ELECTRIC LIGHT FOR LOMASA GOVERNMENT BUILDINGS

Report that he had instructed the treasurer to make provision in the estimate for cost of electric light in Lomasa is a great boon. Trust's action will be approved.

M. Butler
The Treasurer is advised of the
estimate of £2,000 for installation
of electric light in buildings of Lomasa
which will be the Ministry. Electric light
is now being provided for the
President's house following the precedent
in the President's case. It is had
better for the Treasury about £1,000
with the estimate. Sincerely
W. Read
The question should be considered

Foreign Paper

with the estimates of the reason
given in par. is unintelligible to me.
The two companies I assume that a
company has been established in
Mombasa, and

are operating in distinct areas, the
fact that the Govt. get electric light at
Mombasa from the company here is no
sort of reason for getting electric
light at Mombasa from the company
there unless it is to the advantage
& advantage of the Govt. to do so.

That to be paid to be considered under
the present appears to have been
in the commission.

GOVERNMENT HOUSE,
NAIROBI,
BRITISH EAST AFRICA.

SIR,

1933

I have the honour to inform that I have submitted to your approval instructions to the Treasurer to make provision in the Estimates for the cost of insulating

the Government buildings at Nairobi.

I have done this in the analogy of the amount granted by your predecessor to the Nairobi

Electric Light and Power Company, and the Nairobi

Waterworks and Sewerage Board, and the Nairobi Commercial Company.

The total amount required is £5,000 and under

the heading of "Miscellaneous" in the Estimates.

I am, Sir, very respectfully,
Your obedient servant,

WILL

SECRETARY OF STATE FOR THE COLONIES,
10, WHITEHALL, LONDON, S.W. 1.

W344 be collected from the users of the light.

The electric light will be a great boon

and a full amount of the same will be

of some way to manufacturing

has no money to pay
