Dear Mr. Rend.

I have been effered by the indiandovermment the post of Sanitary Engineer to the Government of Bengal, and have accepted the offer; and prepose leaving for Calcutta in the middle of February. I would not have accepted this offer if it had not been that I feel that the work on which I have been engaged for you has new was such a straight-forward course that my services were no longer really necessary. The plans and specification sent out were, I think, so complete that no trouble is likely to arise in carrying out the work (specially with such an extremely competent Engineer as Watts in charge), and there should be no difficulty in getting an Engineer, who, for a small fee, would be prepared to supervise the letting of contracts for materials, which is the chief work which is now left to be done in England.

Moreover if any real difficulty should arise it will of course be perfectly easy to communicate with me, and I do not know why there should be any difficulty in obtaining then consent of the Indian Sovernment for me to go over to Bast

Africa if necessary, for I could easily arrange to do this, and do any ordinary work which was required in the Protectorate, during an absence from India of less than 6 weeks.

I have today received the very satisfactory enclosed letter from Watts, which I should be glad if you would let me have back when you have read it.

It is a great satisfaction to me to think that the many difficulties in the way the progress of the Works and of the development of Nairobi generally are now disappearing.

Yours simperely.

J. W. William
