C.A. on Learning Difficulties

The first appearance to the Board

M. Olson might be successful in view of
his experience in Egypt.

However what has got to be decided is
(the general question of) whether we are
going to let C.A. entertain an application
for re-employment from M. Olson
with the proviso. Personally I

(think best) might tell him - C.A. would
have to investigate his record

of labour fact and also by taking
into account the fact that he is
one, as the Belgian Labour
or their report, a rupture of
many of the existing schemes
and the existing supply
is reached either developmen
up and down, in particular
course, had in mind
to bring our native workers
the effect of reducing
the cost of labour
and therefore increasing
the profits of our
industry and our
country.

He gave us a chance of
wheel, if otherwise apparently
he would have a
chance of getting
a job.

and therefore his case
is quite clear and satisfactory.

His position is quite clear always
and he has no right to say
anything else.

P.L. 4.3.25

No case no. 425 (see minutes on 0/46687/)

Fact 1. It was up in 1916 (1915) that
his application for employment in the U.S.
could not be considered due to his
refused it.

The C.A. was not to consider him for a
Panama affair but were not to do so in view
of the above举动 a too negative —
is that we shd allow them to consider
it in the understanding that if he

M. Olson might be successful in view of his experience in Egypt.

However what has for 15 yrs decided is the general question of a written we are going to let C.A. submit their application for re-employment from M. Olson with the 20 required. Personally I think we might allow it - C.A. would

of course have to investigate his record at date of leave.

Labour fact are as follows: while, by taking into account the alternative facts cannot be denied, as the Belgian Labour and their report, a rupture of the main dependent scheme of enterprises and the existing supply point is reached other developments up and down in Europe in particular courses had had a marked influence on native workers and the effect of reducing

the number of workers in a number of countries were to all extent found a far as possible to be the result of the economic conditions in the countries concerned. In other words the European labour market was satisfactory.

Sir,

With reference to my interview with you this morning re £20 which I have to refund.

I most respectfully ask if it may be considered for the appointment of "Electrical Engineer for the Public Works Department" Zambia Colony by 14/3334.

If this could be possible I promise to repay the £20 out of the first few months salary as I am not in the position to defend that amount at present for I have not been in employment for the past nine months, since I completed a three year contract for the Sir Ministry in Ceylon as a "Mechanical & Electrical Engineer". This name has been on the account books for over two years for the colonies. In my mouth telling this may be placed for a special consideration.

I am etc.
