Sir,

I have today examined 14 out of 15 specimens
and have the honor to report that his spleen
is still slightly enlarged and that from his
account I gather his attack of Blackwater Fever
was a very severe one and that soon after the
first attack he had a relapse.

I therefore concur in the view of the Medical
Board that manifested him in West Africa and con-
sider him unsuitable for further service.
Yours faithfully,

The U.S.
