BRITISH EAST AFRICA.

EAST AFRICA PROTECTORATE

No. 378

May 6th 1915.

Sir,

110
8243
Gene

With reference to your despatch No. 142 of March 4th, I have the honour to inform you that the Government Entomologist states that the Pink Boll Worm is distributed through Uganda and German East Africa and has been recorded several times from this Protectorate.

2. Up to the present Egyptian Cotton Seed has been allowed to enter the Protectorate without fumigation if accompanied by a certificate from the Department of Agriculture of the country of origin stating that the seed was free from disease. In the absence of such certificate consignments have invariably been fumigated.

3. In the circumstances I consider that it is advisable that all cotton seed imported into the Protectorate should be fumigated at the port of entry even though it may have received such treatment

RIGHT HONOURABLE

LEWIS HARCOURT, P.C., M.P.,

SECRETARY OF STATE FOR THE COLONIES,

DOWNING STREET,

LONDON, S.W.

treatment at the port of shipment and instructions
have been issued accordingly.

I have the honour to be,

Sir,

Your humble, obedient servant,

H. Conway Beylid.

GOVERNOR.
