Nairobi

East Afr. Pet.

25<sup>th</sup> Oct 00

by Dr. Hand

I have been here now something  
for a month and am beginning to  
get a little settled down to the  
place and the work. For the present  
I am more or less a fixture in  
Nairobi with the Chief Col. Storcky  
an excellent fellow with whom  
I get along very well. He, however,  
by no means approves of my  
being appointed to the Veterinary

to this effect and has recommended  
that my appointment should be  
changed to that of Stock-Inspector  
Department without a proposal for the Protectorate in which capacity  
recognized diploma and thus he considers I could be of increased  
use and benefit to him and that I could do very  
well on me as a great and valuable work for which I am  
of scientific research work be fully qualified. This change  
to be done and also as all however requires the approval of  
in regard to Quarantine regulations Home authorities who will  
etc. are required to be signed I trust see their way to allowing  
a properly qualified Veterinary Surgeon to go through, and it would  
be considered that my signing I understand lead to a permanent  
orders might lead to difficult appointment. The Acting Commissioner  
with farmers & owners of cattle thoroughly approves of it as at  
etc. He has accordingly written

present there is no one to act  
in the capacity of Stock Inspector  
~~as~~ an appointment badly wanted  
from every point of view and  
would be of the greatest service  
to the Veterinary Department to  
them cope with the numerous  
outbreaks of disease in the country.

Storly had already applied  
his estimates for next year for  
this extra appointment to the  
Department and I hope it  
sincerely that I may be posted  
to it. Storly had a great  
of experience with most of  
diseases which are most frequent  
here Texas Fever East Coast Ticks  
(Malaria Tick Fever) River Fever

Heart water, Horse Sickness etc.  
and are least convenient with the  
various disease carrying ticks etc.  
So I feel confident that I could  
fill this appointment satisfactorily  
and for a very real value.

Very truly yours and strongly  
that I should be appointed to it  
and I shall be very much obliged  
to you if you would say a good  
word for me in regard to it.

I should be on a much more  
satisfactory footing in such a post  
and everyone in the Department  
would be satisfied. You have

Comm. Residence Office.

Mombasa,

October 20th 1905.

African Protectorate.

No. 574

Sir:

With reference to your despatch No. 347 of August

14th regarding the appointment of Captain Neave to be

an Assistant in the Veterinary Department of this

Protectorate, I have the honour to transmit to you

herewith a copy of a despatch from Mr. R. J. Sturdy, the

Chief Veterinary Officer, in which he recommends that

Captain Neave is not a qualified Veterinary Surgeon,

and in consequence is unable to sign certificates, as

required by the Regulations affecting the importation

of Live Stock, he should be appointed Live Stock

Inspector, provision for which appointment is being

made in the next year's estimates.

H. M. Principal Secretary of State

for the Colonies,

Dominion Street,

London

L. I have the honour to recommend this appointment

for your favourable consideration.

I have the honour to be,

Sir,

Your most obedient,

Humble servant,

J. S. Talbot

Acting Commissioner. 1

C.O.  
41289

Office of the

The Chief Veterinary Officer,

Nairobi,

October 5<sup>th</sup> 1905.

No. 19/v.0.

Sirs:

I have the honour to inform you that Messrs. Flock and Neave have arrived from England for service in my Department.

Mr. Flock has proceeded to Naivasha and taken over Veterinary charge of that Province.

Captain Neave holds no recognised diploma in Veterinary Science, and when it is remembered that the work of the Veterinary Department not only demands that its officers should be qualified, but also that each should be able to institute original research, it is indeed difficult to understand the appointment of Captain Neave if it is intended that he should undertake the duties of a Veterinary Officer.

The Regulations affecting importation of Live Stock into this country require that all animals shall be accompanied by a certificate from a qualified Veterinary Surgeon. Now, then, are the Officers of the Veterinary Department to enforce these Regulations if the officers themselves have not the necessary qualifications?

Mr. Lyttelton recommends in his telegram of the 18th ultimo, that no Veterinary Officer should be sent out till they have undergone instructions in preventive tropical Veterinary medicine, a recommendation with

which

De Acting Commissioner,

MOMBASA.
