Mr. Butler

No doubt Sir P. has been informed
by Mr. SEXTON of this effect, and there
is no need to write to her. I
have already advised her that
Sexton should be examined at intervals
of six months for the year following
the death of her husband

MAY 13 1911

50 Welbeck Street, Cavendish Square,

12th May, 1911.

Sir,

I have today examined Mrs. Saxton and child.
Both are in good general health and show no signs of
leprosy. Both are suffering from itch and are being
treated for this by Dr Craig, Dulwich.

It is advisable that she be reexamined at intervals
of six months by some one familiar with leprosy.

I am,

Sir,

Your obedient Servant,

R. W. M. M. M. M. M.

The Under Secretary of State,
Colonial Office,
London.
