
128  
Deepwater Pier funds the £250,000 loan.  
In 7039, Mr. Eastwood put the unauthorised  
balance of the £60,000 at £5,338. I do not  
know how he got at this amount since  
his present figures indicate that of  
both the £8333 and the £5000 are  
included the excess on the £40,000 would  
only be £87. I should prefer to allow  
this small excess rather than have  
any more shuffling between loans,  
but £5,000 off the balance of £6687  
leave very little & we may want  
£2,000 for the Abraum Marine  
workshops which there is every reason  
to believe the Treasury will finally  
disallow as a charge against Upward  
Rely. Act moneys. By the time we  
get the C.A.'s reply to our letter on 7039  
we shall be better able to judge. They  
might be reminded?

Subject to this point, we might  
well accept & express regret of the  
state of things which took place  
earlier by Mr. Eastwood - say that  
without any desire to suggest that he behaved  
himself would be unable to prove  
in this business that S. G. Govt. cannot find  
Counter that the facts required a strict  
& clear the accuracy of defining  
as uncontrollable than the financial

|          |                                   |          |
|----------|-----------------------------------|----------|
| 40526/15 | Estimated cost                    | £ 6000   |
| 482/15   | Slightly proposed for reparation. | 94       |
|          |                                   | £ 6924   |
|          | Actual Cost / (11056/15)          | £ 11,580 |
|          | (11067/15) 485                    | £ 120,65 |

Mr Eastwood says, that we ought to have known that £6000 was an impossibly low figure or that, if we didn't, the C.E. ought to have told us; & that we ought to have made it clear that the £6,000 was afforded towards the cost ~~rather~~ as the full cost of the Taubs. He thinks, however, that possibly he never meant it to cover other two big Taubs, which are much too large for present requirements.

The question was fully considered, first by the Acting General Manager, next by the C.A. in consultation with the S-Personal Dist. Co & Mr Taylor Esq., & then by the A.C. G.M. again before reference to the Govt. in the S. D.S. There is no room for doubt that Mr Sandiford knew what he wanted & knew that he was providing for the future rather than the present. The A.P. (2) had full info about his views & gave them (over committed) estimate after consulting their Consulting Engineers & allowing for the high cost of materials. Their estimate did not provide for foundations, & as Sandiford considered that he could provide for them & contingencies within £1000.

Nothing does not appear, but the 2nd part

get the letter to the C.E., probably after the  
Matters were necessary as they had the  
benefit of expert advice on Tools, & so  
had to cost of contracting big works on the  
other side.

Taking items:

|  | Estimate                                    | Actual          | Excess<br>% |
|--|---|-----------------|-------------|
| Cost of Tools at Madieni               | 3,450                                       | 6,046           | 26 1/2      |
| " " Excavation                         | 1,470                                       | 9,417           | 64 2/3      |
| Pipe fittings &<br>excavation of site  | 180   | 1,320           | 7 (3)       |
| Foundation                             | -   | 206             |             |
| Excavations, &c.                       | 500   | 900             |             |
| Excavations, &c.<br>fencing, stone etc | 921 <del>1000</del><br>After interpretation | 9,464<br>310    |             |
|  | <u>£6 9 2 9</u>                             | <u>£12 06 5</u> |             |

- (1) This is the point on which H. A. P. might have been expected to make a better shot.
- (2) Here I think he Scandford was to blame. He will very gradually absorb a cost of creation, & the Uganda Rly. have much expense. In accepting the estimate he Scandford knew that it was intended that the Co should erect, so that such points as expenses have necessarily not worked.
- (3) The scope of the work was much extended beyond anything suggested to the Co, who could hardly have been expected to go beyond what was put before them. Whether the C.E. would have recommended extra work can hardly be judged from

The letter came to the Co notice on Decr 11<sup>th</sup> 1912, in fact the Goods arrived on Decr 22<sup>nd</sup>, & the contract had already been signed by Decr 30<sup>th</sup>. It seems to have been agreed scheme contained by all parties, and was approved accordingly without any negotiation or alteration.

Jan 1<sup>st</sup>  
1913

We might of course ask C.R. for the stores, but I see little use in going further with the matter. The O.R.C. are only primarily responsible for the estimate for the cost of the tools, & this is the case which shows the best case.

As regards the £921 (or £920) for excavations, please see 482<sup>2/3</sup>; it must surely have been obvious by then that £921 would not be enough enough.

All we said was that the money concerned would be charged to C.R. Bills to date - it is distinctly a Capital charge & comes properly under this head.

Opp. 12.3.15

para. 2 of W.  
Entwistle letter

AFRICA PROTECTORATE

No. 26

RECEIVED  
GOVERNMENT HOUSE  
NAIROBI,  
BRITISH EAST AFRICA  
11056  
18 MARCH

January 15th 1915.

4429

Sir,

I have the honour to address you on the subject of the £375,000 loan from Imperial Funds to this Protectorate and to inform you that the Acting Manager of the Uganda Railway has brought to my notice a number of circumstances in connexion with expenditure chargeable thereto which I regret to state should have been reported to you at an earlier date.

*Send 21808/12*

2. The original general allocation of the funds made available by the loan as notified in your despatch No. 408 of July 16th, 1912, was as follows:-

|  |          |
|--|----------|
| (1) Engines, rolling stock, and other improvements on the Uganda Railway and at the Lake Victoria Ports..... | 2500,000 |
| (2) Additional cargo steamer or extension of shipping facilities at Lake Ports.....                          | 35,000   |
| (3) Improvements in terminal facilities at Kilindini .....   | 40,000   |
|  | <hr/>    |
|  | £375,000 |

RIGHT HONOURABLE

LEWIS MARCOUNT, P.C., M.P.,

MINISTER OF STATE FOR THE COLONIES,

DOWNING STREET,

LONDON, S.W.

For convenience in reference I attach two schedules one of which shows the details of the expenditure sanctioned by you against the loan funds and the other the expenditure actually incurred or in respect of which liabilities will arise.

3. You will observe that there should be an available balance of £12,406, viz: £1,700 of the £35,000 earmarked for the new cargo steamer or for shipping facilities at the Lake Ports and £10,706 of the £40,000 provided for improvements to terminal facilities at the Port of Kilindini. There is actually an available balance of £7,182 but the provision under the £35,000 is exceeded by £6,865, whilst savings against the £300,000 for Engines, rolling stock and improvements to the line are available to the extent of £9,134 and against the £40,000 for terminal facilities to the extent of £4,913.

4. Although the total available balance is only £9,294 less than it should be, considerable differences in the details of the expenditure as sanctioned and incurred respectively are disclosed in Schedule B. In some cases these differences are due to normal minor savings or excesses on the estimated cost of works and material but in others I regret to state they are due to unauthorised work having been undertaken by the late Manager and to considerable, and hitherto unreported, variations

-3-

variations between the estimated and actual cost  
of some of the approved services. That at the  
charges which have thus arisen or will shortly arise  
the late Manager proposed to abandon certain works  
which had received your sanction. In fact I now  
find that Mr. Taylor, on his own initiative and with-  
out reference, prepared a complete redistribution  
of the whole of the £375,000. I do not wish to  
enlarge on the irregularity of these proceedings  
and I am sure that Mr. Taylor acted as he considered  
best in the interests of Government. I am further  
satisfied that the whole of the expenditure con-  
tained in the revised programme is necessary and  
that the works which it is proposed to abandon can  
be postponed without serious inconvenience.

5. I will now refer to the principal items  
in Schedule B which call for comment and I trust  
that you will be able to accord your sanction to  
the reappropriation of the loan funds as indicated  
~~in~~ in Column IV of that schedule. Such sanction will  
necessitate a redistribution of funds between the  
~~three~~ <sup>2 X</sup> general heads quoted in your despatch of July 16th,  
1918 as well as a reconsideration of the detailed  
sanctions which you have intimated from time to time.

*Seeas*  
21808  
12

6. Item 1. The figure of £165,745 shown  
in Column III is made up of the £30,000 for "ad-  
ditional engines" and £135,748 of the £146,500 for  
"indent already placed" in Schedule A. When the  
advices were received from the Crown Agents of the

cost

No 56  
60923

*Govt  
16052  
TB*

cost of these indents, it became apparent that the complete cost of the works concerned would be, net £146,500, but approximately £164,500, and it was at this stage that the late Manager prepared his redistribution. Instead of the full £30,000 approved in your telegram of May 15th 1913 for "additional engines" being spent, only £12,589 was expended for locomotives, £14,496 being diverted to the cost of 30 covered goods bogie wagons of the Magadi type which it had originally been intended to charge to the special Magadi Grant but which, owing partly to underestimating and partly to the reduction of that Grant from £350,000 to £157,000, could no longer be so charged. There is further included in this sum of £14,496 an excess on the estimated cost of 60 other wagons which remained as a charge against the Magadi loan.

*Govt  
16052  
TB*

7. Item 8. The £13,105 in Column III represents, in addition to the £10,000 specifically sanctioned in your telegram of May 15th, 1913, £3,105 of the "Indents already placed". There is a total of £4,605 available for reallocation from this item.

Item 10. The £6,000 provided for the completion of diversions was cut out altogether when the necessity for reappropriation became apparent. As a matter of fact this work is really more in connexion with the improvements for the Magadi Traffic than for the general work of the Railway.

Item 12.

X 16052/13

Item 12. The increased provision includes a new station at mile 333 which was not included in the original programme.

~~Items 13 and 14.~~ The cost of the material was overestimated in both cases.

Item 17. The late Manager diverted £2,097 of the original provision to Items 18 (the whole) and Item 12 (£1,600).

Item 19. This is the largest abandoned work. The original provision of £10,000 was after enquiry found to be quite inadequate and it is now estimated that good and efficient plant would cost at least £30,000.

36041 44793  
14  
422  
36041 14  
Item 20. This is the purchase reported to you in my despatches No. 742 of August 10th and No. 876 of October 7th last and in your despatch No. 874 of September 25th you approved the necessary reallocation from item 19.

Items 21 and 22. In these two cases the late Manager was made aware that the provision was inadequate but without reference to higher authority he instructed the Crown Agents to proceed with the order.

Item 24. It now appears that the previous provision was inadequate.

Item 26. Not more than £5,000 can be expended on the Mjanji Pier until more effective plant is made available. £2,500 can therefore be reappropriated.

Item 27. The figure of £4,632 in Column III is made up of £2,632 of the £146,500 for "Indents already

T 1-56041-14

already placed" and £2,000 specifically mentioned in the enclosure to my despatch No. 16052 of April 8th, 1913. It is, however, now proposed to expend only £2,000 in all leaving £2,632 available for reallocation.

Items 28 and 29. The figures in Column III also represent a portion of the "Indent already placed". In both cases the material from England cost more than was estimated. Further, more extensive additions than were originally contemplated were undertaken (without reference or sanction), especially in the case of the wharf itself.

Item 30. This was a minor alteration to the existing sheds to provide greater facilities in working.

Item 31. £965 was included in the "Indent already placed". This sum was inadequate and an excess of £1,413 occurred. The excess is covered by savings on item 13.

8. Item 32. The excess on the provision for the S.S. "Rusinga" appears at £2,188 and as the vessel was not to have cost more than S.S. "Usoga" it is convenient to compare the cost of the two ships. The contract price at home was the same but higher freight charges brought the cost in Kilindini of the "Rusinga" to £357 more than that of the "Usoga". A hitch in the launching of the "Rusinga" was responsible for another £198 and cessation of work during the strike for £120.

A slight rearrangement of the cabin accommodation is also recommended at a cost of £100. The total cost of this vessel £29,448, is only £761 more than that of the "Usoga" in spite of the special circumstances noted above and the Marine Superintendent reports that delays due to abnormal sickness and to defence measures, which had to be undertaken at Kisumu during the past half year, also contributed to the increased cost of the work.

9. Item 33. This item represents perhaps the most serious underestimate and I enclose a copy of a letter from the Acting General Manager on the subject.

10. Item 34. This is another example of unauthorised expenditure undertaken by the late Manager though the lighting of the Lake is a policy approved by you.

Items 35, 38 and 37. These are charges contingent to the construction of the "Rusinga" and are properly debitable to the £35,000.

Item 39. The estimate for the cranes at Kilindini was inadequate.

The amount approved for the new baggage room was excessive.

Items 41 and 49. These are the items referred to in my despatch No. 1049 of December 23rd.

Item 43. The original provision of £300 contemplated the reerection of the shed as well as removal. It, however, became clear that the old shed was quite inadequate both as regards capacity

and arrangements so that its re-erection would not be profitable.

Item 45. The timber and coal stacking ground at Shimanzi beach, KITAMINI harbour, was a work which was carried out by the late Manager without reference to me. The expenditure incurred is mostly on account of material for laying a short line from the existing wharf to the Shimanzi Beach in order to relieve the congestion which is so seriously felt at present.

Item 46. The Yacht Club House interfered with the plans for the new Pier. The building is being utilised as a Post Office on the wharf premises.

Item 47 was necessitated by the increase in  
~~Yachting~~

11. As regards the "unallocated balances" to which I have already alluded in paragraph 3 supra, you will observe that there is £9,134 available from the mainhead "Engines", rolling stock and Improvements to the line" but on the other hand £8,565 more has been allocated to the head "Cargo Steamer and facilities at Lake Ports" than has hitherto been sanctioned by you. £5,793 more to Terminal Facilities at Kilindini. The available balance out of the loan is £7,182 and I will approach you at a later date as to its disposal.

Nov 669  
80/11062

I am addressing you in a separate despatch on the subject of the financial irregularities committed by Mr. Taylor and in the meantime I can only again express my regret that these irregularities

occurred

occurred and request your sanction to the reappropriation now submitted for approval.

I have the honour to be,

Sir,

Your humble, obedient servant,

H. Laway Beyied

GOVERNOR.

To Dispatch No. 26 of

19/12

Blackstone &amp; Company

D/8/26  
646

18th December 1914

To,

The Honourable  
The Chief Secretary  
to the Government,  
N A I R O B I.

Sir,

Oil Storage Installation at  
Kilindini for the steamers  
on Lake Victoria.

When it was decided that oil fuel should be used on the steamers on Lake Victoria the question arose as to the provision of oil storage accommodation. The negotiations in the first place were with the Asiatic Petroleum Company, who offered to erect storage accommodation at Kilindini at a charge of three shillings per ton of oil fuel supplied. The negotiations with the ~~Asiatic~~ Petroleum Co. ultimately fell through and arrangements were finally made with the Anglo-Persian Oil Company to supply the Railway with what oil fuel we required, the Railway to provide storage accommodation at Kilindini, which the Anglo-Persian Oil Company would erect for us at cost price.

2. It was decided to erect two tanks of 4,000 tons (equal to 1,000,000 gallons) each, the cost erected at Kilindini being estimated approximately at £5,100, exclusive of foundations, also exclusive of earthwork in excavation

excavation and tanks, pipes, valves, pumps, air cocks, etc. etc. necessary for the purpose of filling the travelling oil tanks, or transferring oil from one tank to the other.

3. It was considered desirable that the Railway should have its own storage accommodation, otherwise we would be in the hands of the Company owing the tanks, and could not take advantage of market fluctuations when they offered favourable conditions of purchase from sources other than the owners of the tanks, and in his despatch No. 908 dated the 31st December 1912 the Secretary of State approved of the cost of the installation being met from the balance left after providing for the New Cargo Steamer out of the appropriation of £35,000 reserved for that purpose, and £6,000 was earmarked for the "Oil Installation".

4. I regret that I must now inform you that the provision of £6,000 has proved wholly inadequate and insufficient for this purpose, and with the experience we have gained and the knowledge we now possess of all of the requirements and work necessary for and forming part of an installation of wide nature I would most respectfully submit that with the knowledge at their disposal and at the disposal of the Consulting Engineers the Colonial Office should have been aware that it was not ~~more~~ than £11,000 out the work that was proposed for the amount of £6,000, and also enough less "that it never cost £6,000" was given "allowance" ~~not~~, but not "the cost", of the installation. The excess on the appropriation is £3,580, and I would ask the Secretary's

X 40528/2

sanction be obtained to this expenditure.

5. I do not in any way wish to put the foregoing paragraph forward as a reason for having incurred expenditure without the proper sanction having been obtained for it, as I have to admit that there is no satisfactory explanation that can be offered on the part of the Railway in this matter. The greater cost should have been brought to your notice in May or June 1913, but unfortunately the proper procedure was not followed. As I have before stated I can give no satisfactory explanation concerning this.

6. The Anglo-Persian Oil Company gave the following estimate of the approximate cost.

|  |    |    |          |
|--|----|----|----------|
| 2/88'-6" dia: tanks delivered at<br>Glasgow                        | .. | .. | £. 3,050 |
| Freight, dues, insurance etc.<br>plus 10 tons of erection<br>tools | .. | .. | 400      |
| Erection at £6/- per ton   | .. | .. | 1,476    |
| 300' yards 5" pipes }<br>100' -5" flexible hose)                   | .. | .. | 180      |
|  |    |    | £. 5,106 |

and on these figures the £6,000 was apportioned as follows:-

|   |    |          |
|---|----|----------|
| Cost of tanks erected   | .. | £. 5,106 |
| Foundations   | .. | 500      |
| Contingencies   | .. | 394      |
|   |    | £. 6,000 |
| 7. Against these two estimates I give the actual expenditure. |    | (1)      |

3.

sanction be obtained to this expenditure.

5. I do not in any way wish to put the foregoing paragraph forward as a reason for having incurred expenditure without the proper sanction having been obtained for it, as I have to admit that there is no satisfactory explanation that can be offered on the part of the Railway in this matter. The greater cost should have been brought to your notice in May or June 1913, but unfortunately the proper procedure was not followed. As I have before stated I can give no satisfactory explanation concerning this.

6. The Anglo-Persian Oil Company gave the following estimate of the approximate cost.

|  |               |
|--|---------------|
| 2/58'-6" dia; tanks delivered at<br>Glasgow .. ..                        | £ 3,050       |
| Freight, dues, insurance etc.<br>plus 10 tons of erection<br>tools .. .. | 400           |
| Erection at £6/- per ton .. ..   | 1,476         |
| 300 yards 5" pipes } .. ..   | 160           |
| 100'-5" flexible hose) .. ..   | -----         |
|  | Tot: £. 5,106 |

and on these figures the £6,000 was apportioned as follows:-

|                          |          |
|--------------------------|----------|
| Cost of tanks erected .. | £ 3,106  |
| Foundations .. ..        | 500      |
| Contingencies .. ..      | 394      |
|                          | -----    |
|                          | £. 6,000 |

7. Against these two estimates I give the actual expenditure.

(1)

4.

(1) Cost of Tanks landed at Kilindini 4,446

+6485  
1067)

|                           |       |

|       |            |
|-------|------------|
| Total | Rs. 11,580 |
|-------|------------|

---

8. The cost of the tanks is as per our invoices, and the cost of erection the amount (Rs.29,000) given by the Agents of the Anglo-Persian Oil Company as the total amount of their expenditure in connection with the erection, and the importation and repatriation of labour. It will be seen, therefore, that the cost of the tanks alone is more than the appropriation for the complete installation.

It should be stated that the estimate given by the Anglo-Persian Oil Company was an approximate one, for which they accepted no responsibility, and that they carried out the work for us at actual cost with no charge for either profit or Consulting Engineers' fees.

9. Item 2. ~~This~~ is no appropriation or provision for this expenditure, unless it comes under the amount of £394 allowed for Contingencies.

10. Item 1. The foundations of the tanks consist of an outer ring of concrete filled in with sand to the water level. The sand is laid in layers of 4 to 5 inches, watered and rolled. The concrete wall of one tank cracked

and it was necessary to underpin it, and it was considered imperative that the concrete walls of both tanks should be strengthened by an outside ring of concrete, so that the concrete work is now practically twice the quantity that it was originally intended to be. The cost of filling with sand in the way this work is carried out is also very expensive.

11. Item 4. The tanks are built on the side of a hill, and preparing a level floor at the requisite height above rail level necessitated an excavation in the side of the hill that <sup>at</sup> the deepest point was over 20 feet. Banks had to be formed to make an earthwork reservoir deep and large enough to hold the contents of the tanks so that in the case of a disaster to the tanks the oil, to the value of nearly £10,000 a full tank, would not be a loss to the Administration. It also includes the cost of testing the tanks by pumping them full of water to see if they were water tight, and this with the limited appliances at our disposal, was responsible for a serious expenditure.

An estimate for £921 was sent to the Secretary of State for sanction in connection with this work while he was prepared to sanction it stated that he could not do so against "Capital" funds, but that it must be met from some other source. This unfortunately was not done. There was a repparation by the General Manager of ~~the~~ <sup>the</sup> ~~sanctions~~ <sup>sanctions</sup>, amounting to ~~£2000~~ <sup>£2000</sup> which ~~would~~ <sup>would</sup> ~~justify~~ <sup>justify</sup> ~~sanction~~ <sup>sanction</sup> that the earthworks

12. The question which when the amount of the Secretary of State's sanction is considered, as to whether we originally intended to put up the storage accommodation we now possess. The probable consumption of the Lake Victoria Flotilla when the oil installation on

6.

All the steamers should be completed was estimated at 200 tons per month, say 2,500 tons per annum. No definite figure could be given as to the consumption as we were wholly without experience regarding it. This approximation however was very nearly correct, as 8½ months running of the S. S. "USOGA" averages 40 tons of oil per month, so that if all the steamers and tugs should be working with oil fuel the consumption should be

|                                 |       |
|---------------------------------|-------|
| Usoga and Rungga - 40 tons each | 80    |
| Myanma                          | 40    |
| Clement Hall                    | 35    |
| Minifred                        | 30    |
| Tug Kavironao                   | 40    |
| Percy Anderson                  | 20    |
|                                 | _____ |
| Total, tons                     | 245   |

This gives say 3,000 tons per annum.

13. The contract with the Anglo-Persian Oil Company provides for 4 months notice being given as to the supply of oil, the delivery to be in 3/4,000 ton lots and not exceeding 6,000 tons. A 6,000 ton consignment would last us two years when all our fleet is fully equipped, or 2½ years under the presumption of what our consumption would be at the time the negotiations were in progress,

14. The two tanks have an accommodation of over 2½ years supply of our requirements without any replenishment taking place during that period, or a sufficient accommodation for both the Railway and the Steamers, based on a 3 monthly supply, if all the locomotive work was done with oil fuel.

15. It is probable that two tanks were erected so

that in the event of an accident to one tank our supply  
of fuel and the work of the Lake Steamers would not be  
interfered with, but even allowing for this recognition  
of and precaution against eventualities I still think  
that the point raised in the first sentence of paragraph  
12 would account for a very great part of the excess ex-  
penditure that has been incurred.

I have the honor to be,

Sir,

Your obedient servant,

sd/- B. EASTWOOD.

Ag. General Manager,  
Uganda Railway.

for concr.

No. 11056

and made a draft  
for you

Govt. Belfield  
19/3/95

I have the honour to —  
ask the receipt of your  
despatched on 26 of the 15th  
of January on the subject of  
the allocation of expenditure  
under the £375,000 loan  
from Imperial funds to the  
East Africa Protectorate.

2. I note with great regret  
the number of instances in  
which the late General George  
F. G. M. under Railton misused  
the sanctioned allocation  
of funds between others,  
undertook new works, and  
abandoned approved works  
without any authority.  
I have no desire to suggest,  
and I do not believe, that

the present General Budget  
would exceed his powers  
in this however, but I  
cannot but consider that  
the facts disclosed indicate  
clearly the necessity for  
defining the circumstances all  
owing the financial  
limitations of the General  
Budget's position.

3. I have no wish to dwell  
on the details of the question  
and shall be prepared to  
assure that each of the  
Taylors' alterations would  
have been approved if  
submitted for sanction at  
the proper time. According  
to those of the reallocation  
not put forward by Mr.  
Eastwood, subject to the  
objection which I shall have

occurred to me on items  
401 and 449, but I should  
be glad to receive further  
info on two points.

Item 9. Matthews, fine price £6  
I you to catch that of the  
£30,000 allocated to ~~other~~ and  
expenses only £12,580 was  
devoted to that purpose, but  
it does not appear whether  
the full number of expenses was  
contemplated was actually  
obtained and if so from what  
source the extra cost was met.

The arrangements for the setting  
of expenses during the last four  
years are not altogether easy  
to follow and a clear financial  
statement on the subject would  
be very useful. In particular,  
I am not certain that the  
provision for ~~other~~ under  
the new loan does not represent  
gross extent portions of  
previous ~~provisions~~ which  
have, as in this instance,  
been kept cut down.

Item 10. Marsden:  
It is not clear whether  
the diversions in question  
have been abandoned or  
have merely been carried out of

the £375,000 loan from  
the latter case. I would be  
glad to learn whether they have  
been contended and if so from  
what funds they have been paid  
for.

4. With regard to item 33, I cannot  
pass without notice Mr Eastwood's  
reference to the share of the Colonial  
Office in the responsibility for the  
excess in the estimated cost of

the oil tanks, at Aklandini. The  
arrangements with the Anglo

Persian Oil Company had to  
be completed by the 31<sup>st</sup> of Dec.  
1912, and I first heard of the  
negotiations on the 11<sup>th</sup>

and received your views on  
the 23<sup>rd</sup> of that month. It  
was impossible, even if it  
had seemed necessary, to give  
the matter detailed consideration

at that stage without preparing  
a whole of the arrangements which  
as yet were only general.

5. As additional evidence to the C.O.  
that Col. 2 has applied the terms  
and conditions specified, I will

40528/p2 spp.

x See No.

had the benefit of the Taylor's  
advice and of the expert  
knowledge of the Oil Company

152

and their Committee experience  
while the questions of  
cost of erection and foundation  
were well within the province  
of the Acting General  
Manager, Mr Sandford.

The Roberton was aware  
that it was proposed that  
the erection should be  
carried out by the Company  
and that, therefore, a sum  
would be incurred on  
passages.

6. I am afraid that it  
is impossible to adopt Mr  
Eastwood's suggestion that

the sanction of £6000.  
not have been intended to  
cover the ~~whole~~ cost of the  
work, except that the capacity  
of the two tanks was much  
in excess of the present  
requirement of the service.  
Mr Sandford had definitely  
agreed two one-million

DRAFT.

gallon tanks, and it  
will be seen that  
there are no fixed but  
variable requirements.  
Upon the proposal of the  
estimated cost of £6000, of  
which I happened

[ 405202  
CA to A-P oil Co. 1st  
pump wanted.]

7. as a matter of fact, the  
actual cost of "the work  
that was proposed" appears  
to have been roughly £8000,  
including the further £485  
for erection reported in your  
Despatch No. 52 of the 21<sup>st</sup>

[ Tanks = 4.446  
Excav. 2.419  
Tunnels 900  
Piping (40518) 182.  
£7.947 ]

+ 10  
(1067)

2 January and the  
moderate amount of piping  
that we saw for contemplated;  
and the balance of the money  
has been spent on works  
connected with the tanks,  
which formed as part of  
the scheme as I had  
written to C.A. to place before  
the Oil Company. It is  
possible that the C.A.  
may have drawn attention  
to the above as desirable

new para.

(482 $\frac{1}{4}$ )

+ 1062 = 1169

of these additional works,  
but I trust that the 4.43  
will be allowed to  
stand. Scheme as proposed  
by the Railway authorities  
are to be regarded as  
rough outlines, intended in  
all cases to be filled in  
at home. 8. When the works  
were first adopted it must  
have been clear that their  
cost might greatly exceed  
the sum of £920 for  
excavation, proposed in  
your despatch of 9<sup>th</sup> of the 11<sup>th</sup>  
of October 1813, and it is  
one of the points which are  
chiefly to be regretted that  
the General Manager did  
not then fully explain  
the expenditure which on  
the hitherto, independent  
of the excess on the original  
scheme. In the  
conclusion, I may observe that  
my decision as to the  
exceedance of the sum of £920  
was added to the total of

the money forwarded  
under the 1<sup>st</sup> of April  
act, has to charge  
against the  
sum of £375,000 loan.

9. To Mr. Eastwood on the matter  
should be communicated to Mr.  
Eastwood with ref. to his letter  
of the 22<sup>nd</sup> December.

10<sup>th</sup>. With regard to item 34  
I may point out that the  
expenditure of £364 for  
pair head-lights was submitted  
for sanction in your draft  
no: 219 of the 2<sup>nd</sup> of April 1874,  
and approved in my draft  
no: 334 of the 6<sup>th</sup> of May  
of that year.

11. The total alteration proposed  
amounts to £368,303, in  
which is included the £485  
referred to in your draft no: 52 of  
the 21<sup>st</sup> of January and the  
sum of £8,833 for Wadsworth  
and Foreside improvements  
at Wadihouse (item 49), but  
not the sum £5,000 for the  
new Custom Office (item 41).

The estimate for item 49 may  
require revision when there

are no drawings of the proposed  
work which I have  
called, but subject to this there

DRAFT.

to settle a disposable balance of £6,697. I have, however,  
my Ad. of the 19<sup>th</sup> of April,  
advised you the proposal  
contained in your Ad. no. 81  
of the 15<sup>th</sup> of March, to wait  
for this balance to sum  
of £2,000 required for  
newe shops at Kigoma,  
and the amount remaining  
will therefore be reduced to  
£4,697. 151

reducing the amount of £100,000  
loan 1/2. With regard to item  
81, I am reluctant to agree  
to the proposed transfer of the  
£500 to the £200,000 loan,

as it would yet another  
confliction between loans  
and repayment of £100,000  
(a sum remain of it) for  
the days when there is likely  
the required in full to  
the cost to our Hartman  
Scheme.

1. To assure that you will  
discuss the subject of

the disposal of the balance of the  
present £375,000 loan, and I  
have no wish to anticipate  
your representations; but I  
would ask you to consider  
whether it ~~is~~ <sup>is</sup> ~~desirable~~ <sup>possible</sup> it  
would not be desirable to  
close the loan account as  
soon as possible, so as to  
reduce the ~~number~~ numerous  
services from which capital  
expenditure can at present  
be met, and for this purpose  
~~it~~ <sup>it</sup> ~~will~~ <sup>be</sup> ~~best~~ <sup>best</sup> by the balance to retain  
the new Customs Office, and in  
the loan programme  
~~the~~ <sup>the</sup> ~~new~~ <sup>new</sup> ~~shops~~ <sup>shops</sup> ~~of~~ <sup>of</sup> ~~the~~ <sup>the</sup> ~~Government~~ <sup>Government</sup>.

This would involve an excess  
of £303, which could be met  
by reducing the charge on the  
loan in respect of item 49  
to £8030, the balance being  
met from the ~~General~~ <sup>General</sup> railway  
~~Exchequer~~ <sup>Exchequer</sup> ~~Exchequer~~ <sup>Exchequer</sup>

(3) On this basis, the first  
allocation of the loan would  
be as follows:

At Eastwood  
C. Cashed + £2000
