MEDICAL SERVICES IN E.A.

*28. Sir Sydney Haug

To ask the Secretary of State for the Colonies, if he will state what steps are being taken to strengthen the medical services throughout East Africa; and what is the attitude towards recruitment in this Country for such services adopted by medical schools and societies.

*(S. M. J. Haug)

MENTIONS

ORAL REPLY

Draft reply written

21 December

Various increases of medical staff are proposed in the Colonies now under course; in particular Kenya proposes to create 18 new appointments of medical and sanitary officers and Tanganyika 8.

Considerable increases of expenditure on medical services are also proposed, eg the Uganda medical estimates for 1926 come to £137,024 as compared with £123,517 maxima in 1925.

The est^s of J.S. for Medical and Sanitary Services show an increase of £43,600 in 1926-27.

As regards recruitment, the position at present is satisfactory, but the B.M.A. have threatened to "black-list" the service if it is not possible to satisfy them as to the

Subsequent Paper

28. Sir Sydney Henn, — To ask the Secretary of State for the Colonies, if he will state what steps are being taken to strengthen the medical services throughout East Africa; and what is the attitude towards recruitment in this Country for such services adopted by medical schools and societies.

ORAL REPLY

21 DEC 1925

It is not possible to give definite figures pending consideration of the estimates of the various Dependencies for the coming financial year, but I anticipate a considerable further extension of medical work in Eastern Africa in the near future, especially in Kenya, Uganda and the Tanganyika Territory. It is hoped to increase the personnel of the East African Medical Service by some twenty or thirty officers during the next year. The attitude towards recruitment adopted by the medical schools and societies has been very helpful in the past and I hope to secure their co-operation in filling up the many new appointments which are about to be created.

EAST AFRICA (MEDICAL SERVICES).

28. Sir SYDNEY HENN asked the Secretary of State for the Colonies what steps are being taken to strengthen the medical services throughout East Africa; and what is the attitude towards recruitment in this country for such services adopted by medical schools and societies?

Mr. AMERY: It is not possible to give definite figures pending consideration of the Estimates for the various Dependencies for the coming financial year, but I anticipate a considerable further extension of medical work in Eastern Africa in the near future, especially in Kenya, Uganda and the Tanganyika Territory. It is hoped to increase the personnel of the East African Medical Service by some 20 or 30 officers during the next year. The attitude towards recruitment adopted by the medical schools and societies has been very helpful

in the past, and I hope to secure their co-operation in filling up the many new appointments which are about to be created.

Sir S. HENN: Is it not a fact that, speaking generally, the medical schools in this country are offering considerable discouragement to students offering themselves as entrants in the Colonial Medical Service?

Mr. AMERY: There have been some points of difference and difficulty, but the general attitude has been helpful.
