I have it that this set, really means that they cannot provide for buildings which are urgently required on P.W. retarding work next year.

Such services might be suitable for a loan - but the loan will now only depend just on circumstances.

My reply will be that no claim is yet made as to that. Detailed requirements will be submitted separately from Istanbul.

no definite papers. My notes
came up in the E.A.P. interests, and
I pointed out that the life of the things
in T.A. could not be that of a long term,
& that a big depression in demand would
be necessary.

If you agree I will tell
Dr. E. H. H. that he had better
that if he wants this to be taken
up he should submit papers

About one million Pounds is a fairly good covered for
 Customs requirements in the present day. I have not
 the details with me, but a very substantial amount
 is probably now ready: the fact is that the
 Re-telegraph from the Acting Secretary of State has not
 passed the point, though the matter is being urged,
 because last June or four months ago, it was
 for productive works such as iron, tin, copper, steel
 & other pier (etc.) I cannot see how it is possible to
 to pay a loan of an extra million pounds for
 works, unless it could be repaid over a long
 term of years.
